

# "Safford Radiators"

YOU CAN'T DOUBT IT.

IT'S not "hear say" but straight, existing evidence. It's before your eyes at every turn. The "Safford Radiator"—the most successful heater of the age. It has been acknowledged such by your countrymen, by builders of every country. You can't doubt it's superiority.

## POINTS.

And why is the "Safford" Radiator so popular? Because the "Safford" is a positively non-leakable radiator without bolts or packing. It is unique in construction, graceful in decoration and design. Non-leakable, that's the great point—a simple screwed-pipe connection, no red lead, no bolts nor packing. The heat circulates evenly and immediately because all this ensures a free passage.

Send for a free booklet about our Radiators.

You don't need to experiment, the world has done that for you.

## THE DOMINION RADIATOR CO.,

LIMITED.

HEAD OFFICE AND WORKS,

TORONTO, - - CANADA.

The "Ionic Capital" has in place of the square abacus of the Doric order a scroll rolled in on both sides by means of large volutes, the spaces between being decorated with leaves and egg and dart mouldings, sometimes a neck may be added below the scrolls. This Capital has two distinct faces and two sides. The shaft is nearly always fluted.
