

The Colonist

FRIDAY, JUNE 9, 1893. RAILROAD SPEED.

Travel by rail is in these days booming wonderfully rapid. Locomotives are constructed to travel at the rate of seventy, eighty and even one hundred miles an hour.

It is not true to the life, it is surprising that the article which contains it should be found in the place of honor in a magazine published in Toronto, and one which has its way to make in the Province of Ontario.

Thoughtful people now see that healthy growth is gradual and that the minds of children cannot be forced with impunity.

It is not at all surprising that the majority of the General Assembly saw it to be their duty to condemn Dr. Briggs.

It is possible that the Doctor had brought himself to believe that what he taught, with regard to the inerrancy of the Scriptures and other matters, is in accord with the standards which he had subscribed to and which he had pledged himself to conform to.

It is always suspicious and most unsatisfactory when a man is forced to have recourse to subtle arguments and refinements of interpretation to reconcile what, to men of ordinary understanding, appears to be irreconcilable.

When eminent and experienced physicians express such convictions as these, very little attention should be paid to the hasty conclusions of unprofessional men, who have had neither the time nor the opportunity to obtain the information necessary to enable them to act as guides to others in a matter of such importance.

The London Times has an article on the subject in which it states some facts that should be generally known.

Compulsory vaccination has in England and Wales been followed by beneficial effects. Before vaccination was made compulsory, the deaths from smallpox were 305 in the million.

The German elections take place on the 16th of the present month. The election campaign in Germany is consequently now at its height.

The first game was short and sweet, and simply saw the play well started when it was over.

The second game was played on the 15th of the present month. The election campaign in Germany is consequently now at its height.

The third game was played on the 15th of the present month. The election campaign in Germany is consequently now at its height.

Slates or paper; nothing oral, nothing of interest, nothing by way of supplement from the overbearing, enlightened mind.

As a natural consequence, the spelling, the writing and the composition are in many cases execrable. The examination over, the marking begins; that over, another slate and paper reiteration is in order.

This is indeed a dismal picture. If it is not true to the life, it is surprising that the article which contains it should be found in the place of honor in a magazine published in Toronto, and one which has its way to make in the Province of Ontario.

SPORTS AND PASTIMES.

Victoria Still Leads in the Race for the Pennant—A Grand Display of Lacrosse.

Victories on the Cricket Field—Canoists Programme for Next Saturday.

There can be no two opinions as to yesterday's great lacrosse match played on the Caledonia grounds in the presence of the largest audience that has yet been brought together here on any but a holiday.

On neither side was any disposition to give manifested; the game was fast for the greater part of the day, and when the battle of strength speed and endurance was over, it was matter for pleasant reflection that not once had the referee been obliged to caution any player, much less lay him off, for roughness or fouling.

Victoria won the match, but as predicted, the boys in blue and white had anything but a walk-over. They took the field if anything in better form individually than their opponents, but the latter were well hand by Smith, their field captain, and put up an exceedingly creditable game, showing considerable knowledge of team work and checking close and strong.

It was not a game in which it was safe to give any odds—there was little betting at any time—and the result justified the popular feeling. The home team won by one goal, and it scored in the time extension, the club having taken three games at the complete expiration of the two hours.

To enter into particulars, Cheyne, for the visitors, did as good, honest, reliable work, as any afternoon witnessed. His efforts were well rewarded by Quigley, who checked well and threw carefully, and by K. Campbell, who did the scoring for Vancouver.

For Victoria, the Cullin brothers added lustre to the family name, Charlie again and again relieving the flags when they were most sorely needed, checking scientifically and throwing strong and sure. Frank made himself useful in the field, holding Morley well, and doing quick and accurate work.

Morton was in good form and did his full share of the work he always appeared to be just where he was most needed at the proper time, and when he went in the scrimmage the ball was pretty sure to come out with him. But throughout the game he showed a fine faculty for the game, and his play was considerably off. Ketchum, Belfry and George Tis worked conscientiously in the home field, and their play was a fine example of the game.

When eminent and experienced physicians express such convictions as these, very little attention should be paid to the hasty conclusions of unprofessional men, who have had neither the time nor the opportunity to obtain the information necessary to enable them to act as guides to others in a matter of such importance.

NAVAL AND MILITARY.

H. M. S. Garnet Leaves to Join the Sealing Patrol in Behring Sea.

A Popular Officer Transferred—War-spite Riflemen Win—The New Local Range.

The Garnet left port about 8 o'clock last evening on her way to Behring Sea to take part in the fisheries protection patrol. Her Northern headquarters will be at Unalaska. This will be the Garnet's first trip to Behring Sea, and that account the opportunity of going there would be specially well worth being for the fact that the vessel will soon be bound for home, and the long sea voyages will come to an end.

Sub-Lieutenant Henry D. G. Ford has been transferred from the Garnet to the Champion, the change taking effect yesterday. The Garnet is a 300-ton gunboat, and the Champion is a 400-ton gunboat.

The Garrison Riflemen have been victorious in the recent shooting competition. The team, consisting of Messrs. G. H. Brown, 78; Lieut. A. P. MacIntyre, 78; Mr. T. Owens, 73; Mr. A. B. Hughes, 68; total, 370.

THE ONTARIO SCHOOL SYSTEM.

The number of the Canadian Magazine contains an article entitled "Education in Ontario," by A. H. Morrison. The writer criticises the system of education that obtains in Ontario severely. It is, in his opinion, too mechanical. The children are not educated under it. They are crammed. He says:

THE SUNDAY QUESTION.

The question of the observance of the Sabbath or the Lord's Day or Sunday, is one upon which there is, in these days, a great diversity of opinion, even among religious people. There are some who hold that the day should be observed with extreme rigidity, that no manner of work that can be avoided should be done in it, and that it is sinful to indulge in any kind of amusement on that day. The Sabbath, they hold, from the first hour to the last, should be devoted to religion in some form. There are others who believe that though public and private worship should not be neglected on that day, Christians are not required to observe the Lord's Day with either Jewish or puritanical strictness. They consider it improper to attend theatres or to play cards on that day, but they see no harm in a little quiet and innocent recreation, such as, for instance, as taking a walk, visiting a museum or an art gallery, or listening to a band, always providing that these mild diversions do not interfere with attendance at church or the performance of some other religious duty. There again there are believers in the Christian religion who endeavor to live according to its precepts who hold that the Sabbath is not in any form a Christian institution, and who believe that what is right and lawful to do on any other day can be done on Sunday. Many of these believe that Sunday should be a day of rest, but their belief is based rather on physiological and social grounds than on religious principle. They think that the health, bodily and mental, of mankind requires that one day in seven should be set apart for rest and meditation and recreation.

THE GERMAN CONTEST.

The German elections take place on the 16th of the present month. The election campaign in Germany is consequently now at its height. The people are making a liberal use of their privileges. Electioneering is going on there at a great rate. The number of candidates in the field surprises the oldest campaigners. The reason of this is that there is a large number of political factions in Germany. Each faction is doing what it can to be represented in the Reichstag. This accounts for the unusual number of candidates for legislative honors. This plethora of candidates makes it difficult to forecast the result of the election. The contest appears, so far, uncertain. As present it seems to be any one's game. There are some who say that the indications are favorable to the Emperor's party, and there are others who quite as confidently declare that he is certain to be beaten. All observers agree in saying that the prospects of the Social Democrats are bright. They are making a strong fight, and are sure to have a considerably increased representation in the next House.

THE CRICKET CLUB.

The first game was short and sweet, and simply saw the play well started when it was over. The second game was played on the 15th of the present month. The election campaign in Germany is consequently now at its height. The third game was played on the 15th of the present month. The election campaign in Germany is consequently now at its height.
