London, Oct. 26.—The Mark Lane Express, in its review of the British grain trade during the past week, says: English wheats of good quality and in dry condition advanced 1s 2d. the quantity coming to market in a wretchedly unfit state owing to the continual rains remains unsold. Foreign wheat was held for 6d advance. California carnoes sold at 44s and American red winter at 38s 9d. Maize was firm; mixed American, new crop, quoted at 23s 5d. Oats were strong under the prospect of the Russian exports ceasing; Americans were 2s dearer, 21s being asked for December shipment, with 25s 9d offered. The advance in rye was checked by a liberal American supply. Parley, beans and peas were held for a slight rise. At to-day's market, all staples were dearer. Dry English wheats were scarce and advanced 6d. Foreign wheat also advanced 6d. Maize rose is 6d and flour 6d. Oats, barley and beans were firm.

Curious Form of Dissipation Acquired by a Virginia Boy.

Baltimorr, Oct. 28.—Six-year-old Willie Grant Webb was found insensible from the effects of inhaling the fumes of gasoline on Saturday morning by his mother, Mrs. Joanna Webb, of Hampden, Va. The boy seems to have an uncontrollable desire for that manner of stupefying himself, and if he can elude the watchfulness of his parents will seek to have recourse to his favorite dose. He succeeded in "dosing" himself during the absence of his mother from the house for fifteen minutes. When Mrs. Webb returned and found the boy lying on the floor she pulled him to his feet. He was limp and apparently lifeless. The boy was carried into the house, and the odor of the oil being detected on his breath, a physician was called and administered stimulants, and in a few hours the boy was apparently all right again. Mrs. Webb savs that Willie must have contracted the habit of inhaling the gasoline and discovered its effects while watching her fill the gasoline stove. The fumes affect the boy like liquor or other alcoholic drinks.
