

General Intelligence.

Domestic.

His Excellency Sir J. Gaspard Le Marchant and suite returned from his excursion to the Shore Counties, in H. M. S. Argus, Com. Parvis, on Monday. It appears that there was some mistake respecting the time His Excellency would arrive at Liverpool, and he took the inhabitants by surprise: he arrived at 10 o'clock in the morning instead of one, as expected.

THE LAKES.—In the number of "The Canadian Journal," of Toronto for July, which is an agriculture and in mechanical progress "flattering himself that the Exhibition (Industrial) would have a good tendency on all the industrial pursuits of the Province, especially if numerously attended by persons from every County."

THE COLUMBIAN AND GREAT WEST, published at Cincinnati, copies our remarks on the Reciprocity Treaty, and introduces it in this way:—"As a specimen of this class of Canadian sentiment, we append a few extracts from the Halifax Morning Journal."

Mr. John Bull had said that Halifax was in Canada we might have excused his ignorance, but for Brother Jonathan to commit such a blunder is unpardonable.—Journal.

ABOYLE, Aug. 25, 1854.—On Sunday night last during a terrific thunder storm, the house of Mr. John Spence, senr., of this place, was struck by lightning. The glass of two whole windows in a perpendicular line, was knocked out and smashed. Stud, boards and rafters adjacent were shattered to fragments; and splinters, nails, wall paper, &c., &c., were profusely and furiously hurled around the kitchen. Provisionally the family were at the time in bed, which is probably the safest place within the walls of a house during a thunder storm when there is danger from the electric fluid.—Com. Yarmouth Herald.

THE TRIAL OF N. H. MARIN, at Sydney, occupied the Court eight entire days. The jury after some hours deliberation, pronounced the prisoner not guilty, on the ground of insanity. At last accounts he was still detained in custody, awaiting the decision of the court as to his future disposal, in consideration of the ground of his acquittal.—Colonist.

WE are sorry to learn that unmistakable evidence of disease, in the growing crop of Potatoes, has appeared in some sections of the country.—We hope, however, that the evil is but partial.—C. B. News.

New Brunswick.

OUR NEW GOVERNOR.—The Honorable Henry Thomas Manders-Sutton, is second son of the late Viscount Canterbury, who was Speaker of the House of Commons from 1817 to 1834, and in 1835 was raised to the Peerage as Baron Battersford and Viscount Canterbury. He was born on the 27th May, 1814, and was married on the 5th July, to Georgiana, youngest daughter of Charles Tompson, Esq., of Wincoburn, in the County of Norfolk, by whom he has several children. He is now in his 40th year. Mr. Manders-Sutton has been in Parliament, and was at one time Under Secretary of State for the Home Department. He is stated to be a man of decided ability, and to possess much of that extraordinary business talent for which his father was so celebrated.—N.B.R.

WE are gratified to learn that the Common Council have in contemplation to close the literary establishments in this City on the Lord's day. An order was passed at the last meeting directing the By-Law Committee to prepare forthwith the draft of an ordinance on the subject; and we may therefore look forward to a speedy suppression of an evil which has long been a reproach to our city.—Chambers Witness.

THE CHOLERA is rapidly disappearing from our midst. On Sunday morning only two deaths were reported in the City for the 24th hour, and up to 10 o'clock yesterday morning but five deaths took place in the City, and five in Portland, from all causes. Not a single death was reported in the city subsequently. The panic has happily subsided, people are returning to their homes, and business is beginning to "look up" again.—N.B.R.

THE cholera has made its appearance in Carleton County, and has resulted in three fatal cases; two in Woodstock, and one in Wakefield.

Canada.

IMPORTS OF MONTREAL.—We learn from the Herald that the imports at the port of Montreal for the half year ending July 5, exceeded the imports of the same period last year by \$248,846. The total import for the first six months of 1853 being \$1,725,150, and for the corresponding period in 1854, \$2,073,996.—Among the imports we regret to observe a very great increase in the quantity of wines and spirituous liquors. The total arrival of vessels for the half year was 181, having a tonnage of 46,091, against 105 vessels of 26,978 tons for the same period in 1853. Increase in vessels, 76; in tonnage, 19,933.—Montreal Witness.

CHOLERA PREVENTIVES.—A Toronto paper states that eight persons have been admitted into the Lunatic Asylum, their insanity being brought on by the use of cholera preventives. The manner in which numbers have dragged themselves to prevent cholera is most absurd, exposing them selves to sickness; and the brandy drinkers, to that and sometimes worse than sickness. Where brandy, camphor, and other things have been recommended as cholera preventives, they are intended not to keep off the disease, but to allay the symptoms, when attacked with it, till medical aid can be procured.—J.B.

THE health of Quebec is once more perfect.—Up to Wednesday morning only one burial from cholera, was reported the previous 24 hours, up to yesterday morning.—NONE!

NEWFOUNDLAND.—We are happy to state that letters have been received from H. W. Hoyle, Esq., delegated by the minority of the Assembly, and by the Central Protestant Committee of St. John's, to represent their views on the subject of responsible government and the representation of the Colony to Her Majesty's Government; and to take charge of the petitions of the Protestant inhabitants of the colony to the Queen and both Houses of Parliament on the same subject. Hoyle arrived in Grenock on the 6th July, and proceeded immediately to London.—Up to the 20th, the date of his letters, he had been actively engaged in prosecuting the object of his mission, having had interviews with Sir George Grey, Mr. F. Peel, several members of the House, the Attorney General, the Colonial Secretary, and others interested in the Colonies, and was probably one of the most important and well organized in Canada or the United States; they had their engravers, who could make all their plates, and their printers and signers, all of whom are safely lodged in Montreal jail.

A gentleman from Pittsburg, Mr. Forsyth who is largely engaged in the manufacture of iron, has purchased the valuable bed of ore in the Township of Hull, about five miles from this town. It is his intention to take out the ore and convey it to Pittsburg, in the State of Ohio where it is to be mixed with other kinds of iron ore. This bed is over 50 feet in width; and it is calculated that three millions of tons of pure iron ore can be obtained from it without any extraordinary mining works being constructed. The vast impetus given to the iron trade within the last few years by the large demand for Railway purposes, has brought into repute a great many deposits, which previously had remained unnoticed or considered of little value. The sudden and great extension of the railway system in this Province, will, it is to be hoped, create a manufacturing business out of our own ore, in our own country, and by our own labour. The millions which we pay to the workmen of other countries will then be paid to those of Canada. It is said that iron can be made with profit in Canada, but with the present high prices, and the certainty of a great demand hereafter; we think the experiment might be made without much danger.

THE LAKES.—In the number of "The Canadian Journal," of Toronto for July, which is an agriculture and in mechanical progress "flattering himself that the Exhibition (Industrial) would have a good tendency on all the industrial pursuits of the Province, especially if numerously attended by persons from every County."

From their camp thousands of dollars were every month sent out broad-cast over the land, and hundreds of our young men were led into temptation, and finally to prison and ruin. A correspondent of the Boston Traveller says:—"Since the middle of June it is known that \$10,000 have been issued on the Nashua Bank alone, and sent chiefly to the State of New York, but considerable quantities have been sent into Massachusetts.

THE YOLK, by the extraordinary beauty and finish and fitted to receive a practical eye. I have examined specimens of \$1, \$3, and \$20 of this and other banks, which are executed with singular skill, in the engravings and signatures.

A DARING ROBBERY.—A bold robbery of \$600,000 was committed at the marine Hospital, Portland, on the night of the 9th instant. The keeper was from home and his wife was prevented from raising the alarm by the presence in her room and threats of one of the burglars who accompanied the party. A mob gathered immediately and hunted down the keeper, and then proceeded to wreak vengeance on every Irish shop and shanty as well as every Irishman. Five arms as well as less deadly weapons, were freely used, and numbers were killed, and many more wounded in the fray.—Am. Traveller, Aug. 17.

THE OLEN PRIZES.—The assignment to the University of the copyright of "Greece and the Golden Horn," Dr. Olen's last work—which has been previously announced, was made for the purpose of founding one or more prizes to be called "Olen prizes." The profits to the University on the sales of that book, have already exceeded \$300. When they shall have reached \$500, that will be the basis of the first prize, for superior excellence in English Composition.—Other prizes will be established if the sales of the book furnish the means.—Vt. Chr. Adv.

OUR TRAGEDY UPON A PROTESTANT COLLEGE.—On Thursday afternoon at Mr. A. W. French, a German frat distributor, connected with the Methodist Episcopal Church, was standing on Henderson's wharf, engaged in conversation with a gentleman, a German from a group of men near by, approached and accented him by saying "You are a Methodist preacher?" to which Mr. French replied in the affirmative, whereupon the interrogator said "I'll give you Methodist," at the same moment striking him violently in the face and breast.

THE CHOLERA.—Buffalo, Aug. 17th.—The cholera is making and the weather cool. It is spreading in Niagara and from cholera. It is spreading in Albany, Aug. 17th.—The cholera is disappearing, the disease being confined only in a few cases to those of disolute habits.

WEST INDIES.—The Cholera, we are much pleased to learn, had almost entirely disappeared from Barbados. There were at the latest account, but one case, and that, these were reported to be in the Country.

Late from Europe.

The R. M. Steamer Niagara, now due at this port, had not arrived at the time of our going to press. The latest intelligence we have, therefore, is that embodied in the following telegraphic despatch to the Merchants' Exchange News Room, received on Friday last.

The Mail Steamship Europa arrived at New York this afternoon, English dates to the 12th inst. Consols continued firm at 92½; 92½ Russia consols to evacuate Moldavia. Austrian advances countermanded. The King of Saxony had fallen from his Carriage which resulted in death. Wheat had advanced 4¢ per bushel. Flour market had continued firm but no advance in price since previous dates. Corn in active demand at previous rates. A moderate demand being in Provisions. Sugar firm at a slight advance.

A SECOND DESPATCH.—The subjoined additional despatch was received at the Merchants Exchange Rooms on Friday morning. It contains some items of interest: that portion of it relative to the arming of these transatlantic possessions is of course veiled in mystery. The probable reason may perhaps be found to be, when some details have come to hand, the manner in which the high handed act of destroying Greytown was received on the other side of the water. It is just possible that before existing difficulties are adjusted, there may be a row on this continent as well as in Turkey.—Chron.

Russia consols to evacuate Moldavia. Advance of Austrians is countermanded. The French having failed in the Crimea, also at Asaland, 80,000 Turkish troops have marched into Wallachia. The Sultana muhi of the Danube has been captured by the British forces. Spain remained perfectly quiet. The British Government has chartered ships for the conveyance of arms, stores, &c., to Halifax, N. S., St. John, N. B., Quebec, and the West India Islands. Cholera is increasing at Liverpool.

THE CHOLERA.—Buffalo, Aug. 17th.—The cholera is making and the weather cool. It is spreading in Niagara and from cholera. It is spreading in Albany, Aug. 17th.—The cholera is disappearing, the disease being confined only in a few cases to those of disolute habits.

WEST INDIES.—The Cholera, we are much pleased to learn, had almost entirely disappeared from Barbados. There were at the latest account, but one case, and that, these were reported to be in the Country.

OUR TRAGEDY UPON A PROTESTANT COLLEGE.—On Thursday afternoon at Mr. A. W. French, a German frat distributor, connected with the Methodist Episcopal Church, was standing on Henderson's wharf, engaged in conversation with a gentleman, a German from a group of men near by, approached and accented him by saying "You are a Methodist preacher?" to which Mr. French replied in the affirmative, whereupon the interrogator said "I'll give you Methodist," at the same moment striking him violently in the face and breast.
