THE FARMER'S ADVOCATE.

GOSSIP. CAPTAIN ROBSON'S SHORTHORNS.

The noted Spring Grove herd of Captain T. E. Robson, of Ilderton, Ont., recently inspected by a representative of the "Farmer's Advocate," was found, as usual, full of good things and, under the efficient care of the yeteran berdsman, Harry Coultham, in excellent condition. The herd at present numbers about fifty head, half a score of which are imported animals, while their produce and the balance of the herd represent such popular Scotch-bred families as Orange Blossoms, Levenders, Broad-hooks, Duchesses of Gloster, Village Girls, Wimples, Rosebuds, Buchan Lassies and Minas, headed by the grand imported two-year-old Bruce Mayflower hull, Prince Sunbeam, bred at Heatherwick, a rich roan, sired by Prince of Archers, a son of the noted Scottish Archer and halfbrother of the champion Marengo. Prince Sunbeam is a typical Scotch Shorthorn. low-set, thick-fleshed, substantial, symmetrical, full of quality, with a model bead and horns, the swinging walk of one apparently conscious of superior individuality, and a fitting follower of the noted sizes that have preceded him in the berd, which is certainly saying a good deal, for lew herds, if any, on this con-tinent have had the benefits of the services of such a list of championshipwinning and high-priced bulls as this. In confirmation of the latter statement, it is only necessary to recite the names of Nomineo, Moneyfuffel Lad, Topsman, Vallant and Imp. Wanderer's Last, the latter sold for \$2,005 after his form of service, and the former four winners for five years in succession of the champion-ship at Toronto, Canada's greatest show, while the first open hard pitze was also won by the Spring Grove herd three years in succession in the last five years at the same show, and the first prise for a young herd twice in the last three years. The reputation of this herd, therefore, rests not on the performances of remote ancestors, but on recent and up-to-date records. While all the noted sires above named have left their impress on the hard for good, Wanderer's Last, as one would expect from the char-acter of his breading and personality, has stamped his offspring with the signet seal of both good breeding and individund merit. Unfortunately for the herd, the bulk of his get here are bulls, but that will be in the favor of those fortunate enough to secure them, for seldom is seen such uniform type, character and quality of a high order as in the bull calves at Spring Grove, which we predict will make it, very interesting at the shows this year unless the competition is a good deal stronger than usual.

Among the many choice things in the list of females, only a few of which can be named in the allotted space, is the sweet three-year-old, Duthie-bred, im-ported Jealous Girl, of the Cruickshank J. tribe, and sired by Bapton Conqueror. She is interesting, not only for her own character, breedy-looking, strong-backed and full of quality, but also as being the dam of perhaps the best of the sons of Wanderer's Last in the lot of bull calves. a rich roan, now about nine months old. Another that is notable for the same reasons is Sittyton Lavender 9th, a roan three-year-old, also bred by Mr. Duthie, and sired by Silver Plate. She is individually excellent, and has a capital roan son of Wanderer's Last tugging at her teats. Imp. Lavender Thyme 7th, a roan three-year-old, hursing a nice roan calf, is another of the same sterling Sittyton sort, and a good one, as is her calf. A handsome, breedy-looking young cow is the red three-year-old imported Scottish Rose, of the Kinellar Rosebud tribe, sired by Lovat Champion, and with a nice red bull calf at foot. Warden Blossom, a red four-year-old, by Knight of Weldon, and her dam by the noted Gay Monarch, head of the champion herd at the World's Fair, Chicage, is a Cruickshank Orange Blossom, low, level and thick-fleshed. and having a good red heifer calf at her side. Imp. Strawberry 4th, a light roan four-year-old Sittyton Secret, by Fopsman (63447), by Gravesend, is of excellent type and character, and due to calve this month. The red yearling

(Continued on page 614.)
