

Increase Your Dairy Profits

by giving your dairy herd the most comfortable quarters that can be built. Be your own dairy inspector and insure the absolute purity of your dairy products by building your stable and spring house of a material that insures sanitary conditions, and which, at the same time, is economical.

Build with Concrete

It is the most economical material for every kind of farm building, for it requires no repairs, never wears out and never needs painting. Dairy stables of concrete are clean and sanitary. They keep the herd warm and comfortable in winter, and tend to increase both the quantity and quality of the milk.

Whether you build a stable, silo, spring house or other farm building, concrete is the cheapest material to use.

"What the Farmer Can Do with Concrete" is the title of a beautifully illustrated free book that tells all about concrete farm buildings and how to build them to save money.
