

HEARD

In order to meet the growing demand for our Gas Machine in the Dominion of Canada, we have established a factory in Windsor, Ont., where we shall manufacture machines of all sizes, with all of our late improvements, at prices that will enable our Canadian friends to light WITH GAS their Residence, Church, Store, Opera House, Mill, Hotel, Factory, or ANY place requiring artificial light, with a FIRST CLASS MACHINE at a SMALL COST.

We trust that our long experience in the business, and our record of nearly 4,000 machines in successful operation in all parts of this country, will be a sufficient guarantee that what we promise will be faithfully carried out.

For full particulars in reference to the machine, cost, etc., address,

The Combination Gas Machine Co.

DETROIT, MICH.

JAS. H. MASON,

- -

Sec'y and Treas.
