### Home Missions.

#### NEW BYE-LAW.

At the last meeting of the Home Mission Board, according to notice given at a previous meeting, the following bye-law was adopted:

8. Any church or group of churches expecting aid from the Board in making up their pastor's salary, must obtain the Board's approval of the man they propose to engage before extending a call or entering into an engagement with him.

Art. 9, which now becomes Art. 10, was amended by the addition of a clause relating to grouping, and will now read as follows:

10. Any church or group of churches asking aid from the Board will be required: (1) To adopt the plan of grouping approved by the Board and the District meeting for the District in which the churches are located; (2) To follow the advice of the Board and the District Committee if, after careful examination, it should be thought best for the interest of our cause that two or more of the weak churches should unite in one organization; (3) To contribute at the rate of not less than \$1 per resident member, for the support of their pastor, except where they can give satisfactory evidence of their inability to do so. When the church has a parsonage it shall be counted as \$50 on the above amount; (4) To follow the advice of the Board as to the way in which the labors of the missionary pastor shall be divided.

The need of these amendments have become very manifest to the Board and it is hoped they will enable the Board to more thoroughly safeguard our Home Mission work.

Messrs. Kynochs, of Birmingham, have for some time past been engaged in perfecting the mechanism of a new quick-firing gun, and they have succeeded in producing a weapon a long way ahead of any other gun of a similar type. By turning a wheel the whole mechanism is set working, and six hundred magazine bullets are discharged per minute. The gun, which only weighs a hundred weight, is single harrelled, and while in action is kept cool by a water-jacket which is filled automatically. The firing action is supplied with cartridges by an endless belt which passes through a box and collects the cartridges. The gun will kill at three miles, and as the harrel is made to swing from right to left it will probably prove to be one of the most deadly weapons of modern warfare.
