

Cold-Store Your Furs Within Easy Reach

The original wearers of all furs came from cold climates. The colder the country the finer the furs. In consequence of this knowledge progressive people years ago began summering over their goods of this class in cold storage. Furs have been demonstrated in every case to wear longer and keep brighter than when rolled in camphor and packed in a trunk in the good old-fashioned way.

We have ample accommodation of the latest type. We can keep your valuables according to this modern adaption of nature's way at moderate cost. Insured against moth, fire and theft, and removeable for temporary use at any time without the chance of any moth mixture making your presence unbearable.

Phone 1024, Main, and we'll talk it over; or, call at the Office and be shown our room.

The Standard Syndicate

By ANNIE HINRICHSSEN

(Copyright, 1933, by Associated Literary Press.)

"Mr. Harrington wears a broad-brimmed felt hat and a white lawn tie, and dresses almost as well as if he had a good tailor. He wears his hair a la Samson before he met Delilah. Without it he couldn't make a speech. In solemn pauses he sweeps it off his noble brow. In frenzied moments he clutches it wildly and fery eloquence results. The distinguished young Southern congressman has struck a happy medium between a sophomore and a Fourth of July orator. He has the profundity, the all-wise, know-it-all of the college student and the cheap wit, stale stories, I-work-to-please-the-public manner of the Independence day speaker."

Mr. Harrington read the article several times. He was accustomed to reading about himself, but in this sketch was a personal ridicule which at once amused and stung him. It had been cut from a provincial paper by a clipping bureau. It was not signed, but under the heading, "News from Washington," were the words, "Copyright by the Standard Syndicate."

That night Mr. Harrington visited a barber, and was properly shorn. A factious young man, named Samson, had met Delilah and a battle followed. The factious young man was badly beaten and the hot-tempered congressman somewhat disfigured. The bureau sent another clipping from the Standard Syndicate's News, Washington.

"Mr. Harrington refuses to discuss his black eye, but a story is being told concerning the cause of it. There are several applicants for Mr. Harrington's seat in Congress and he is making strenuous efforts to strengthen himself with the leaders of his party in his district, many of whom are old Confederate soldiers. At the Army and Navy club a few days ago, Mr. Harrington confided to an ex-Confederate colonel his intention of introducing a bill pensioning the soldiers who fought under Jefferson and Davis. The ex-Confederate soldier resented Mr. Harrington's proposed legislation as an insult to the youth and proceeded to shove Mr. Harrington's friends, regret that in his eagerness to make a grandstand play he has shown so little political shrewdness."

The congressman swore picturesque and called his secretary.

"Smith," he thundered, "wire the editor of that paper for the address of the Standard Syndicate and the name of the person who writes the 'News from Washington.'"

The editor's reply came, "Standard Syndicate, Washington, D. C., H. W. Carleton, president. Don't know who writes 'News from Washington.'"

The city directory did not contain the name of the Standard Syndicate nor of H. W. Carleton, and at the post office the clerk did not know the address. The mail for the syndicate was placed in a lock box. The clerk did not know who called for it.

One morning the congressman read in the "News from Washington," "Mr. Harrington is a most chivalrous gentleman. It is said that he has promised his fair constituents to introduce and secure the free distribution of hairpins and violet perfume. Will such a measure tend to curtail our supply of free government seeds? If so, we should give the matter serious consideration. A new issue may confront us and result in the formation of two new parties: the hairpin perfume party and the seed party. We call the attention of statesmen and thinkers to this proposed bill of Mr. Harrington's."

As the wrathful congressman finished the article his secretary entered the room.

"I've found the Standard Syndicate," he announced triumphantly. "Tracked them down at last. Their address is on the sidewalk. I picked it up and the address was 'The Standard Syndicate.'"

"I followed her and she went to the Cairo. The elevator boy told me her

name was Carleton and gave me the number of her suite. She's probably the daughter or sister of H. W. Carleton. The elevator boy didn't know about him."

"Mr. Harrington went to the Cairo. From the elevator he walked rapidly down the corridor to the door of the Carleton suite. He pressed the electric button and took a tighter grip on his riding whip."

"The door opened and a girl in street dress stood before him."

"Miss Carleton?"

"Yes."

"Is Mr. Carleton in?"

"No, he's not in."

"Where is he?"

"I don't know."

"Is he out of the city?"

"Yes."

"Who manages the Standard Syndicate in his absence?"

"She shook her head."

"Can you tell me anything about the company?"

"There is nothing to tell."

"Who is their Washington correspondent?"

"She looked at the whip in his hand and laughed."

"If you will come when Mr. Carleton is in," she said, "he will tell you all you wish to know."

The friendly smile in her voice dispelled his irritation.

"When will he be here?" he asked.

"She hesitated a moment. 'His habits are irregular. He may be here any time. He is never gone long.'"

FORCEFUL REFORMS OF CIVIL SERVICE BEGUN

Judge Cassells to Investigate Marine Department Immediately

Three Prominent Officials Already Suspended and More to Follow—Government Will Prepare a Bill Reorganizing Service.

OTTAWA, April 1.—The announcement of government action on the civil service commission was made today to the commonsense by the Prime Minister. As was anticipated the government has acted promptly and vigorously. Already three prominent officials in the marine and fisheries department have been suspended and the resignation of the deputy minister has been submitted. To inquire into the honesty of other officials a royal commission has been appointed consisting of Hon. J. W. Cassells, the recently appointed judge of the exchequer court and one of the most eminent and reputable lawyers in Canada.

In the meantime Dr. Lewis introduced a bill to amend the criminal code clauses respecting injuries to persons caused by motor vehicles. It proposes to make owners or persons in charge of such vehicles responsible for bodily injuries due to horses being frightened by them and liable to imprisonment.

Speaking to the motion, Mr. Lewis said there was a growing feeling in rural districts because of the increased number of accidents due to automobiles, and some action by the government was necessary. The bill was read a first time.

The government announcement came early in the day.

Sir Wilfrid Laurier said: "Before the orders of the day are proceeded with it is my duty to inform the House what action has been taken by the government on the report of the civil service commission. The House is aware that on two previous occasions I stated that the report is so far as it concerned the department of marine and fisheries called for consideration by the government. My own friend who is in charge of that department has been engaged for some time, as far as his other duties will permit him, in investigating his department so as to determine in what respect it could be reformed. In the discharge of that duty one of the officers of that department was suspended by him some weeks ago. Since the report of the commission has been laid on the table my colleague has come to the conclusion that he should also put under suspension two other prominent officials."

U. Gregory, agent of the marine department at Quebec, and J. F. Fraser, commissioner of lights, Ottawa.

"It is only just to the Deputy Minister of that department that I should say in this connection that on two previous occasions he tendered his resignation to the Minister, and this morning again pressed his resignation."

"Do you think I care what you wrote about me?" he asked indignantly. "Is my vanity as great as that?"

"But I care—dreadfully. I have not written any more nasty things about you—I've praised you as much as the caters have. But I couldn't tell you. Her voice broke and her eyes were full of tears. "Don't be angry with me. Can't you forgive me?"

"I can—on conditions."

"What are they?"

"The Standard Syndicate goes out of business and I, Mr. Carleton, devote my time to criticising me—but not on paper."

Miss Carleton gathered up her envelopes and dropped them into the open fire and laid the mimeograph on them. She then turned to Harrington and held out her hands.

"The Standard Syndicate has gone out of business," she said.

and that matter is in the hands of the Minister for consideration.

"The house is aware that the report of the commission made certain very grave statements with regard to the honesty of the officials in that department. The matter is of such a serious character that the minister did not think it advisable for him to deal with that part of the report, but he has thought it advisable to recommend that a royal commission should be issued to deal with that part of the report. It has pleased the administration and the government to accede to this view and to appoint as commissioner Mr. Walter Cassells, judge of the exchequer court of Canada."

"Now the report is a very broad and general one. I may simply remind the house that last year the government, being aware that the civil service commission was one which engrossed the attention of the country generally, thought it advisable to appoint a commission of men whom they had reason to believe to be absolutely impartial and disinterested to look over this question and give them the benefit of their views. The house is aware that this commission has made a report which is pretty general and broad. It is the intention of the government to deal as soon as possible with their views on the question brought to the attention of the country in the past few months. At all events it is the intention of the government to proceed as far as possible to give very far, having sat now for something like four months to the consideration of the report, and to get to the blessing of a prerogative, if such a thing can be effected during the year 1933. At all events it is the intention of the government to proceed as far as possible as it is possible to do during the present session."

"There is the broad question of civil service reform as it is generally understood, I understand that the commission have made a general recommendation upon this point, though so far as I am concerned I say that I have had no opportunity to read the report except as I have seen it in the newspapers, but there is this general recommendation on this line."

"But everybody has noticed that while the members of the commission have made a recommendation on this line they have not embodied their views in the shape of a bill, as they did on the question of superannuation. For instance, they have brought forward more specification than this may require for the determination of a bill to be prepared on this line. All I have to say at this moment is that it is the intention of the government to deal with the question and all the questions brought up by the report of the commission as speedily as it is possible to do."

Mr. Borden asked if the commission was to deal with the department generally or solely with matters advanced by the civil service commission. He also wished to know if the government had come to the conclusion as a matter of policy in regard to civil service reform that they would adopt the system of competitive examination by an independent commission.

Sir Wilfrid replied that the best answer to first question would be to bring down an order-in-council appointing a royal commission, which would be done. As to the question of civil service reform it would be preferable before the government made a pronouncement to the House that members should have before them prior copies of the civil service commission's report.

To a query by Mr. Monk the Prime Minister stated that all memoranda and documents given by the commission to the government had been laid on the table.
