VIENNA, To-day.
A despatch to the Chronicle says the relations between Serbia and Bulgaria are becoming increasingly strained. Serbia claims for herself Egri, Palanka, Kratova, Aezek, Askup and Okhrida, in total disregard for the treaty concluded before the war between Serbia and Bulgaria under which most of these towns being Bulgarian, would go to Bulgaria. The disputed territory comprises 25,000 miles. A Neue Presse despatch adds, it learns that Bulgaria suspects the allies are purposely delaying the conclusion of peace in order to retain the Bulgarian army at Tchaatja as long as possible, while Serbia concentrates her army along Vardar River, and Greek forces near Salonika, Bulgaria is now preparing to divert all available troops from Adrianople to Macedonia. The Bulgarian government, according to a Sofia despatch to the Porte has notified other governments of the Balkan League that the terms of the latest note of the Great Powers are acceptable. Bulgaria asks the allies to assent promptly to the conclusion of peace. It is probable, adds the despatch, that an armistice will be arranged this week.

NEW YORK, To-day.
The time limit for filing damage claims against the Ocean Steam Navigation Company Limited for losses incurred by the sinking of the Titanic, was extended by Judge Holt yesterday, in case of two attorneys representing nearly sixty claimants. One, acting for seven residents of Switzerland was given thirty days. The other representing claims of over 50 immigrants was given a week. There were 125 claims filed yesterday before the time limit expired. These amounted to \$2,132,857 and bring the total now claimed for loss of life, property, and injury nearly \$14,000,000. Among large claims submitted is that of E. H. Natch who is executor of the estate of Charles Natch who was drowned. The claim is for \$150,000. Cora E. Fox asks for \$100,000 for death of her husband Stanley H. Fox, Rochester N. Y. One of the smallest claims, yet one of the most insistent, is that of Mrs. Mary McGovern of this city. Mrs. McGovern demands \$50 for two Irish crocheted collars and an additional \$20 for sitting in court for two days listening to the reading of the Titanic Monitor.

SACRAMENTO, Calif., To-day.
An anti-alien land ownership Bill, designed primarily to prevent Japan from acquiring a title to real property within the State, but so worded as to prohibit any alien from owning land for more than one year, except upon a declaration of his intention to become a citizen, was passed by the lower House of the Legislature by 60 to 15. The order is not to embarrass foreign corporations. The committee had corporation clause Bill apply only to aliens not eligible to citizenship.

LONDON, To-day.
The news of the actual conclusion of the armistice between Turkey and Bulgaria appears to be premature, but there is little doubt that it is on the eve of arrangement. The first reports, regarding the armistice came from Constantinople, and the Russian government is in receipt of similar news. According to reports current in St. Petersburg the armistice will be the result of Russian mediation.

LONDON, To-day.
Geo. Lansbury, ex-Socialist member of the Commons who, at suffragette meeting in Albert Hall on April 10th, urged the militants to continue to burn and destroy property, has been summoned to appear before the court under a statute providing for preventive justice. Miss Kenny was summoned to the same court under the same statute.

PROVIDENCE, R.I., To-day.

Fox Fever Now In Alberta.

New Venture to be tried by Titled Englishwomen.

Edmonton, Alberta, April 2. — Several titled society women of London and other parts of England, attracted by the high prices paid for black fox pelts, are coming to Edmonton this spring to engage in fox breeding in Central and Northern Alberta. They are prepared to make large investments. If the venture is successful it is likely that women who have hitherto devoted their attention to prize dogs and horses, will engage in the new industry.

Eight black-fox skins, each valued at \$4,500, were sold in Edmonton last week by trappers from the north country. Fifty-four thousand dollars worth of silver fox pelts were sold last season.

OBITUARY.

MRS. ANNIE TAYLOR.

There passed away yesterday, after a lingering illness, Mrs. Annie Taylor, wife of Mr. J. Guy Taylor, and daughter of Mr. Robert Sexton, boat-builder. She was the victim of that dread disease, consumption, for the past two years. All last season she lived in the cottage camps for consumptives and began to show signs of improvement, but her convalescence was only temporary and ultimately she removed home where the end came quietly and peacefully. Deceased was a prominent member of Cochrane Street Church choir, and her demise will be regretted by a large circle of friends. Besides a husband and two-year-old daughter, a father and brother are left to mourn, to all of whom much sympathy will be extended.

Resignation.

The President

declined to keep my claims in mind. I thought I had a chance to hold a post in Prince, or Hay, or St. James, or any of the games. "I cannot you appoint," said Woodrow, "so arant! You can't have what you want," cried Woodrow, "so arant! I have no place for you, so seat! skeddadle! shoo!" At first my heart was sore, and fervently I swore, and said I would aspire to retribution dire. "I'll poison Woodrow's corn," I said, with darkling brow. But when I looked around, on those who won, and found them worried and distraught, I said, "Revenge is not!" All troubled were the chains who gathered in the snags; all burdened with their woes, and tagged by jealous foes, all doing countless chores, all trailed by tiresome bres with ne'er an hour of rest to soothe the savage breast. And so I cried: "Cogs wounds! And also tare and 'ounds! Ode fish," quoth I. "I'll trail back to my native vale, and there among my aunts, I'll tend my cabbage plants, and herd my humble bees, and prune my pumpkin trees." And then, at home, in peace, I deal in elbow grease. Palladiums may bust and bulwarks fall to dust and spangled banners rot. I do not care a jot. My pees are doing well; my onions — how they smell!

Can't Get Away From It

Is it possible to nourish, strengthen and rebuild the Brain by Food?

Every man who thinks uses up part of the brain each day. Why doesn't it all disappear and leave an empty skull in say a month of brain work? Because the man rebuilds each day.

If he builds a little less than he destroys, brain fog and nervous prostration result sure. If he builds back a little more each day, the brain grows stronger and more capable. That also is sure. Where does man get the material to rebuild his brain? Is it from air, sky or the ice of the Arctic sea? When you come to think about it, the rebuilding material must be in the food and drink.

That also is sure. Are the brain rebuilding materials found in all food? In a good variety but not in suitable proportion in all.

To illustrate: we know bones are made largely of lime and magnesia taken from the food; therefore to make healthy bone structure we must have food containing these things. We would hardly feed only sugar and fat to make healthy bone structure in a growing child.

If we desired to keep brain strong and healthy, we would use food known to contain the things Nature uses for the purpose.

True, Nature provides these elements in a variety of edible things. We submit the following facts for those who care to know something definite on the subject:

Analysis of brain by an unquestionable authority, Geoghegan, shows of Mineral Salts, Phosphoric Acid and Potash combined (Phosphate of Potash) 2.91 per cent of the total, 5.33 of all mineral salts.

This is over one-half. Beannis, another authority, shows "Phosphoric Acid combined" and Potash 73.44 per cent from a total of 101.07. Considerable more than one-half of Phosphate of Potash.

Analysis of Grape-Nuts shows Potassium and Phosphorous (which join and make Phosphate of Potash) is considerable more than one-half of all the mineral salts in the food.

Dr. Geo. W. Carey, an authority on the constituent elements of the body, says: "The gray matter of the brain is controlled entirely by the inorganic cell-salt, Potassium Phosphate (Phosphate of Potash). This salt unites with albumen and by the addition of oxygen creates nerve fluid or the gray matter of the brain. Of course, there is a trace of other salts and other organic matter in nerve fluid, but Potassium Phosphate is the chief factor and has the power within itself to attract, by its own law of affinity, all things needed to manufacture the elixir of life."

Further on he says: "The beginning and end of the matter is to supply the lacking principle, and in molecular form, exactly as Nature furnishes it in vegetables, fruits and grain. To supply deficiencies — this is the only law of cure."

The natural conclusion is that if Phosphate of Potash is the needed mineral element in brain and you use food which does not contain it, you have brain fog because its daily loss is not supplied.

On the contrary, if you eat food known to be rich in this element, you place before the life forces that which nature demands for brain-building.

Mind does not work well on a brain that is broken down by lack of nourishment.

A peaceful and evenly poised mind is necessary to good digestion.

Worry, anxiety, fear, hate, etc., etc., directly interfere with or stop the flow of Ptyalin, the digestive juice of the mouth, and also interfere with the flow of the digestive juices of stomach and pancreas.

Therefore, the mental state of the individual has much to do (more than suspected) with digestion.

Brain is made of Phosphate of Potash as the principal Mineral Salt, added

to albumen and water.

Grape-Nuts contain that element as more than one-half of all its mineral salts. We must remember that nearly 95 per cent of the brain is composed of water and albumen, but the little worker Phosphate of Potash must be present in order to blend the more bulky materials into useable form.

So with Grape-Nuts. The Phosphate of Potash is more than one-half of all the mineral salts, but the total volume of those elements is exceedingly small as compared with the greater bulk of other food elements contained in Grape-Nuts.

We should also remember that this small ingredient should not be put into the food in the form it might come from a chemist, because man cannot produce these elements in as digestible a form as Old Mother Nature, when she puts them in the wheat and barley from which Grape-Nuts is made.

A healthy brain is important, if one would "do things" in this world.

A man who sneers at "Mind" sneers at the best and least understood part of himself. That part which some folks believe links us to the Infinite.

Mind asks for a healthy brain upon which to act, and Nature has defined a way to make a healthy brain and renew it day by day as it is used up from work of the previous day.

Nature's way to rebuild is by the use of food which supplies the things required. Brain rebuilding material is certainly found in a very natural and perfect form in

Grape-Nuts
