

### STEAM SHOVELS WORKING IN MINNESOTA IRON MINES

## Big Fortunes Are Being Made In Minnesota Iron Lands

Yes. Not only big fortunes but little ones. The smaller people are getting a "show" at the great profits. Farmers, merchants, and others who have money in the iron-bearing lands of Crow Wing County, Minnesota, are getting profits in cash that exceed their fondest hopes. These iron-bearing lands are money makers for those who take out ore. They are situated in the Cuyuna Iron Range which lies along the Northern Pacific Railroad between Deerwood and Brainerd.

### End of Ore in Some Old Sections

Although \$1,500,000 in dividends were distributed this year to the stockholders of only one company in Northern Minnesota, still the indications are that the iron-ore in older sections is getting scarcer and scarcer every year. New mines will have to be opened in greater numbers than before in other sections.

### Your Opportunity—Our Proposition

This then is your opportunity. Many consider it the chance of a lifetime. We control a quantity of iron-bearing land in Township 46, Range 28, Crow Wing County, Minnesota. It is but 36 miles from Deerwood, a town on the

Northern Pacific Railroad between Duluth and Brainerd.

### A Rich Strike Nearby

A short distance North of this property a prominent ore company has sunk a shaft and is now mining. In every direction drills have disclosed valuable finds of iron ore. Within 80 rods of this land drills have blotted out forty million tons of iron ore. The above ore company referred to has offered to supply us with money and take half the profits. We prefer, however, to develop it ourselves and divide the profits among those who invest with us in this valuable land. Consequently, we believe it will be an excellent opportunity for you to receive good dividends on your investment.

We are an organized corporation, capital \$150,000. The price per share is \$10.00 each. Our prospectus and other literature give full description of the property with pictures, guarantees, references, map, and everything that it is possible to put on paper which reflects an honest, straight-forward and reliable investment.

A visit to these lands will well repay you. Send for above prospectus quick, and ask us any questions if you feel inclined to. We will give you an honest, straight-forward answer.

THE BINDER TWINE SOLD IN CANADA IN 1907 WAS  
DEERING McCORMICK AND INTERNATIONAL BRANDS

FIFTY per cent of the binder twine used in Canada for the 1907 harvest was Deering, McCormick and International twine. Why? Because these brands give such universal satisfaction that farmers depend upon them. Farmers who use short length and imperfect twine during one season will profit by their mistake and see to it that they get a brand which has full length, full strength, and evenness of strand to recommend it.

Are you one of the farmers who use short length twine last year? If you are you did not buy Deering, McCormick or International twine, for these twines are always full length, full strength, and comply with the requirements of the government inspectors.

This is the reason for the grow-

ing increase in the use of Deering, McCormick and International twine. These brands are guaranteed to stand a breaking test of 50 to 85 pounds, and to have average lengths as follows:

Sisal,	500 feet per pound
Standard,	500 " " "
Manila,	600 " " "
Pure Manila,	650 " " "

These brands of twine are also remarkably free from swells and bunches of tow; a comparison with other brands will convince you of this.

It will pay you to call on the local dealer and inspect these brands of twine before making a purchase. Or write to the nearest branch house for further information.
