will run 65 ounces silver and 75 per cent. lead.

J. T. Sullivan, superintendent of the Elsie mine on Wild Horse creek, reports the shaft down 26 feet, showing 4 feet of solid ore between two good walls. The ore is quartz, carrying sulphurets, and recent assays average about \$300 to the ton. Exactly what the value of the smelter. One sample lot of four tons shipped from the surface two months ago to the Trail smelter ran a little over \$90.

The derive past twelve months.

One very gratifying set of figures is that relating to police matters. During 1895 174 charges were investigated in the city police court, and 269 in the district court, while this year there were only some 95 cases in the former and 78 in the latter, and of these 173 at least 113 were breaches of the Liquof and Indian acts.

The number of mineral claims recorded because of the Nanaimo mining division is exactly 300, which, with 22 recorded because of the Frail smelter ran a little over ago to the Trail smelter ran a little over ferred from the New Westminster office.

Toto

Police Officer Alexander Smith Receives a Bullet In His Breast.

The death of the old year and the birth Capital For Investment of the Coll Agency of the College of the Co talked with the Colonist correspondent much more encouraging, there are also to-day in reference to the possibility of many indications quite as noticeable, of Dixi H. Ross & Co., Government St.

	is also a witness in support of the sucidal theory, being powder-burned and marked as though the revolver had been pressed tight against the breast, the intention being to send the bullet into or through the heart. This would undoubtedly have been its course had it not been deflected by one of the ribs, to pass into the lung. The doctor on his arrival found the injury to consist of a dangerous penetrating chest wound on the left side in the region of the heart. From the location of the point of entrance it would seem most likely that the bullet would pass through the body. It had found no exit, however, and is still lodged in such manner that probing for it would only seal the fate of the patient. The doctors, under the circumstances, can only await developments—death from pneumonia, hemorrhage, or blood-poisoning being the most likely termination of the case. When Magistrate Macrae arrived, Dr. Fraser having said that it would be well to have a formal statement from the wounded man, he had changed his story in several essential details. He saw his assailant, he said, but could not describe him; the shot was fired while he was going from the house to the closet, which is off from the woodshed; he returned the fire and lost possession of his own revolver, he didn't know how; the man	energy began to leave-him. He felt tired, not as from work, but as from power gone out of him through some bodily failure. He sat down to his meals, but not with his old eagerness and relish. There was a nasty copper-like taste in his mouth, his teeth and tongue were covered with slime, and his throat glogged with a kind of thick phlegm, difficult to "hawk up" and eject. He also speaks of a nagging pain in the stomach, flatulency, and much palpitation of the heart as having been among his symptoms. As the ailment—whatever it was—progressed he began to have a hacking cough which he says, seemed as if it must shake him to pieces. He could scarcely sleep on account of it. One of the most alarming features of his illness, however, were the night sweats, for the reason, that they showed the existence of a source of weakness which must soon, unless afrested end in total prostration. In fact he was obliged to give up his work altogether. To him—as to any once active man—this was like being buried alive. One doctor whom Mr. Lagdon consulted, said he was consumptive, and it did indeed look that way. "For twelve weeks," he says, "I went on like this, getting weaker and weaker, and having reason to believe that it would end in my taking the one journey from which no traveller returns. "It was now July—summer time, when life to the healthy is so pleasant and full of hope. At this time my sister-in-law got from Mr. Linsells, Stebbing a medicine that I had not tried yet. His disease was indigestion and dyspepsia, the deadly enemy of every labouring man or woman	more conservative of them for the first time printing a notice voluntarily on British Columbia mines. WESTMINSTER. WESTMINSTER. WESTMINSTER. Dec. 31.—While J. I. Breen, treasurer of the local lodge I.O.O. F., Cloverdale, was close to the lodge rcom door in the rear of the premises, a gunny sack was slipped over his head from behind and his pockets quickly rifled of \$100 lodge money. He was then thrown violently to the ground. When the sack was removed there was no one in sight. NELSON. (From the Nelson Tribune.) The suit of the Nelson & Fort Sheppard railway company against the Paris Belle mining claim, in which the title of the defendant mining company to its mining claim is attacked, will come up for argument at Victoria-during the first week in January before a full bench. The railway company claims that every location made subsequent to April, 1893; the time of the filing of the selection under the railway grant, not accompanied by an entry bond, is invalid. This is the point raised against the location of the Paris Belle. Otto Abeling, the well known mill man, has just returned from the Lanark mine near Illecillewast, where he is putting up a 2C3-ton concentrator for the Lillooet, Fraser River & Cariboo Gold Fields Company, limited. The mill is about one mile from the mines, and will be connected by, an aerial tramway. The property consists of seven claims, and is developed by four tunnels. The	Union 258,542 202,839 N. V. Coal Co. 339,704 320,900 The state of the coal trade has naturally had its full effect upon the Nanaimo district with the result that mercants have in a very large number of cases suffered considerably and many express the conviction that 1896 has been as quiet a year as any within the limit of the decression of the past few years, but, as at this time last year, a decided impression is noticeable that the ebb has reached its limit and that the new year will bring the prophesied change. The yearly assessments of property within the electorial district carry out to some extent the statements made as to the general depression will be seen are by no means altogether discouraging. They are as follows: NORIH AND SOUTH NANAIMO. Real. 1896. \$1,792.009 1897. 1,869,574 NANAIMO CITY. Real. 1896. \$1,792.009 1897. 1,869,203 The customs returns, which are not obtainable in detail at the time of writing, show a uniform and considerable decrease in the amount of duty collected during every quarter of the year and a consequently smaller importation of dutable goods though goods coming in free of duty are largely in excess of what they were last year. The inland revenue returns will show but very little change from last year. During 1896 the vital statistics show there were 258 births, 93 deaths and 57 marriages, as compared with 260 births, 118 deaths and 79 marriages in 1895. The deaths in Nanaimo City during the year were 46, a satisfactorily low death	grand was a serific to the serific t
	is also a witness in support of the sucidal theory, being powder-burned and marked as though the revolver had been pressed tight against the breast, the intention being to send the bullet into or through the heart. This would undoubtedly have been its course had it not been deflected by one of the ribs, to pass into the lung. The doctor on his arrival found the injury to consist of a dangerous penetrating chest wound on the left side in the region of the heart. From the location of the point of entrance it would seem most likely that the bullet would pass through the body. It had found no exit, however, and is still lodged in such manner that probing for it would only seal the fate of the patient. The doctors, under the circumstances, can only await developments—death from pneumonia, hemorrhage, or blood-poisoning being the most likely termination of the case. When Magistrate Macrae arrived, Dr. Fraser having said that it would be well to have a formal statement from the wounded man, he had changed his story in several essential details. He saw his assailant, he said, but could not describe him; the shot was fired while he was going from the house to the closet, which is off from the woodshed; he returned the fire and lost possession of his own revolver, he didn't know how; the man who shot him stood eight or ten feet away, and though he could see the bright barrel of his weapon he could not see his face. Chief Sheppard is sufficiently convinced of the falsity of Smith's version to deem it unnecessary to act upon it. The burned coat; a rool of blood in the shed but nowhere else; the fact that Smith had no enemy but himself and his appetite.	energy began to leave-him. He felt tired, not as from work, but as from power gone out of him through some bodily failure. He sat down to his meals, but not with his old eagerness and relish. There was a nasty copper-like taste in his mouth, his teeth and tongue were covered with slime, and his throat glogged with a kind of thick phlegm, difficult to "hawk up" and eject. He also speaks of a nagging pain in the stomach, flatulency, and much palpitation of the heart as having been among his symptoms. As the ailment—whatever it was—progressed he began to have a hacking cough which he says, seemed as if it must shake him to pieces. He could scarcely sleep on account of it. One of the most alarming features of his illness, however, were the night sweats, for the reason, that they showed the existence of a source of weakness which must soon, unless arrested end in total prostration. In fact he was obliged to give up his work altogether. To him—as to any once active man—this was like being buried alive. One doctor whom Mr. Lagdon consulted. Said he was consumptive, and it did indeed look that way. "For twelve weeks," he says, "It went on like this, getting weaker and weaker, and having reason to believe that it would end in my taking the one journey from which no traveller returns. "It was now July—summer time, when life to the healthy is so pleasant and full of hope. At this time my sister-in-law got from Mr. Linsells, Stebbing a medicine that I had not tried yet. After having used one bottle I felt better, and when I had used the second I was cured, and have not lost an hour's work since." The reader will notice that between the date of his letter there is an interval of four years. We may therefore, infer that his cure was real and permanent. The medicine by the way, was Mother Seigel's Curative Syrup. It is not likely be will forget its name nor what it did for him. As the ailment—whatever it was—progressed he began to have a hacking cough which he says, seemed as if it must shake him to pieces. He could scarcely sleep on account of it. One of the most alarming features of his illness, however, were the night sweats, for the reason that they showed the existence of a source of weakness which must soon, unless afrested end in total prostration. In fact he was obliged to give up his work altogether. To him—as to any once active man—this was like being buried alive. One doctor whom Mr. Lagdon—consulted, said he was consumptive, and it idid indeed look that way. "For twelve weeks," he says, "It went on like this, getting weaker and weaker, and having reason to believe that it would end in my taking the one journey from which no traveller returns. "It was now July—summer time, when life to the healthy is so pleasant and full of hope. At this time my sister-in-law got from Mr. Linsells, Stebbing a medicine that I had not tried yet. After having used one bottle I felt better, and when I had used the second I was cured, and have not lost an hour's work since." The reader will notice that between the date of his taking this medicine and the date of his taking this medicine and the date of his taking this medicine and the date of his taking the second I was cured, and have not lost an hour's work since." The reader will notice that between the date of his taking this medicine and the date of his taking this medicine and the date of his taking the second I was cured, and have not lost a	more conservative of them for the first time printing a notice voluntarily on British Columbia mines. WESTMINSTER. WESTMINSTER. WESTMINSTER. Dec. 31.—While J. I. Breen, treasurer of the local lodge I.O.O. F., Cloverdale, was close to the lodge rcom door in the rear of the premises, a gunny sack was slipped over his head from belfind and his pockets quickly rifled of \$100 lodge money. He was then thrown violently to the ground. When the sack was removed there was no one in sight. NELSON. (From the Nelson Tribune.) The suit of the Nelson & Fort Sheppard railway company against the Paris Belle mining claim, in which the title of the defendant mining company to its mining claim is attacked, will come up for argument at Victoria during the first week in January before a full bench. The railway company claims that every location made subsequent to April, 1893; the time of the filing of the selection under the railway grant, not accompanied by an entry bond, is invalid. This is the point raised against the location of the Paris Belle. Otto Abeling, the well known mill man, has just returned from the Lanark mine near Illecillewast, where he is putting up a 2CJ-ton concentrator for the Lillooet, Fraser River & Cariboo Gold Fields Company, limited. The mill is about one mile from the mines, and will be connected by an aerial tramway. The property consists of seven claims, and is developed by four tunnels. The larger tunnel has a depth of 700 feet in the face. The ore is silver-lead, which will run 65 ounces silver and 75 per cent. lead. J. T. Sullivan, superintendent of the	Union 258,542 202,839 N. V. Coal Co. 339,704 320,900 The state of the coal trade has naturally had its full effect upon the Nanaimo district with the result that mercants have in a very large number of cases suffered considerably and many express the conviction that 1896 has been as quiet a year as any within the limit of the debression of the past few years, but, as at this time last year, a decided impression is noticeable that the ebb has reached its limit and that the new year will bring the prophesied change. The yearly assessments of property within the electorial district carry out to some extent the statements made as to the general depression will be seen are by no means altogether discouraging. They are as follows: NORTH AND SOUTH NANAIMO. Real. 1896. \$1,792.003 71,612.00 719,612 NANAIMO CITY. Real. 1896. \$1,699.200 \$772.00 758,500 The customs returns, which are not obtainable in detail at the time of writing, show a uniform and considerable decrease in the amount of duty collected during every quarter of the year and a consequently smaller importation of dutiable goods though goods coming in free of duty are largely in excess of what they were last year. The inland revenue returns will show but very little change from last year. During 1896 the vital statistics show there were 258 births, 93 deaths and 57 marriages, as compared with 260 births, 118, deaths and 79 marriages in 1895. The deaths in Nanaimo City during the year were 46, a satisfactorily low death rate and one which indicates markedly the state of the public health during the	quanta de la color
	is also a witness in support of the sucidal theory, being powder-burned and marked as though the revolver had been pressed tight against the breast, the intention being to send the bullet into or through the heart. This would undoubtedly have been its course had it not been deflected by one of the ribs, to pass into the lung. The doctor on his arrival found the injury to coneist of a dangerous penetrating chest wound on the left side in the region of the heart. From the location of the point of entrance it would seem most likely that the bullet would pass through the body. It had found no exit, however, and is still lodged in such manner that probing for it would only seal the fate of the patient. The doctors, under the circumstances, can only await developments—death from pneumonia, hemorrhage, or blood-poisoning being the most likely termination of the case. When Magistrate Macrae arrived, Dr. Fraser having said that it would be well to have a formal statement from the wounded man, he had changed his story in several essential details. He saw his assailant, he said, but could not describe him; the shot was fired while he was going from the house to the closet, which is off from the woodshed; he returned the fire and lost possession of his own revolver, he didn't know how; the man who shot him stood eight or ten feet away, and though he could see the bright barrel of his weapon he could not see his face. Chief Sheppard is sufficiently convinced of the falsity of Smith's version to deem it unnecessary to act upon it. The burned coat; a rool of blood in the shed but nowhere else; the fact that Smith had no enemy but himself and his appetite, and the knowledge that he has been drinking heavily of late and was depressed in consequence are woven together and accepted as establishing a complete and common-sense present	energy began to leave-him. He felt tired, not as from work, but as from power gone out of him through some bodily failure. He sat down to his meals, but not with his old eagerness and relish. There was a nasty copper-like taste in his mouth, his teeth and tongue were covered with slime, and his throat glogged with a kind of thick phlegm, difficult to "hawk up" and eject. He also speaks of a nagging pain in the stomach, flatulency, and much palpitation of the heart as having been among his symptoms. As the ailment -whatever it was—progressed he began to have a hacking cough which he says, seemed as if it must shake him to pieces. He could scarcely sleep on account of it. The larger tunnel has a depth of 700 feet in the face. The ore is silver-lead, which will run 65 ounces silver and 75 per cent. lead. J. T. Sullivan, superintendent of the Elsie mine on Wild Horse creek, reports the shaft down 26 feet, showing 4 feet of solid ore between two gcod walls.	Union 258,542 202,839 N. V. Coal Co. 339,704 320,900 The state of the coal trade has naturally had its full effect upon the Nanaimo district with the result that mercants have in a very large number of cases suffered considerably and many express the conviction that 1896 has been as quiet a year as any within the limit of the decression of the past few years, but, as at this time last year, a decided impression is noticeable that the ebb has reached its limit and that the new year will bring the prophesied change. The yearly assessments of property within the electorial district carry out to some extent the statements made as to the general depression will be seen are by no means altogether discouraging. They are as follows: NORIH AND SOUTH NANAIMO. Grip Packed and ... Ready for Good-bye to 1896.

We wish to thank our many friends whoeen pleased to patronize us in '96. V will not learn.

Nor spe the glittering upstart fool;
Shall not carred tables serve my turn.
But all must be of buhl?

1869. This Year's Exports Amount in Valmines was this year 35 and last year 46.
Building during the year has been quiet, the only two structures of import-

ance being the new Central school, which was finished in July, and the new court house, finished a few months earlier, both of which were started in 1895.

Perhaps the most important public Trade has, according to the customs statistics, been decidedly better in 1896 than in previous years, showing an improject of the year is the organization of a syndicate to obtain a charter for the lone. This, too, is in spite of the fact reached its limit and that the new year will bring the prophesied change.

The yearly assessments of property within the electorial district carry out to some extent the statements made as to the general depression will be seen are by no means altogether discouraging.

They are as follows:

a syndicate to obtain a charter for the construction of a narrow gauge railway from Nanaimo up the Nitinatt valley and across the island to Alberni. In the event of Alberni becoming the great mining country which is anticipated, this railway would undoubtedly prove a great boon both to the merchants of Nanaimo and the mine owners of Alberni experis as follows:

Sayndicate to obtain a charter for the that the seal catch this year has been less than the preceding years. The salmon output, however, counterbalanced this railway would undoubtedly prove a great boon both to the merchants of Nanaimo and the mine owners of Alberni experis as follows:

Sayndicate to obtain a charter for the that the seal catch this year has been less than the preceding years. The salmon output, however, counterbalanced this railway would undoubtedly prove a great boon both to the merchants of Nanaimo and the mine owners of Alberni experis as a syndicate to obtain a charter for the construction of a narrow gauge railway from Nanaimo up the Nitinatt valley and across the island to Alberni. In the event of Alberni becoming the great that the seal catch this year has been less than the preceding years. The salmon output, however, counterbalanced this, while the mineral shipments connected with the port have also been very satisfactory. A comparison of the experise property of the form of the preceding years. The salmon output, however, counterbalanced that the seal catch this year has been less than the preceding years. The salmon output, however, counterbalanced that the seal catch this year has been less than the preceding years. that the seal catch this year has been less than the preceding years. The sal-

INLAND REVENUE.

The customs returns, which are not obtainable in detail at the time of writing, show a uniform and considerable decrease in the amount of duty collected during every quarter of the year and a consequently smaller importation of dutiable goods though goods coming in the effect of duty are largely in excess of what they were last year. The inland revenue they were last year. The inland revenue have the past few years shows a healthy and improved condition of the branches of trade covered by the returns:
