easy for a time on commission-hous selling, as well as some pressure from bearish traders, but the market turned firm and had a fair advance on buying of lard and ribs by packers coupled with some demand

FOR THE CROP HANDLING.

Preparations have started for th garnering of the western grain crop. "The bread basket of the empire is the term aptly applied to Western Canada, and while the reaping of the crop is now a momentous proposition in the west, the matter of conveying the contents of this basket to man ket is of equally great significance concentrating their attention ju now to the handling of grain ments offered along their lines, an it can be safely said that in point of adequate facilities the grain this year will be handled with greater ditspatch and in a more satisfactory manner than ever before. It is said that approximately 35,000 box cars will be available for the movement of the crop with approximately 77

The C.P.R. expects to have 18,000 box cars in operation, which is about 20 per cent. more than last year; th Canadian Northern will have about 9,000, the G.T.P. 5,000 and the berta Railway and Irrigation Co. Midland, and the Brandon, Saskat chewan & Hudson's Bay Railway about 3,000 freight cars more. The C.P.R. will have 350 locomotives in commission, the C.N.R about 225, and the G.T.P. about 17.

engines.

The web of railway tracks which has been spread throughout the west during the past year, with Win nipeg as its apex, will have considerable effect in relieving the congestion on the older lines, and save long wagon hauls across country. The G.T.P. will accept grain all alon its lines between Winnipeg and Ed monton for practically the first time and will open its branch from Mel ville to Balcarres for the grain trade The C.N.R. will be operating pas Zealandia on the Goose Lake exten sion, southwest of Saskatoon, and where there is at present some 2 new elevators. This company wil also take out some grain on it Battleford-Prince Albert branch. O the Brandon-Regina line of C.N.R. there are now about 35 ele-vators in operation. The main line of the Canadian Northern is being ballasted both east and west at an enormous expense.

This year the double track of the C.P.R. will be fully completed bet ween Fort William and Winnipeg which will be of tremendous advan tage in rushing the grain through to the head of the lakes before the close of navigation. It will also have a very marked effect in keeping the vestern lines of the company The C.P.R. will this year take large quantities of grain for the firs of Saskatoon, and also on its Mood

Elevator Capacity.

From a joint circular issued by a western lines it was ascertained the at the beginning of the present year there were 1.480 elevators in north west Canada, including terminal an interior elevators, and these have total capacity of about 65,000,00 1.001 elevators, C.N.R. 398, G.T.P. 47 Alberta Railway and Irrigation 11 Brandon, Saskatchewan & H.B Railway 15, and Midland Railway 8. During the present season it is esti-mated that 220 elevators were constructed in the west, which would 55 new elevators erected.

At the beginning of the present sea son the grain capacity of all elevators Railway and I. Company 294,000 G.T.P. 1,375,000, B. S. & H. B. Rail way 435,000, and Midland Railway

The capacity of the terminal eleva tors at Fort William and Port Arthu ollows: C.P.R., Porth Arthur, 750,000 . Port Arthur. 7.000,000: G.T.P., For capacity at Winnipeg is 1,415,000

Milling Capacity.

In addition to the elevator capacit of the west, the figures show tha mills operating in Western Canada Of these, 78 are located along are flour mills with a capacity of 36 725 barrels a day; 8 are oatmeal mill with a capacity of 1,340 barrels a day and 28 are feed mills with a capacit of 1,183 barrels a day.

On the C.N.R. lines there are flour mills and one oatmeal mill, th latter together with one flour mil being operated at Humboldt by the Doukhobor society. The capacity of these 27 mills is 8,540 barrels a day With such a large output, these mil become a very important factor i connection with the disposal of th
