HAMILTON, Tuesday, Sept. 20.-After and sewerage accommodation for the past eighteen months the city and township officials could not reach a satisfactory agreement, and about two weeks ago the township officials applied to the railway board for an order compelling the city to comply with their request. Since then the city has made an effort to-settle the question and asked that the hearing of the case by the railway board be postponed and yesterday word was received that the request had been granted.

At Last.

George Webb, proprietor of the East End Incline, has informed the board of control that his revised draft of the agreement regarding the transportation of patients to the mountain hospital will be ready for submission in a few days. It will likely be taken up at the meeting of the board of control on Thursday.

Following this announcement a special meeting of a joint committee of the board of control and the works committee and representatives of the township was held yesterday afternoon when the agreement drafted by the special works committee was presented. After a lengthy discussion no decision was arrived at and another meeting of those interested will be held tomorrow afternoon.

City Solicitor Waddell, who is strongly opposed to the scheme, stated that the acceptance of and the putting into force of the present agreement would mean a tremendous burden for the city, which it should not be asked to carry. He asked that before a definite decision is arrived at he be allowed to submit his written opinion on the scheme, and that the city engineer, city cierk and assessment commissioner be also asked to report on it. This was agreed upon.

Should Pay For Extension.

Controller Cooper, who is entirely opposed to the city giving the township a water-sewerage supply under any consideration, said that he would not sanction the scheme until it had been subsubmitted to the electorate. He is of the opinion that the township should pay for the extension of the city sewerage and water systems which will be made necessary by the granting of the application.

Mayor Walters also expressed himself as being opposed to the township for a period of fifteen years would be giving up the only machinery it has to force the Jockey Club into the city. He explained that in orderto get the Jockey Club into the city. He explained that in orderto get the Jockey Club into the city. He explained that in orderto get the Jockey Club into the city. In discussing some of the clauses of the agreement, City Solicitor Waddell explained that for some years to come the city would only require a two-foot sewer on Kenilworth and Sanford avenues, but to accommodate township sewerage a seven-foot sewer would be necessary.

The solicitor objected also to the clause referred to the city supplying water to the township, stating that no limit was mentioned. He suggested that both a minimum and maximum amount should be stipulated and was instructed to draft a new agreement regarding this feature, and to present it at Wednesday's meeting.

Drowning Accident Narrowly
Avoided in Lake Near Humber
Yesterday Afternoon.

Prompt action on the part of William Crawford, head driver for the Roger Miller Company, the contractors employed on the city reclamation work, saved the life of an employe of the firm in the lake just off the mouth of the Humber yesterday afternoon.

Crawford had just removed his diving suit when he heard that Wallace had gone down for the third time. Plunging into the water, which at this point is 16 feet deep, he succeeded in locating Wallace and bringing him to the surface.

A doctor was hastily summoned, and after working over Wallace for a about time he was sufficiently restored
