CHICAGO MARKET.

HEAVY REALIZING BY LOCAL LONGS—MARKET HEAVY—CORN STEADY—CORN QUIET.

Chicago, June 6.

Wheat opened easy, a trifle lower, and turned heavy. The Snow report of 275 millions of winter wheat and perhaps a like amount of spring crop had a depressing effect. Private cables from London were also lower.

St. Louis was on the selling side, and the market there was weak notwithstanding reports in that locality of further damage by rust.

The statement made that spring wheat receipts were three times as large and winter wheat receipts twice as large as for the corresponding day a year ago was discouraging to the bulls.

The month of June generally tests the farmers' capacity to hold back his wheat for an advance in prices.

The present increase in the movement of wheat to market is due partly to the recent advance in price and partly to the ripening of the grain in the Southwest, although new wheat has not started owing to the lateness of the season.

Receipts have been exceptionally heavy for some days, and as above stated much in excess of a year ago, which was the heaviest movement in a decade if not in the history of the trade.

The Beerbohm cable estimating a decrease of 160 millions in the European crop is the first intimation that European crops would not total up to the figure of a year ago. Estimating a 200 million decrease in North America, or 360 millions off the figures of 1898 brings the world's crop down to rather under the average for a period of years.

From a speculative point of view the market appears to have touched the top for a little, unless European and home advices go from bad to worse.
