Kootenay Mail.
J. C. Montgomery, who is associated with E. N. Bouche, of Rossland, on Keystone Mountain, came down from a ong trip in the Bend on Monday. He made several new locations between Downie creek and Gold Stream on a strong iron capping.

It is reported that the parties who went up with J. H. Hoar are going to bond five of the Vancouver syndicate's Big Bend properties and will spend a considerable amount of money in their development this season. What with the Orphan Boy company and this outfit there will be considerable activity in quartz mining this winter.

A new discovery of much promise has been made about 18 miles down the Arrow lake on Canyon creek, and about six or seven miles from the lake shore. A strong lead of very good ore has been found here, on which eight claims have already been located, amongst which are the Broken Hill, Bessie, Bradford and others. A sample of ore from the Broken Hill was sent to the Revelstoke Board of Trade for exhibition, which went 157 ounces in silver and 80 per cent lead. This location at Canyon Creek was discovered three years ago but abandoned.

> ASHCROFT. B. C. Mining Journal.

Mr. Kirkpatrick has some good looking ore from Highland valley on exhibition at the fair. Some fine samples of copper rock (bornite), carrying as high as 27 per cent. of copper. Kirkpatrick and Shulor will do development work in some of their copper lands in that section, beginning soon.

Col. E. Deylones, of Seattle, came up on Saturday and took the Monday's stage for Cariboo. In the Colonel's company was Mr. Delatier, a mining expert, living at Denver, sent up by a company of French capitalists to see some Cariboo properties. If favorable report is made as seems reasonable to expect large works will be the result of the French company's mines on Quesnelle river.

Mr. Johnson, president of the Cariboo who has been on Antler creek, where the company's mining property is, came down Tuesday on his way to Seattle, work this season has been to prove that the ground owned by them to be of value, and that from the present showing there is no fear of that part of Cariboo not turning out well.

Clarence Miller and wife, registering informs us that the Blackwater camp, although only known as such for the payment of their work on the High Ore. past three months, now has quite a number of prospectors, and that thirtyfive locations have been made, all or James L. One hundred and ten thousand dollars' worth of stock has been sold for the projected automatic can factory. As 8001 as the site is decided upon construction will be commenced.

NELSON. Nelson, Oct. 3 .- The carrying out of the sanitary arrangements is not running smoothly. Dr. Watt, when he was here chose for the city dumping ground, a small piece of land in the corner of the government townsite, almost inaccessible and quite close to the road of the Nelson & Ft. Sheppard station, and also close to private residential property, of which it materially affects the value. Complaints have naturally arisen, and some other arrangements will have to be made. Meanwhile Mr. Wolley, the sanitary inspector, is carrying out his work energetically and well. There have been a few cases, perhaps twenty, of alleged typhoid in the town, but many suggest the possibility that they may be simply malaria or mountain fever. There have been no deaths.

Nelson Tribune.

The option given by Tom Collins and partners on the Ottawa mineral claim adjoining the St. Mary's in Rossland, was taken up this week. As a result Tom and his partners divide \$2000 between them.

R. I. Kirkwood and his partner Mc-Kinnon, the lucky locators of the Enterprise on Ten-Mile creek, in the Siocan, were in town this week. They received the final payment last week on the Enterprise bond of \$25,000 and contemplate a trip east on the proceeds. Work was commenced on August 20th and twenty-two men have been at work continuously since, and as as ore comes down from the mines the soon as the ground will allow more will smelter will be ready to blow in.

Surface cross-cuts show up the vein the full length of the claims, 6,000 feet, and assays on the surface were as high as 316 oz. in silver. The the Pine Log claim a cross tunnel has heen run 40 feet, cutting the vein, a The Kootenay country is being visited shaft is down fifteen feet also showing ore, from 6 to 15 inches wide, and a by a gentleman whose travels through ore. Near the junction of the Pine Log this region are likely to redound to its and the Bondholder a tunnel has been crosscut tunnel is also started 125 feet main lead which carry argentite and sul-

> BOUNDARY CREEK. Boundary Creek Times.

Mr. J. P. McLeod is moving into new office recently erected near Col. Weir's house at Anaconda. It is reported that both the Lincoln and City of Paris have been bonded and development work is to be commen

shortly. . The bond is controlled by an English company. Mr. Rutherford, representing English capital, is staying in Greenwood. has already purchased property in the North Fork.

All the water has been removed from the Stemwinder shafts. Sinking is in progress on one shaft and a drift is being run at the foot of another.

After a few days' work last week on the Cracker Jack, in Greenwood camp, copper ore was found beneath an iron capping. The ledge was stripped for some 11 feet; no walls were found. Jack Farrell, while prospecting on the Buttercup, in Wellington camp, the othhas since widened out to nearly three

As the result of a little surface pros-Hugh Sutherland, of Hudson's Bay pecting of the new iron-capped leads up allway fame, has bonded the Topaz and Lost creek, pyrrhotite has been uncover-Silver Nugget lying between Eight and ed. This is particularly the case on the Ten-Mile creeks, and belonging to Swan Ballarat, located by Robinson and Mc-Ten-Mile creeks, and belonging to Swan and the Clough brothers. The figure sink on a large body of it. While the progress of the deal a most despicable gold tenure is at present undoubtedly attempt, which happily failed, was made low, it is encouraging to note that the

said to be most promising.

The option on the Stemwinder expired on the 24th ult. When Manager Field The ore is iron-stained quartz carrying While hunting for stolen goods in a began suicing last spring, his idea was free gold and copper pyrites. Mr. shack on Sunday the police ran across to wash away the mountain side with Fisher is a newcomer and has had pracother day from the lockup by climbing shipping quantities, lying in a broken here is, therefore, another example of the

Mr. McIntosh, of Winnipeg, bought a three-quarter interest in the Big Six from Alexander Wallace this There is a good showing on this claim, upon which the assessment was recently done. The assays run above the aver-

Fourteen men have been put to work on the Old Victoria in Camp McKinney. The claim was among the first locations -if not the first-staked in the country. One of the owners resides in Victoria, and another interest is controlled by Mrs. Dowding, of Rock Creek. The property is likely to prove valuable Heretofore it was generally believed that there was no placer ground on Boundary Creek above the old workings near Jolly Jack's creek. A claim was, however, recently located by Mr. Hanrahan between the ranches of Messrs. Kerr and Rey, and from all reports, contains good pay dirt. On an average the gold runs from five to fifty cents to the pan. Systematic work will

be commenced next week, meanwhile sluice boxes are being put in place. Mr. W. W. Gibbs recently returned from a trip up Kettle river visiting both Canyon and Cedar creeks. says that the condition of affairs the e now is similar to what was experience t in Boundary in '91. The country is promising field for prospecting, the cha acteristic formation being diorite. Gibbs was particularly impressed with the showing of a claim owned by Ed. Sullivan and Alex. Waddel, some 28 miles up the river from Rock creek. The ore resembles that of the Winnipeg and is solid pyrrhotite with the brownish shade imparted by copper. Assays by Mr. Gibbs gave an average value of \$12, which from surface rock is very fair returns. The owners intend to put in working capital of \$50,000 over and three or four months developing the property this winter.

Worthy Your Confidence.

The success of Hood's Sarsaparilla in conquering scrofula in whatever way it may manifest itself is vouched for by thousands who were severely afficted by this prevalent disease, but who now mally opened. Rev. Mr. Beaty looks rejoice over a permanent cure by Hood's humor, or it may attack the glands of There are quite a number of prospects | the neck, or break out in dreadful runall probability, ship considerable ore develop into catarrh or lodging in the during the winter.
