The writer talls how "loyalty of the handiest kind will be constantly on tap," how "each colony will be bound to bear a certain proportion of any war into which Britain may plunge." The Globe's climax of vehemence is reached when it states that Imperial Federation is "in truth nothing but a fad and jingo dream, and opinionates that the English aristocracy and English merchants expect to utilize the feder-ated empire for their own private advantage." Coult anything be more ridiculous?
