

**A WAR CORRESPONDENT'S NARROW ESCAPE.**

Mr. Frank Scudamore, the great war correspondent, who sent many of the Canadian dispatches during the late Boer war, owes his health to Zam-Buk. He has passed unscathed through twenty-nine battles, but a scratch which turned to blood-poisoning nearly ended his days. Zam-Buk saved him, and he writes as follows:

"I have proved Zam-Buk such a blessing that I want others to know of its merits. The poisonous dye in some underclothing I was wearing got into a scratch I had sustained and blood-poisoning set up. Inflammation was followed by great pain and swelling, and then ulcers broke out on my legs. For some time I could not walk a few steps, nor even put my feet to the ground. On my left leg, below the knee, I had seventeen ulcers, which caused holes into which I could put my thumb. On the right leg I had fourteen ulcers. Medical treatment failed to relieve, homely remedies were applied in vain. Week followed week, and I gradually grew worse, until I was worn out with pain and lack of sleep. On the advice of a friend I obtained some Zam-Buk and left off everything else while I tried it. It seemed to give me almost instant relief from the pain, and in a few days I noticed that it was healing the ulcers. This was cheering indeed, and gladly I persevered with the Zam-Buk treatment. Bit by bit the poisonous matter was drawn out. The ulcers were healed, and new, healthy skin grew over the previously diseased places. I am now quite cured, and in gratitude I mention these facts that other sufferers from skin disease may know of something which will cure them.

Zam-Buk is a sure cure for eczema, ringworm, ulcers, abscesses, piles, bad leg, suppurating wounds, cuts, burns, bruises, chapped hands, and cold cracks, and all skin injuries and diseases. All druggists and stores sell at fifty cents box, or post free from Zam-Buk Co., Toronto, upon receipt of price.

**QUESTIONS AND ANSWERS. Miscellaneous.**

**CEMENT FOR STABLE FLOOR—LIME AND SAND FOR STONE WALL.**

1. How many barrels of cement would it take to floor a cow stable thirty-six by thirty-seven feet?

2. About how much each of lime and sand would it take to a cord of stone for lacement wall, 20 inches thick. We intend to use most all sizes of stone that can be handled conveniently? G. C.

Ans.—1. A layer of two inches of concrete, mixed one of Portland cement to five of high-grade gravel and sand, is sufficient for stable floors, and even less does in alleyways. At this thickness a barrel of cement covers 120 square feet. Your stable comprises 1,332 square feet, so that you would require about 12 barrels of cement.

2. In building stone walls, a cord of stone is required for about 100 cubic feet of wall. For every cord of stone, about one-eighth of a cord of sand is needed. This, of course, will vary with the quantity of stone used. Sand and lime are mixed in the proportion of three or four of the former to one of the latter. That is, for every 128 cubic feet of stone, there would be 16 cubic feet of sand; or the mortar required would comprise, approximately, 16 cubic feet of sand and 4 or 5 cubic feet of lime.

**TRADE TOPIC.**

Another roofing on the market in Canada, and advertised in these columns, is manufactured by the Canadian H. W. Johns-Manville Co., Ltd. The basis of this roofing is asbestos, the greatest fire-resistant known, and practically indestructible. The asbestos fibres are felted in sheets, and cemented together with asphalt, an excellent waterproof material, with the result that the manufacturers have reason to claim this roofing is not affected by changes in temperature, rust, rot or decay. The cost of maintenance of a roof should be carefully borne in mind when purchasing. Owing to the mineral construction, it requires no painting or coating at any time in order to preserve its life. Recently a fire-test was made by the Fire Chief and City Architect of Toronto. A temporary construction was covered with J-M Asbestos Roofing. A brisk fire was built on top of this, and it took one hour and ten minutes before it did any serious damage. This roofing is manufactured by a reliable firm, having branches throughout Canada and United States, and asbestos mines at Danville, Que. They would be pleased to forward catalogue of special interest to farmers.

**BOOK REVIEW.**

**PROGRESSIVE POULTRY CULTURE.**—A practical, progressive and systematic exposition of the science and best methods of poultry culture, by a veteran teacher, investigator, and acknowledged authority, who writes from large experience, giving the results obtained from practice, study, and observation gained while resident at different times in six States of the Union, as well as in Germany and Japan. This is the publisher's comment on a neat 289-page illustrated cloth-bound book, by Arthur A. Brigham, B.Sc., Ph.D., Principal of the South Dakota School of Agriculture. Perusal of its pages establishes the moderation of the claim. While paying particular attention to the utility side of poultry culture, the author does not neglect the interests of the fancier, exhibitor, or breeder, and the teachings are of general application. The scope of the book is gratifying to the seeker after information, the directions are plain and practical, the language non-technical and straight to the point. As a text-book, reference work, or manual for the practical poultry-keeper, the work is deserving of high praise. It is published by the Torch Press, Cedar Rapids, Iowa. Price, \$1.50.

**THIS IS THE SHEET METAL AGE.**

To make a factory, warehouse, barn, shed or outbuilding of any description, wind, water, snow, fire and lightning proof cover it with

# Galt Corrugated Sheets

which are accurately pressed from the best and most durable British Steel it is possible to procure.

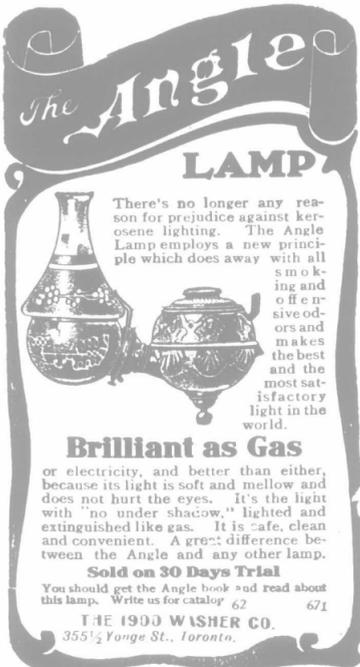

All corrugations are straight and true, assuring an accurate fit at both side and end laps without waste. Special hip and ridge covers make tight, neat joints at these points.

Where warmth is not important "Galt" Corrugated Sheets save three-fourths of the wood sheathing as well as considerable labor, and will give good service for a life time of at least fifty years.

It costs no more for a "Galt" Corrugated Sheet Steel Building than for a wood one. Which do you think is the better investment? Galvanized or painted material always in stock. Complete information in catalog "3-B."

The Galt Art Metal Co., Ltd., Galt, - Ont.

Sales and Distributing Agents: Dunn Bros., Winnipeg and Regina.

**The Angle LAMP**

There's no longer any reason for prejudice against kerosene lighting. The Angle Lamp employs a new principle which does away with all smoking and offensive odors and makes the best and the most satisfactory light in the world.

**Brilliant as Gas**

or electricity, and better than either, because its light is soft and mellow and does not hurt the eyes. It's the light with "no under shadow," lighted and extinguished like gas. It is safe, clean and convenient. A great difference between the Angle and any other lamp.

**Sold on 30 Days Trial**

You should get the Angle book and read about this lamp. Write us for catalog 62 671
