

CHAPTER II.

THE RECORD BY PROVINCES.

	PAGE.
The Record by Provinces as distinguished from the Dominion Record—year 1878.....	7-16

TABLE A.

Comparison between the sums of the Differences	16
--	----

CHAPTER III.

The Relation between Bernoulli's Column IV, and the Differences between Cotton and Woollen "Imports" and "Exports for Home Consumption," for the year 1878, and the Mathematical Formula shewing their origin.....	17-18
The Sums of the Final Differences for Cottons and Woollens in Table A, in terms of Bernoulli's Column IV.....	18
THE MATHEMATICAL FORMULA	18
Illustration of the United States Fish Trade Figures in detail, with Denominations in the form of the larger quantities being sums of the smaller quantities.....	20

CHAPTER IV.

THE CANADIAN TRADE TABLES OF 1883.

Provincial and Dominion Differences	22
---	----

TABLE B.—1883.

Comparison between the Sums of the Differences	23
--	----

CHAPTER V.

THE CANADIAN TRADE TABLES OF 1885.

The Provincial and Dominion Differences for Cottons and Woollens.....	25
The First Order of Differences for Cottons in the form of an Arithmetical Progression,—	
1st—with 10 as a common difference	27
2d—" 100 "	28
3d—" 1000 "	28
The First Order of Differences for Woollens in the form of an Arithmetical Progression with 100 as a Common Difference.....	29
Table showing that the larger terms of the First Order of Differences for Woollens are sums of the smaller terms	30
Table showing that the larger terms of the First Order of Differences for Cottons are sums of the smaller terms	31
Table showing that the First Order of Differences for Cottons are the equivalents of the terms of the "Fire-brick and Clay" Series	32

TABLE C.

Comparison between the Sums of the Differences	32
--	----

CHAPTER VI.

The wonderful accuracy of the Figures in the United States and Canadian Trade Tables	31
The alleged Custom House Entries for the year 1878, 1883 and 1885, in the form of an endless Arithmetical Progression	33
The Equivalent Canadian Differences for 1878, 1883, and 1885, in terms of Dr. Edward Young's Fish Trade Figures, taken from the United States Commerce and Navigation Report for 1873	36-37
The Fire-brick and Clay Series in Terms of Bernoulli's Columns, Nos. III and IV.....	38
A Mathematical Formula for obtaining any desirable Ratio between two Series	39
A general Mathematical Expression for the terms of any one of the vertical columns in Bernoulli's Table	39
A Mathematical Process for converting Bernoulli's Formula into the "Differential Method" of expressing the Sum of a Series	40
A STATEMENT AND CONCLUSION.....	41

ERRATA.

- Table 1.—In the Formula for Bernoulli's 8th Property instead of 2^h read 2^{h-1}
Page 4.—Second line from bottom, for Chapter II read Chapter III.
" 5.—15 lines from bottom after the words "of Differences" insert "with their signs changed."
" 7.—12 lines from top, for "at the end of this Chapter" read "in Chapter III."
" 18.—In Section III for 16 read 10.
" 18.—7 lines from bottom omit "... "A +"
" 28.—27 lines from bottom, for 1875 read 1885.
