NEW BOMBER'S DESIGNER HAS FAITH IN HIS SHIP

Dayton, O., Walter Henry Barling is a real pioneer in the flying game.

The designer of the new giant Barling bomber, world's largest aircraft, has been building planes for years.

Before the war he was connected with the Royal Aircraft factory at Farmborough, England. That occupies the same position over there as the McCook Field experimental station does over here in the United States.

While at the Farmborough plant, Barling was in charge of miscellaneous aircraft engineering work. Later he was associated with chief engineer during the construction of the monster Tyrant triplane.

Barling is confident his latest experiments will be crowned with success. His plane, he believes, will show the world that a monster heavier than air machine of the type he's now completing at Wilbur Wright's Field here, can travel along just as safely as any of the smaller ones.

This is an attempt to incorporate in a single machine a general improvement of the individual units of all the others," he says.

Of course, the military value is one of the primary considerations just now. Consideration must be given to engines, necessary bomb compartments and controls, gun positions and the pilot's vision.

"Comparison of planes from a military standpoint must also have regard for the extent to which the plane can fly in these phases. The Barling bomber permits the addition of any number of engines without increase of structural weight.

"It must provide data and concentration on some definite case, thus leading to tangible improvements."

"Comparison of planes from a military standpoint must also have regard for the extent to which the plane can fly in these phases. The Barling bomber permits the addition of any number of engines without increase of structural weight.

"It must provide data and concentration on some definite case, thus leading to tangible improvements."

REALIZE \$186
AT PIE SOCIAL
AT WESTFIELD

The concert and the pie social held at the Westfield Country Club last night in aid of the building fund of the Methodist church at Hillside was an unqualified success. A capacity audience thronged the clubhouse and everybody heartily enjoyed the occasion.

The proceeds amounted to \$186 and the pastor of the church, Rev. Robert Smart, and the trustees were greatly indebted to the club members who took so active an interest in making the entertainment so successful.

W. E. Golding was the chairman for the evening and announced the items of the concert programme which were as follows: Bagpipe selections, A. Cromwell; Harry Lauder imitations, "The Waggle of the Kilt" and "Rodeo," by Rev. Robert Smart; readings, Miss Doris Ryan; vocal solos, Thomas Guy; exhibition of juggling and club swinging, by Mr. Cromwell; reading, "The first visit to the butcher," Miss Doris Ryan; solo, Thomas Guy; song, "The same as my father did before him," Rev. Robert Smart.

There was much fun when the pies were auctioned and the auctioneer did his best to assist in raising prices. The most expensive pie cost \$15, but it is understood that it was worth that sum.

Harry Rankine was the assistant auctioneer. The committee in charge of the entertainment was as follows: E. R. Machin, George Ewing, Frederick Ekin, Hammond Evans and Rev. Robert Smart.

The new church at Hillside had half about two years ago, replacing the edifice destroyed in the Westfield fire. There is still about \$2,000 to be paid on the building and the interior has not yet been completed.

The money raised last night will go towards the building fund.

HARRY THAW GETS VACATION
Court Grants Petition of His Mother and Physician.

Philadelphia, Aug. 24.—Harry K. Thaw, slayer of Stanford White, who has been a patient in the insane department of the Pennsylvania Hospital here, has got another vacation under an order signed by Judge J. Willis Martin of the Court of Common Pleas.

The court's action was based on the petition of Thaw's mother, Mrs. Mary C. Thaw of Pittsburgh, supported by an affidavit made by Dr. Daniel H. Fuller, resident physician at the hospital.

Mrs. Thaw set forth in her petition that she had been informed that a change of environment would be beneficial to her son, both as regards his general health and his treatment from a medical viewpoint. She asked that he be permitted, in company with keepers, to visit her at her country home near Cresson, Pa., for a brief period.

Judge Martin ordered that Thaw be permitted to visit his mother until September 10. Thaw got ten days' leave last February to visit his mother. Before that he had obtained permission to leave the hospital on two occasions.

FIREWORKS BOMB KILLS MAN.
Rochester, Aug. 24.—One man was killed, another man and a woman were injured slightly, and two automobiles were damaged by a shrapnel from an aerial display bomb that exploded prematurely in the hands of an employee of the company in charge of the fireworks display at Genesee Valley Park late last night marking the end of a three-day celebration commemorating the Feast of St. Rocco.

The explosion occurred at about 10:30 p.m. when a large crowd of spectators was gathered in the park. The bomb, which was being fired by one of the employees, exploded prematurely, sending shrapnel flying in all directions.

The victim, a man named John Smith, was killed instantly. The woman, Mary Jones, and the man, Robert Brown, were injured by shrapnel wounds. The two automobiles were also damaged.

The fireworks display was being given by the Genesee Valley Park Association. The explosion occurred during the third day of the celebration, which was held in honor of St. Rocco.

The park association officials are investigating the cause of the explosion. They are also trying to determine how the bomb was fired prematurely.

The explosion caused a great deal of alarm among the spectators. Many of them fled the park in a hurry. The police were called to the scene to maintain order.

The fireworks display was a popular attraction of the celebration. It was expected to draw a large crowd of spectators. The explosion was a tragic accident.

The park association is planning to cancel the fireworks display for next year. They are also considering other ways to celebrate the Feast of St. Rocco.

The explosion was a reminder of the dangers of fireworks. It is important to use fireworks safely and to avoid accidents.

The park association is sorry about the accident. They are trying to make sure that such an accident does not happen again.

The explosion was a tragedy. It is a sad reminder of the dangers of fireworks. We hope that the investigation will lead to a better understanding of how to use fireworks safely.

The park association is planning to cancel the fireworks display for next year. They are also considering other ways to celebrate the Feast of St. Rocco.

REASONS WHY MANY LOSE JOBS

Chicago, Aug. 24.—(A. P. by Mail)—Lack of a sense of responsibility, unwillingness to work hard, lack of thoroughness, false notions about salary and promotion, and lack of principle are the five chief reasons why 90 per cent. of the boys and girls of the United States lose their first jobs, according to a report made to the Chicago Association of Commerce by A. D. White, statistician of Swift and Company.

Mr. White's report noted that 90 per cent. of the boys and girls lose their first positions. The report also shows that in nine cases out of every ten, the loss of the position can be traced to one of the five reasons noted.

His report continues: "Lack of a sense of responsibility is shown by neglect of work, failure to put the most important things first, and the expression of a general 'I should worry' attitude."

"Unwillingness to work hard is shown by being late to work, stretching the lunch hour, and stealing a few minutes at the end of the day, watching the clock, and wasting the time by social conversations and telephone calls during business hours."

"Lack of thoroughness, is indicated most frequently by unwillingness to learn the bottom and to go through the drudgery of mastering each step before going ahead."

"The real secret of promotion lies in constantly doing more than you are asked to do. Keep yourself underpaid, as soon as you are overpaid you are bound to go backward."

"Lack of principle is shown by constant mistakes, untruthfulness, and the constant making of excuses."

GIRLS REBUKED
BY MRS. FORD

Marquette, Mich., Aug. 24.—Mrs. Henry Ford publicly rebuked women and girls wearing overalls and shorts, without aprons or dresses, when they belied her at Michigamme, a bridge first visit to the butcher, Miss Doris Ryan; solo, Thomas Guy; song, "The same as my father did before him," Rev. Robert Smart.

There was much fun when the pies were auctioned and the auctioneer did his best to assist in raising prices. The most expensive pie cost \$15, but it is understood that it was worth that sum.

Harry Rankine was the assistant auctioneer. The committee in charge of the entertainment was as follows: E. R. Machin, George Ewing, Frederick Ekin, Hammond Evans and Rev. Robert Smart.

STATUE AT GRAND PRE IS UNVEILED

Grand Pre, N. S., Aug. 23.—Many Acadians of the Maritime Provinces, Quebec and other parts of Canada attended the third pilgrimage of the people of that race to their historic shrine, Grand Pre, today. And many English and other British-descended compatriots of the Acadians joined them and participated in the exercises and gave evidence that, while the past was being memorialized, it was with the sworn brotherhood of one race to another and with the fealty of them both to a common nation.

The event was the occasion for unveiling of a statue of the Madonna of L'Assomption, the Patroness of the Acadian people, and of the taking over in the name of the Grand Pre Memorial Committee of a small lot of land at Horton Landing upon which will be erected a suitable cross marking the spot where the Acadians of the Exile were taken from the shore to the vessels in which they were deported. The ceremonies commenced with Mass at the Chapel of St. Charles, Father John Gaudet of St. Anne-de-Kent, New Brunswick was the celebrant.

The statue of the Madonna, placed within the chapel of St. Charles, was donated by the Society of L'Assomption and it is said that there is no finer carved image of the Madonna on the American continent. It was made from the painting by the Spanish artist Murillo, and was done by one of the most renowned of present day Italian sculptors, and carved from pure white Carrara marble. The statue is seven and a half feet high and represents the Virgin being upheld by several cherubs as she ascends to Heaven.

Covering the statue was a large Acadian flag, similar to the French tricolor, except that the Acadian star is in one corner of the blue bar. Father Cormier, Shediac, N.B., organizer of the pilgrimages to Grand Pre, officiated. Premier P. J. Veniot of New Brunswick, assisted by Dr. A. H. McAnson, M.P.P., Eel Brook, Yarmouth county, slowly lifted the flag from the statue. The audience sang the Acadian national anthem, Ave Stella Maria. The Shediac band played the music.

Dr. D. V. Landry, of Shediac, presided at the afternoon meeting. Other speakers included J. P. Chaisson, President of the Mutual Society of L'Assomption, D. T. Robichaud, Ottawa, and Alfred S. Roy, Moncton.

Dr. Jerome Dolron of Vonda, Sask., was among those present.

LONDON MARKS ITS FAMOUS SPOTS

London, Aug. 2.—(A. P. by mail)—Visitors to places of interest in the city and many Londoners themselves have been surprised lately to find numerous blue plaques with white letters on walls of buildings. These are being put up by the City Council to mark the sites of ancient London, and the residences of famous citizens.

One of the most recent ones marks the spot in Chesham from which the Romans measured their miles from Residences of Chaucer, Keats, Shakespeare, Pepys and other prominent citizens of the olden days also have been designated.

ACTORS DEMAND DAILY PAY.
London, Aug. 2.—(A. P. by mail)—Singers and actors in the countries affected by the slump in exchanges have adopted a new method of collecting their salaries. The artists now demand that they be paid at the conclusion of each day's work and at the rate of exchange paid for seats that day.

The artists have refused to sign contracts except on this basis, as they say that the fluctuation of the exchange makes their salary practically nothing at the end of the month.

Best honey in England comes from white clover.

Laundry dainty things twice as often, this way

It's not necessary to keep your prettiest things folded and laid away. Wear them—often. Launder them just as often as necessary. But do it this way:

Use Palmolive PRINCESS SOAP FLAKES—and see fragile crepes, silks, laces, come from laundering absolutely unharmed. Colors brightened and freshened, if anything.

The great foam of suds contains nothing to hurt the delicate fabric, the most delicate coloring. It dissolves the dirt, however, most thoroughly—and washes it away.

These snowy, crinkly flakes contain nothing but pure soap. So they go farther, cleanse more efficiently. That makes it economical
