

His Most Excellent Majesty

WILLIAM III.

King of Great Britain &c.

21 A

**T**he account of the greatest  
Discovery that has been  
made in this Age, of several  
Large Countries, situate between  
the Passage to the New Mexico, I make  
bold humbly to dedicate to your Ma-  
jesty. Having lived Eleven Years in  
the Northern America, I have had an  
Opportunity to penetrate farther into  
that Unknown Continent than any  
before me, wherein I have discover'd  
New Countries, which may be justly  
call'd the Light of that New World.
