o'Neill will motor to Oakville this morning to attend a convention with reference to improving the Lake Shore Road from Toronto to Hamilton. All loans in Canada have decreased.

Notice deposits increased over April by nearly \$10,000,000 and demand deposits by \$21,000,000. Liabilities amount to \$1,247,306,724, as against \$1,211,160,889. Call loans in Canada decreased by nearly \$1,000,000 and call loans outside fore the expiration of 30 years' service and after ten years' service, he or she shall be allowed to withdraw 50 per of paving the road the entire distance between the two cities. The board of control have postponed their meeting till the afternoon in order that the balance of the 30-year term. Any of the provisions of the fund may be amended by a two-thirds vote of the board of education.

Refused to Vote. Trustee Noble was the only member of the board who refused to vote on To get the blood pure is a problem which nearly everybody has to face in the springtime. The quicker the poisons are swept from the blood the less suffering there will be from pains, aches and rheumatism.

The liver and kidneys filter poisons from the blood, and you can very materially help them by the use of Dr. Chase's Kidney-Liver Pills.

There is no way to purify the blood except through the activity of these two filtering organs. Because they are prompt in awakening the action of the liver and kidneys, Dr. Chase's Kidney-Liver Pills are the greatest of blood purifiers.

You need not have the tired languid feelings which make life a burden to so many peeple if you use Dr. Chase's Kidney-Liver Pills. Backache, headache, billousness, indigestion and constipation disappear when this great medicine is used.

Trustee Noble was the only inember of the board who refused to vote on the question. Mr. Noble stated that he had not had time to look into the matter, and, therefore, could not give an opinion. Trustees Shaw and Hiltz, who were instrumental in drafting the scheme, were in receipt of many congratulations from the week of the able manner in which they had met the views both of the members of the board and of the teachers, who were all vitally interested in this question. A large number of principals and teachers were present to be known as the director of education, when James L. Rabbi Stolz, which was colorless and general in its terms.

Dean Summer dealt quite directly with the sensational factional conflict

in the enormous auditorium, in whose behalf he spoke, and prayed that there should be granted to the members of the convention "self-restraint, cool judgment and all wisdom, that their deliberations my insure to the nation civic righteousness, industrial peace and social justice." The entire gathering, both on the floor and platform and in the galleries, stood during Dean Sumner's invocation, and as he closed, broke into quite general hand-clap-

Cheering Loud and Long. The afternoon session was remarkable not so much for the fact that it for the extraordinary conditions which ensued on its adjournment.

Almost with the fall of Chairman Root's gavel there broke out a pande-monium of chee.ing, which lasted about as long as that of yesterday. It had scarcely a definite cause, tho its im-mediate occasion was the effort of a

man in the west gallery to swing the great gathering into unison with the cry "We want Teddy." It started all right, but almost immediately La Follette, Hadley and Cummins enthusiasts began an oposition turmoil, so within less than a minute there was simply one meaningless chaos of noise. Presently a group of men in the south gallery, back of the platform, brought

gallery, back of the platform, brought four or five megaphones into play with "We want Taft."

A smashing rainstorm was in progress outside, so the people simply stood where they were and shouted, each to his taste.

H. McWHINNEY, Toronto, Contractor.

S. J. PLANT, Toronto, Ceramic Expert, Managing Director.

TRUSTEES—Imperial Trusts Co. of Canada; Toronto.

TRUSTEES—Imperial Trusts Co. of Ganada; Terente.

This company is organized to engage in the making of building brick, terra cotta, fireproofing, etc. The demand for brick is greater than the supply, and there is need of another factory to make really high-class brick. The demand for building brick is such that contractors are obliged, in many cases, to use inferior brick, probably endangering the safety, and assuredly endangering the durability, of the buildings so constructed.

The Canada Brick and Fireproofing Company's property consists of 150 agres, and contains a very valuable and practically inexhaustible deposit of shale, clay and building stone.

The deposits in this property are of such a nature that the best bricks, with a density and hardness not surpassed, and commanding the highest market price, can be made at a very low cost. Bricks can be made the year round, winter as well as summer, as the company will have a thoroughly tested and specially designed dryer, which obtick industry in many years, and, considering the unsupplied market, the attractive prices for the product, the low cost at which the Canada Brick and Fireproofing Co. Limited, are able to produce, the extraordinary good quality of the brick that can be made, and the well-known ability of the managing director of the company, this opportunity, to invest is one of the best this company has ever had the pleasure of offering its clients or the general public.

LOW CAPITALIZATION. The capitalization of the company was made at the low figure of \$500,000.00, to assure the shareholders of good-sized dividends on the investment.

PROFIT-SHARING ARRANGEMENT. PROFIT-SHARING ARRANGEMENT.

In addition to the 6 per cent, preference, the Preferred Stock will also share with the Common Stock in all further dividends in the proportion of 1 per cent, for the Preferred to every 3 per cent, on the Common, as follows:

Where Common Stock receives 3 per cent, the Preferred Stock will receive 7 per cent.

Where Common Stock receives 6 per cent, the Preferred Stock will receive 3 per cent.:

Where Common Stock receives 9 per cent, the Preferred Stock will receive 5 per cent.

After this point, dividends are to be shared equally by both Preferred and Common.

TWO SHARES OF PREFERRED STOCK CARRY A BONUS OF ONE SHARE OF COMMON. 150 acres of land, containing extensive and practically inexhaustible deposits of shale and clay of the best brick-making quality, 50 acres of which contains a valuable quarry of "Credit Valley" building stone, which in itself will be a source of great revenue. There is abundant water for all purposes running through the property.

TRANSPORTATION AND LABOR. The Grand Trunk Railway passes through the property, which is situated in the same zone as the Milton, Halton, Terra Cotta and Port Credit Companies. The vicinity of the City of Toronto, including the Counties of York and Halton, where our plant will be situated, is the principal brick-making section, and in 1910 produced 62 per cent, of the Ontario output, and 29 per cent, of the total Canadian production. Plenty of cheap labor is available in the surrounding towns.

Following is a report made by S. J. Plant, Ceramic Engineer and Specialist—an expert in the appraising and testing of clay de-I have made a personal examination of the property containing 150 acres in the Township of Requesing, in the County of Halton, which is about five miles north of the Town of Georgetown, upon which it is proposed that the works of the Canada Brick and Fireproofing Company, Limited, are to be placed.

There is upon the cale.

pany. Limited, are to be placed,

There is upon the said land a very large deposit of red shale, which, I believe, runs to a depth of 200 feet, and is practically inexhaustible. I have tested the shale which lies near the surface, also at a depth of two feet, eight feet and fifteen feet. It works smooth, dries sound and burns to a metallic hardness, and is of such plastic consistency as makes it suitable for the manufacture of high-class front brick, as well as an excellent quality of ordinary building brick, together with fireproofing, either porous or dense. It is also suitable for architectural terra cotta and ornamental roofing tiles, conduiting, etc.

Upon one corner of the property is about forty acres of stone, which lies in a stratified formation. This stone is what is commonly known in Toronto as the Credit Valley stone.

A spring creek runs through the western part of the farm, sufficient to supply water for manufacturing purposes, and I am told that this creek has never been known to run dry. At the present time the

The Grand Trunk Railroad runs through the property, and is located conveniently for all switching arrangements.

The Canadian Pacific Railroad have a line staked out through this property west of the Grand Trunk, about 1000 yards running parallel with it. I have no doubt when this line goes through you could get a switch from them that would give you additional railway accommodation to all points.

Yours truly,
S. J. PLANT, Ceramic Engineer.

MARKET. The great building activity in Toronto, in the suburbs, and in all surrounding cities and towns, has made it impossible for the present companies operating to supply the demand. In Toronto alone, 300,000,000 (three hundred million) bricks are used annually, and builders are compelled to bring in their supply from outside points, many importing from the United States. The scarcity of brick is felt in every section of the country, which makes a magnificent market for this new company's products.

In estimating the earnings of the Canada Brick and Fireproofing Company, Limited, the cost per thousand is put at \$7.00 (f.o.b. Toronto, and delivered on the job), to cover all possible contingencies, and the gross income is put at \$9.50 per thousand, or considerably below the average price. On this basis it is estimated the carnings will be as follows, allowing 250 working days to the year. The plant will be built in THREE UNITS:

EACH UNIT CAPACITY. 50,000 bricks per day. Working Days BRICKS PER YEAR.

Gross profits in one year

6 per cent, dividends on Preferred Stock

Surplus for dividends on Common and extra dividends on Common and Preferred, Reserve and Contingency Fund 875,750.00 It will be seen that the Company should earn over 18 per cent. on both Preferred and Common Stock. With the 50 per cent. bonus of Common Stock this would make a return of 27 per cent. on the invest-

MANAGEMENT.

The Company have secured the services of Mr. S. J. Plant, a noted ceramic engineer. He has been in the brick business all his life, and is familiar with the manufacturing of all classes of clay products, and is experienced in the construction and management of brick plants. Samples of brick made from shale off the Company's property may be seen at the offices of the Standard Bond Co.
