

Synopsis of Canadian North-West Land Regulations

THE sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the District. Entry by proxy may be made at any Dominion Lands Agency (but not at Sub-Agency), on certain conditions.

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$3.00 per acre.

Duties—Six months residence in each of three years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate 60 acres and erect a house worth \$300.

The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Live stock may be substituted for cultivation under certain conditions.

W. W. CORY, C.M.G.,
Deputy of the Minister of the Interior.

Don't leave part of your corn crop in the field to waste

Harvest your entire crop—kernel, cob, stalk, leaf and tassel—keep it fresh and juicy for your stock in an

IDEAL GREEN FEED SILO

All kinds of live stock thrive better on silage than on dry fodder. Having silage to feed is like having rich summer pasturage in January. Dairy cows, beef, cattle and sheep all can be fed better and cheaper with silage than with any other feed.

Stop the waste of your corn crop due to the fodder being dried and exposed to the weather and increase the productivity of your stock by feeding plenty of silage.

You have still time to get a silo up before the corn is ready to go in. Don't wait until next year. If you put the silo up now and feed silage this winter, the silo will pay for itself before spring. If you neglect to do this, you will lose the cost of a good silo this winter.

An Ideal Green Feed Silo ordered now can be supplied promptly and you will be able to get it up in time without extra expense for help.

Ask for catalogue, prices and terms of the Ideal Green Feed Silo, stating size and style you wish or the number of heads of stock you wish to feed.

HARVESTING PEAS

Solving the Labor Problem

The TOLTON PEA HARVESTER saves the work of four or five helpers. It can be attached to your mower in a few moments with a wrench, and it does your pea harvesting in a clean, rapid and satisfactory manner. The peas are bunched automatically as they are cut, enabling you to do ten or twelve acres a day with ease. You should investigate.

We have a number of agents all over the Dominion. If there's none handy to you, write us for catalogue, which explains details of this profitable machine. WRITE TO-DAY!

THE PAPEC

"IT THROWS AND BLOWS"

Papec Ensilage Cutters

Cut silage perfectly, and at a very low cost of operation. Papec knives cut smoothly and swiftly. They make a fine, uniform silage that is very palatable and nutritious. The combined throwing and blowing force that lifts the silage is generated from one fifth less power than is required by any other blower doing the same work.

Mechanical perfection and high quality of material mean long life, no loss of power and low cost of operation.

Our new illustrated catalog gives facts showing how "The Wonderful Papec" will save time and money at cutting time. Send for copy today.
