

SOME REASONS WHY

**Architects Should Specify
Somerville Brand
Plumbing Brass Goods**

SOMERVILLE PLUMBING BRASS GOODS are made in Canada in the best equipped brass plant on the continent. Mechanically they are perfect in every detail. They are made from the best of material by the most modern machinery obtainable, and by experienced workmen, under the supervision of a staff of expert foremen. Our Patterns have been carefully selected and designed with the purpose of producing a line of goods superior in both mechanical efficiency and artistic design. They have a purpose in their design. They please the eye and satisfy the good taste of those whose discernment draws the line sharply between the elegant and inelegant. They offer an opportunity to use plumbing goods that are something more than a means to an end—goods in which mechanical perfection finds a place beneath exterior grace.
