No. 44

HOW ABOUT YOUR WINTER UNDERWEAR

Don't loose sight of the fact that we have the largest variety in town.

LADIES' WINTER COATS just received.

Then there's our range of DRESS SKIRTS; they are pretty hard to beat in quality and price.

Golf Jackets, Norfolks, Etc.

CORSETS A SPECIALTY. You cannot help being suited.

A large assortment of SHIRTWAISTS; white and colored

BARGAINS IN BOOTS AND SHOES

J. SUTTON CLARK

St. George, N. B.

R. A. BURR, Eastport

Has a full line of Musical Instruments. Agent for Edison Phonograph and Victor Talking Machine. Full list of Records

although the excitement which it has created is believed to have resulted in somewhat lessening the extent of the illegal operations, the business still flourishes. Several captures have been made lately, but in none of them, although complicity in the organized system was suspected, was it possible to obtain evidence pointing to more than petty cases. The livery dealers among the border villages are cautious as to whom they let their outfits to, as several of them have been confiscated within a short time.

Drastic Measures to Check Smuggling at Border Towns

A Calais despatch of Nov. 2 to the Boston Transcript says: Incited to drastic measures by the extensive smuggling operations which have baffled the inspectors for the past several months, the United States customs department has issued a regulation to its agents along the Canadian border station- ed in this vicinity, by which the latter are ordered to examine all street railway cars running between points in the United States and Canada, on their return from the Canadian side of the line. It is believed that the orders received here are copies of general orders sent to all the inspectors on the Canadian border line.

The residents of the border towns do not take kindly to the search, and the officers are meeting with much trouble in the fulfillment of their orders. It means much additional duty to them, and as yet no extra men have been detailed to assist them in carrying out the new regulation. The smuggling has been known to be going on for some time, but the combined efforts of both the American and Canadian inspectors have failed to apprehend the contraband carriers, and

Making Paper From Peat in Norway.

Washington, Nov. 4.—The peat bog furnishes the latest substitute for wood in the manufacture of paper. Paper making from peat on a commercial scale has already begun in Sweden, where a company, capitalized at more than \$1,000,000 has made extensive purchases of peat bogs and prepared plans for the erection of mills for turning out wrapping paper

and pasteboard. The money for the enterprises comes largely from London, but the process by which the vegetable fibre of the peat will be converted into paper is covered by an American patent. An account of the successful launching of the enterprise is given in a report of United States Consul R. S. S. Bergh, of Gothenburg, Sweden.

It is claimed that a ton of paper worth \$30 can be made from peat at a total cost of \$15, thus leaving a satisfactory margin of profit. It is further claimed that it takes only two hours to convert the peat into paper. It should not, however, be expected that peat as a material for paper making can take the place of wood pulp for all purposes: If it helps to meet the demand for the coarser grades of paper and thus relieves the pressure upon the timber supply it will do a great deal for the forests of the United States.

The quantity of peat in the world is enormous. It exists in all the countries of northern Europe and has been used as fuel for centuries. Deposits from ten to fifty feet deep and many miles in extent are not unusual. Siberia has thousands of square miles of peat, and much exists in the United States and Canada. It is a vegetable substance, deposited by slow accumulations during thousands of years the process being similar to that by which coal was formed.

Many good qualities have been claimed for paper made from peat. It is said that an article wrapped in it will not be attacked by moths, and for that reason it is assured to be peculiarly fitted for boxes

and bags for storing furs and woolen clothing. It is further claimed that a process of bleaching will give the paper a snow-white color, and thus make it equal to the best pulp papers for printing purposes, but this claim does not appear to have been established by actual tests on a commercial scale. Wrapping papers, cartboards and paper boxes made from peat possesses greater strength than similar articles made from straw.

Influences of Happy Childhood

The memory of early happiness is a treasure-house of sweet comforts. Its pure, simple, earnest joys become wells to draw from whenever we sit down in dejection and weariness by the dusty highway of life. Of this one good, the world can never defraud us. The sunshine in those days reaches across our little stretch of life, and mingles its rays with those that beam from the heaven of our hope.

The actual present of the adult life, and the materials which enter into it, are made up, more than we generally suppose, of reminiscence. We ruminate like the kine. We lay up in the receptacles of memory abundance of undigested material that we recall and appropriate to our refreshment and nourishment; and this process of reminiscence, of living over again, grows upon us as we grow into years, until at last it becomes our all. Behaunted, power has no resource but to dwell upon its old play and its old achievements. How sad he is who can never go back to his childhood without

a period when his life was filled with a sweet and simple satisfaction, when a kind and loving mother read aloud to the family, the Home Reading department from the columns of this paper.

For high class Watch and Jewelry Repairing go to R. A. BURR, 82 Water Street, Eastport

said he, "and away flew a wild duck; and, begorra, when I looked inside, there was a nest with four eggs, and she had been after sitting on that nest."

Forced Upon Him.

Very few persons acquit themselves nobly in their first speech. At a wedding feast recently, says a writer in the Philadelphia Public Ledger, the bridegroom was called upon, as usual, to respond to the given toast, in spite of the fact that he had previously pleaded to be excused. Blushing to the roots of his hair, he rose to his feet. He intended to imply that he was unprepared for speech-making; but he unfortunately placed his hand upon the bride's shoulder, and looked down at her as he stammered out his opening and concluding words: "This—er—thing has been forced upon me."

A FISH STORY.

A story was told by Lord Claud Hamilton at a dinner of the Fly Fisher's Club. An Irishman had caught a big pike. Noting a lump in its stomach, he cut it open. "As I cut it open, there was a mighty rush and a flapping of wings,"

There is a language of umbrellas, as of flowers. For instance, place your umbrella in a rack, and it will often indicate that it will change owners.

To open it quickly in the street means that somebody's eye is going to be in danger.

To shut it quickly signifies that a hat or two will probably be knocked off.

An umbrella carried over a woman the man getting nothing but the drippings of the rain, signifies courtship.

When the man has the umbrella and the woman the drippings, it indicates marriage.

To swing your umbrella over your shoulder signifies "I am making a nuisance of myself."

An Interesting Copper Story

We want you to read

every word of this story. It won't take you long and you will feel well repaid when you have done so.

Copper is today receiving more attention than any other metal, even gold. Copper is the mainstay of industrialism, the metal most clamored for by manufacturers everywhere. The demand far exceeds the supply, and what is more, the most sanguine confess they cannot see when the mines will catch up.

This wonderful demand is what makes copper high. Don't look at the fluctuations of certain defunct copper stocks—look at the price of raw copper (present market price 15c). Think of it—a few years ago copper went begging at half that price.

There is money in copper. Money for the engineer, money for the miner, but more money for the man who has funds to help develop ore-bearing properties. He is the man who gets the big slice. He commands the situation because he holds in his hand the one thing essential to all such work. The lion's share is due him, for he sows his seed, as it

were, and waits patiently for harvest time, taking such risks as are common to all such enterprises.

Some people speak of mining, and particularly the acquisition of mining shares, as risky. Will someone kindly specify just what undertaking in this uncertain world is not a risk. If "taking chances" is gambling then we are all gamblers—even the man who builds a new house, for it may burn down. Your grocer who buys flour at \$5.00 and sells it for \$6.00, makes a profit; if unforeseen circumstances force it below \$5.00 he loses, is he a gambler? So is your friend who trades horses, for he doesn't know what he is getting. The man who builds a new fishing boat or weir gambles on the season. If it is a good one he makes his money—if a failure he is apt to go "broke." Every investment is a gamble in one sense, but is that any reason why we should not attempt to make our money earn dividends?

Conservatism is in many ways a virtue, but when conservatism conflicts with the spirit of growth and progress, one is better without it. Better wear out than rust out. Better die in harness than waiting with folded hands for your ship to come in. How can it return to you with gold unless you load it first with an outgoing cargo?

Great Opportunity

mining stocks if they could but feel that they were buying actual mineral ground, and stood a fair chance of ultimately creating owning such properties, and they do well to hesitate. But when they have a great and unusual opportunity like this, but once in a life time, they should make the most of it.

Arizona and Eastern Copper Co.

30, perhaps one-tenth of the actual value of its property NOW. The company has a clear and perfect title to eight claims, one of the best mineral lands in Riverside mining district, Pinal County, Arizona. The company has no debts, liens or shares of stock at half price, to insure immediate sale, to put it on a good working and dividend-paying basis. These are at

75 CENTS PER SHARE --- par value one dollar

the first year, and may pay big dividends within a short time. Look at the above report of a prominent assayer. The green is his

payment plan that will interest you. Write for booklet and full particulars.

We will not bore you, we will tell you who we are and where you can find us and just how we are progressing. In event of your purchasing even a small amount of stock you will be notified each month just what progress we are making and what our troubles are, if any.

Take some of the money you have saved and put it where it has a chance to earn good dividends. Write

OFFICE OF HENRY CARMICHAEL, PH. D. ASSAYER, ANALYTICAL AND CONSULTING CHEMIST, 12 EXCHANGE STREET, BOSTON.

M. Augustus & Co. v. Certain Copper Co.

Following is my Report of Examination of Ore received Nov. 14, 1907.

1200 pounds of the sample received were assayed as follows:

| SAMPLE | FINE COPPER | | COPPER | FINE SILVER | | GOLD | IRON | LEAD | ZINC | SULFUR | OTHER |
|--------------|-------------|---------|--------|-------------|---------|------|------|------|------|--------|-------|
| | PER CENT | PER TON | | PER CENT | PER TON | | | | | | |
| Green Sample | 11.70 | 3,510 | 11.70 | | | | | | | | |
| Black Sample | 11.60 | 3,700 | 11.60 | | | | | | | | |

Respectfully submitted, Henry Carmichael

sample shows values of \$126.00 per ton, (\$3.00 is paying ore) and as this price you see the profit is enormous. The brown, or poorest surface sample, goes for analysis, write Mr. Henry Carmichael, Boston, (see assay herewith) and he will

\$50 Buys 100 Shares

and you are taking less chances than if you were building a weir or sardine factory or running a newspaper. You will not be able to buy this stock at half price long, you should act at once if you would profit by this information. We have an easy
