City Council

Transactions.

Citizens' Protests Against Dust Result in Resolve for General Sprinkling.

Ferry Bonus Referred to Committee-James Bay Flats Reclamation Scheme.

The city council held a long and important session last night, and considerable business was disposed of, it being after 11 o'clock before the meeting adjourned.

H. Russell Hopkins requested that permission be granted him to make connection with the water main near his property, as he needs water badly for greenhouse purposes. Referred to the water committee.

Two communications were received from merchants doing business on Fort street, one signed by M. R. Smith, and one by Speed Bros. and fifteen others, protesting against the laying of a double street car track on that thoroughfare, and stating that there would not be sufficient room in the street between the sidewalk and car track for their wagons to stand, with any degree of safety.

Ald. Humphrey said he went to the merchants about a month ago, when the improvements were under contemplation, and asked them to send in a similar petition.

The matter was referred to the city engineer, with power to arrange for sufficient space between the sidewalk and car track for wagons to stand.

Bodwell & Duff, solicitors for the Canadian Pacific Navigation Company, wrote to the council, as follows:

"To the Mayor and Council of the City of Victoria.

Having regard to the general demand among the citizens of Victoria for faster communication between this city and Vancouver, we have the honor to inform you that the Canadian Pacific Navigation Company to make the following proposal:

"Our clients are prepared to procure the construction of, and place upon the line between Victoria and Vancouver a steamer with all modern appliances, and the fastest in every respect, which will be capable of making the trip between Victoria and Vancouver, either way, under ordinary circumstances, in four hours, or under favorable conditions, in three hours.

"In order to accomplish this, a very expensive steamer will have to be built, costing not less than \$400,000, and the time required to procure such a vessel, under existing circumstances, will be 18 months, at least. The company cannot undertake this large expense unless they receive financial assistance, and propose that the city pay for this service a bonus of \$25,000 a year for a period of 10 years.

Ald. Kinsman wanted to know if Vancouver was going to put up a bonus too, to which the reply was that it should, but he was doubtful they would.

The letter was referred to a special committee, composed of Ald. Hayward, Brydon and Stewart.

Arthur P. Johnson and George Copeland called the council's attention to the condition of the drain at the foot of Bay street. Referred to city engineer.

J. H. Meldrum requested that the retaining wall on the Burnside road, near lots 6 and 7, be repaired. Referred to city engineer.

J. R. Fraser and eight others protested against the condition of the sidewalk on Dundas street, between Park and Chatham streets. Referred to city engineer.

Holmes again requested that a permanent crossing be laid from the northwest to the southeast corner of Yates and Broad streets. Referred to city engineer.

Dr. Fraser, the medical health officer, reported to the council that a horse now in his possession was not fit to be used for ambulance work, and was not fit for heavy work. Referred to purchasing agent, with power to dispose of the animal.

Fred Carne and others protested against the nuisance in connection with the remains being taken to the old hall on Yates street, and requested that the barricade now obstructing the sidewalk in that vicinity be removed. Referred to city engineer, with instructions to have barricade removed and work of altering building rushed without delay.

The subject of sprinkling the streets, leading to the outer wharf was brought to the attention of the council, when a petition signed by J. H. Todd and 100 others was read, and a lively discussion followed. Ald. Macgregor spoke in favor of having the streets sprinkled, and said he did not see why these streets should be sprinkled, any more than any other streets in the suburbs.

It was finally decided to employ the two street sprinklers now in use in the city for 16 hours every day, and that the road to the outer wharf, Fort street, Yates street, Douglas street to the fountain, and all the streets in the business section of the city should be sprinkled.

Water Commissioner Rayner reported that a 5-inch water main should be laid on Belleville street eastward from Montreal, at a cost of \$115, and on Vancouver street from Fort street to Burdett avenue, at a cost of \$190. Both these districts are now supplied by a 1-inch pipe, laid over 20 years ago, and since the warm weather has set in, and the part of town have been practically without water.

The commissioner also recommended that the claim of Messrs. J. H. Warner & Co. be paid. Adopted.

The cemetery committee reported that a better supply of water was needed for the cemetery, and recommended that a main be laid on Fay road to points in the cemetery which would be most convenient. Adopted.

The city engineer recommended that a number of sewers be built and repaired in various parts of the city, and that the Rock Bay bridge be repaired, the expenditure not to exceed \$300. The main taken from Fort street, and not needed for work on Belleville street improvement, should be used in improving various streets in the city. He also recommended that the sidewalks be repaired, and that the weather was unfavorable for this class of cement work, and adding that the work on Fort street must be finished at once, and therefore would not come under the report. The report was adopted.

The city solicitor and city engineer recommended that the cost of the removal of the poles of the Victoria Electric Co. on Fort street be paid. Adopted.

The committee on finance recommended the appropriation of \$1,501.14 to defray expenses of the city for the past week, and submitted an estimate, and asked for an appropriation of \$1,273 for the completion and equipment of the new fire hall on Yates street. Adopted.

The electric light committee asked that the city engineer be instructed to have rock blasted out to make room for enlargement of the electric light building, estimated cost \$800. That the mast at the fountain be taken down and a lamp placed where the mast now stands. The lights at the corner of Douglas street and Kings road and one on Henry street between Rock Bay street and Blanchard street to be taken down and the mast on corner of Cook and Blanchard streets be taken down and lamp placed in its stead. Also recommending that the engine be given a thorough overhauling. Adopted.

The Taxpayers and Fire Prevention by-law came up for third reading, and the James Bay Reclamation by-law was read a third time and passed. The by-law will be submitted to the ratepayers on August 2.

McGill Exams.—A. R. Robertson and J. W. B. Hamilton, two Victoria boys, have passed the McGill University examinations with honors.

Tax Sale Confirmed.—The city treasurer has received notice that Mr. Justice Giesbrecht has confirmed the last annual tax sale of the city, held in January. Parties who bought property at this sale can get a clear title within one year from the date of purchase, and the property cannot be redeemed by the owners in the meantime.

Barriers to Take It Easy.—Realizing the full value of a good example, the city barriermen have unanimously decided to close their offices during the summer months, and to take a holiday from 9 o'clock till 4 o'clock. Litterbugs and seekers for advice will, therefore, do well to remember that it is only a matter of time before the men of law are at their disposal.

A New Mission Hall.—This afternoon's meeting of the local W. C. T. U. promises to be more than ordinarily interesting, by reason of the fact that business of the hall with reference to the new mission hall will then be disposed of. It is in consequence of the importance of this business that the officers of the W. C. T. U. have specially representative attendance.

Crow's Nest Coal.—During the month of June 10,000 tons of coal and 2,000 tons of coke were shipped from Fernie by the Crow's Nest Pass Coal Company.

Two mines on Coal creek near Fernie are being worked and 400 men employed. This company expect to ship 1,000 tons a day by December. Another mine is being opened at Chelch. In three months 400 coke ovens will be in operation.

Underwriters.—The Victoria and Vancouver boards of underwriters have been reorganized, and the former will now be known as the Victoria Board of Underwriters, while the official designation of the latter will be the Mainland Board.

Richard Hall was elected president, J. H. Macgregor vice-president, and J. G. Elliott secretary of the local board. Mr. A. A. Book is the president of the Mainland organization.

Meets This Evening.—The managing committee of the J.B.A.A. meets this evening at 8 o'clock to receive reports and to further advance preparations for the autumn day, at which record-breaking will be the rule, not the exception.

The boys have decided not to send a representative crew to the Astoria regatta, as the strong oceanmen cannot conveniently forsake their business interests for the requisite length of time.

Delayed Salvatistas.—Through a change in orders, it will be impossible for Col. Jacobs and Brigadier Howell to reach here in time for the services arranged for the day. Both are expected to arrive on the 22nd inst.

Instead, Col. Jacobs will speak at the street and barracks services of Saturday. The Brigadier also participating in the exercises. Both are described as earnest and effective speakers, as well as energetic workers in the army plan.
