RAISING A CAPITAL.

About fifty years back, two young fellows, brothers, went to Jamaica; they were by trade blacksmiths. Finding, soon after their arrival, that they could do nothing without a little money to begin with, but that with £20 or £70 they might be able to realise a fortune, they hit upon the following novel and ingenious expedient. One of them stripped the other naked, shaved him close, and blackened him from head to foot. This ceremony being performed, he took him to one of the negro dealers, who was so pleased with the appearance of the young fellow, that he advanced £50 currency upon the bill of sale; and priced himself much upon the purchase, supposing him the finest negro on the island. The same evening this manufactured negro made his escape to his brother, washed himself clean, and resumed his former appearance. Rewards were then in vain offered in handbills, pursuit was eluded, and discovery, by care and precaution, rendered impracticable. The brothers with the money commenced business, and actually returned to England, not many years since, with a fortune of £20,000. Previous, however, to their departure from the island, they waited upon the gentleman from whom they had received the money, and recalling the circumstance of the negro to his recollection, paid him the principal and interest with thanks.

Earl Dufferin arrived at Quebec, 1872.					
5th after Trinity.					
Coronation of Queen Victoria, 1838.					
Source of Nile discovered by Baker, 1868.					

CURIOUS MODE OF BARTER.

At Temenhint, in Northern Africa, the inhabitants have a curious mode of barter. The person who has any goods to sell mentions what he wishes to exchange for certain commodities, whether oil, liquid, butter, or shahm, which is a kind of salted fat, much resembling bad tallow in taste and smell. If liquids, he pours water into a pot, in proportion to the quantity of oil or butter he requires: if solid, he brings a stone of the size of the shahm or other article demanded. The buyer pours out water, or sends for smaller stones until he thinks a fair equivalent is offered. The quantities then agreed for are made up to the size of the stone or the depth of the water.

Salve for Horses, &c.—The best Healing compound ever discovered for the perfect and rapid cure of Wounds, Sores, Cuts, Bruises, &c., in Horses or Cattle is the Carbolic Salve, described in full on page 12: the parts affected need only to be carefully washed with Carbolic Soap and warm water, then apply the Salve, when the healing process immediately commences and is rapidly completed.—For washing Horses, Cattle, or Dogs, the Carbolic Soap is proved to be superior to Castile or any other kind.—Both these articles, the Victoria Carbolic Salve and Victoria Carbolic Soap, are kept by every Druggist in the Country.

The Electric Lintment, described fully on page 12, is a sovereign preparation for the quick Relief and Cure of Rheumatism, Sprains, Bruises, and of every distention of the Limbs or Sinews. It is equally a standard Medicine for Horses and Cattle.
