quite a number of tourists in our various objects that might have been pretty village who seem to be en- the frozen bodies of the crews. At were covered with snow.

Several old sailers opproached the berg as near as they dared to and scauned the ships through powerful glasses, but could not see any name of anything to indicate their outionality or business on the sens. There were no signs of life aboard them, nothing but the motionless masses under their white coverings. . They were believed to be part of Sh John Franklin's expedition and were seen at the mouth of the harbor almost stationary for several days. Then one morning the berg was gone, and the ultimate fate of the derelicts it carried is still one of the mysteries of the sea -Minna Irving in New York Press.

The Pillars of Hercules. The "Pillars of Hercules" was the name unciently given to the mountains of Calpe and Abyla, standing opposite to each other, the one on the European and the other op the African shore of the strait which connects the Mediterconean sea with the Atlautic oceua. The mountains are now called the Rock of Gibraltar and Jebel Zatant The word Gibrattar, which is at pres ent also applied to the strait, was. originally "Jebel Tarte," or "Mountaic of Taric," Taric being the name of the leader of the first Mohammedan band which crossed at that point over inte Spain in the year A. D. 710.
