#### Minneapolis Market.

Wheat—There was a good demand for cash wheat from millers, with the early sales on the basis of about 87½c for Nc 1 northern, but later with the improvement in futures there was an advance and then 88c was paid for No.1 northern. Following were closing wheat quotations to-day—September 10:--

No. 1 northern	8;	893	911	891-80
No. 2 northern				85-87

Flour-Local flour shipments since Jan. 1 amount to 4,657,275 barrels, against 4,391,570 barrels, during the same time in 1890 and 3,488, 102 in 1889. Quoted at \$4.80 to \$5.20 for first patents; \$1.60 to \$4.85 for second patents; \$4.25 to 4.75 for faucy and export bakers; \$1.80 to 2.50 for low grades, in bags, including red dog. The depression in wheat caused a dull flour market. Buyers of patents in this country held out of the market excepting to supply current wants, and then asked for lower figures to correspond with the decline in wheat. Considerable concession was understood to be given, and the claim was that there were millers that cut deeper than was generally known of. Bakers and low grades were in de-

# Weekly Weather and Crop Report.

The weather was generally very favorable to harvesting. Until towards the close of the week, the weather was clear and warm. On Frid ay the record was broken by some heavy local rains, followed by brisk cool, wind, and part cloudy weather. Cutting was about fluished except in the later districts. Stacking progressed actively, with some threshing, in

the earlier sections. East and north of Winnipeg there were districts where probably one-third of the crop was uncut at the commencement of the week, and west of Moosomin, in Assinibola territory, the crops were generally later than in Manitoba. The latter district is believed to have pretty well escaped frost this year, during the cool dips, so that notwith-standing the lateness of the crops, they will come through all right, and are very heavy. The close of the week, however, would see the cutting just about wound up all over the country, except a few very late fields here and there, which cannot be counted upon for very much.
