Price Brothers and the Newsprint Industry

In view of the extensive public interest in the securities of Price Brothers & Company, Limited — an interest which has been stimulated by recent favourable developments in the newsprint manufacturing and hydro-electric power situation in the Saguenay and Lake St. John district — we have published, in booklet form, a comprehensive description of the Company's properties and operations.

In addition to tracing the growth of Price Brothers' business from 1817 to date, the booklet contains much general information regarding the Canadian newsprint industry and a detailed description of the process of manufacturing newsprint paper. Maps and numerous photographs add to the value of the booklet as an authoritative record of one of Canada's greatest

Why Enterprise Furnaces Adopted Robb Coal Carburetors

-They made them standard because engineering tests showed that they saved at least 20% of the fuel.

-Users report equal or greater results.

-You can have one installed on your present furnace, whatever the make, for less money than it will save you in a season. And it will last as long as your furnace, properly installed.

-A Maritime Product that is making good all over America. Guaranteed to save 20% or you get your money back.

The Operation I Avoided—

IF there is one thing more than another a woman dreads, it is a surgical operation, and to be told that one is necessary

Hospitals are grand institutions, and undoubtedly many operations are necessary. However, we have received hundreds of letters from women who have been restored to health by Lydia E. Pinkham's Vegetable Compound after an operation had been deemed advisable.

Every woman who suffers as Mrs. Coffman did naturally wishes to avoid an operation if possible, and the remarkable statements which she makes in her letter will be read with interest by women everywhere.

Mrs. Coffman's Letter Follows: Sidell, Illinois.—"I was a nervous wreck. I was suffering from a pain in my left sid which was noticeable at all times, but sometimes it was almost unbearable and I could not even let the bed clothing rest on my body at night. I had been sick for seven years, but not so badly until the last eighteen months, and had become so run-down that I cared for nobod and would rather have died than live. I couldn't do my work without help and the docte told me that an operation was all there was left for me. I would not consent to that so m husband brought me a bottle of Lydia E. Pinkham's Vegetable Compound and begged m to take it. I have taken fourteen bottles of it and I feel ten years younger. Life is full to hope. I do all my housework and had a large garden this year. I never will be without the Vegetable Compound in the house and when my two little girls reach womanhood I shall advise them to take it."—Mrs. IDA M. COFFMAN, R. R. No. 2, Sidell, Illinois.

Alberta Woman Avoids an Operation

Provost, Alberta.—"I was in a bad condition and would suffer awful pains at times a could not do anything. The doctor said I should have an operation. I read testimonials Lydia E. Pinkham's Vegetable Compound in the papers and a friend recommended me take it. After taking three bottles I became much better and now I have a bonny baby g four months old. I do my housework and help a little with the chores. I recommend to Vegetable Compound to my friends and am willing for you to use this testimonial letter."

Mrs. A. A. Adams, Box 54, Provost, Alberta.

Before Submitting to an operation Women should try
