For selling Picture Post Cards and Collar Buttons.

This "Favorite" Football given free for selling \$2.75 worth of our fast-selling, gold-plated Collar Buttons or our Picture Post Cards, giving views of Canada, England and other countries. Collar Buttons sell at 10c for set of 4. Post Cards, 6 for 10c. Send your name and address and we will mail you whichever you wish to sell. Write to us at once.

THE PREMIUM CO.

Fence Friends

Every buyer of Peerless Fence becomes a friend of ours because Peerless fence saves him trouble, money and time. **PEERLESS Woven Wire Fence** is made of all No. 9 Steel Wire well galvanized. **PEERLESS FENCE** requires very few posts, and you save money on the net cost of your fence.

PEERLESS

The Fence That Saves Expense

One of the reasons why **PEERLESS Woven Wire Fence** is better than other fences is because of the **PEERLESS** look. It holds securely and without damaging the wire, yet there is just enough elasticity to prevent snapping from sudden shocks, changes in temperature or from any other cause. Stock cannot get through it—under it or over it. There are so many advantages in buying **PEERLESS** Fence in preference to others that we have not room in this advertisement to tell you of them.

Your name on a postal brings you our new printed matter, containing much useful information in regard to fencing. Write for it today.

No "Flying Start" Needed with FROST & WOOD No. 8

Why, think you, do you have to back up some Mowers a few feet and get a "flying start" before the knives will cut?

It is because the gear wheels on external gear mowers do not mesh fully enough and lost motion results.

When selecting a mower, see if the small gear wheel is inside the large (the internal gear, note illustration) or outside of it (the external gear.)

If it is the external gear you'll find only one cog in mesh. To start this kind of a machine in heavy hay without first "getting up speed" is impossible. There is so much "slack" to be

taken up in the gears between the Main Drive Wheels and the Pitman, that the horses have to travel quite a distance before the knives commence cutting.

Now, look at our top illustration (better still, see our No. 8 Mower), and what do you find? Why, that two cogs are always in full mesh and at least one other in touch. You'll readily understand by this that the Internal Gear is just about three times as fully in mesh as the External. The gears mesh so completely that they simply must turn smoothly and precisely together, with never a slip. You can take our No. 8 into the heaviest part of your hay field and the knives will commence cutting the instant the horses step up.

Furthermore, in the external arrangement, the wheels turn away from each other, out of harmony, and the cogs wear down.

By the internal method (see top illustration) the wheels move in the same direction, in harmony, which reduces friction (wear) to the minimum. The result is a smooth and easy-running machine—the pride of the owner.

Look at the small arrows pointing to our double brace. The other method, you understand, is to have but one brace at this part of the mower. You can see for yourself how much wiser it is to have the double brace. It greatly strengthens the machine where a big strain falls, and more fully protects the working parts against the jars and jolts caused by driving over rough ground.

Then, too, the No. 8, thanks to the use of generous sized Roller Bearings, delights the horses by running so "easy," instead of making them work so "hard," as some mowers do.

Just see our agent in your locality. But first drop us a post card for catalogue H4
