**THE TORONTO DAIRY COMPANY.**  
The first meeting of shareholders of the Toronto dairy company, under the new direction, was held at their office, No. 105 Queen street west, on Wednesday, the 25th inst., at two o'clock, p.m., and directors for the ensuing year were elected. The following gentlemen are the directors:—James Beatty, Jr., M.P., H. Quetton St. John, L. Birney, D. B. Chisholm, and J. B. Birney.  
Other shareholders present were Robert Beatty, Allan Maclean, A. Storey, Homer Dixon, Robert Ireland, A. Storey, John Dixon, Theodore Martens, Charles McMichael and Wm. Britton.  
The following report was submitted to the shareholder:—This company which has been carried on for some years under other management, is now under a new directorate, and it is also intended to extend the operations of the company and to that end, stock has been subscribed already, almost sufficient for the present purposes of the company. The directors have concluded to allow only 200,000 additional shares of stock remaining is designed at present to be held for the benefit of the present subscribers, in case, as it reasonably anticipated, the expectations of the directors are realized as to the success of the enterprise; and in case new capital should be required to extend the farms, increase the number of cows and enlarge the operations of the company.  
Since public notice was given that a change was made in the direction of the company's affairs, efforts were made to obtain silver-lined milk tanks, silver-lined pipes and taps for bottling the milk, as well as procuring glass bottles with glass stoppers for the distribution of the milk. Some delay was occasioned by the difficulty of procuring these articles in this country, some of which could not be had at all here, and had to be obtained from Pittsburgh and New York. The bottles were ultimately procured from the Nova Scotia glass works at New Glasgow, N.S., the first consignment of which to the number of 5000 is now on hand.  
The aim of the directors is to supply citizens with unadulterated clean milk, and to secure the milking and bottling at the farms while done under the immediate management of reliable men, selected by the company and as every bottle will be sealed, customers may confidently take the bottles, satisfied that they contain nothing but pure, fresh milk.  
There is a prospect of being able to enter on the distribution of milk in the bottles, in a very short time, as nearly all the necessary machinery, as well as horses, waggons, crates and wire baskets to hold the bottles, are already obtained. Experienced drivers have also been employed. I may say that machinery of a most satisfactory character for washing the bottles is already placed in the company's premises here, by which every bottle will be thoroughly washed and cleaned before being sent to the farms to be refilled. This I think an important fact, as after purity, cleanliness is a chief object to be secured by the management. To save inconvenience and loss, tickets will be sold to customers, in exchange for which bottles will be delivered in any part of the city, and as required from time to time by the takers.  
The company having secured for Ontario, rights for the bottles to be used, the stoppers or caps and the seal or label, as well as a trade mark and trade design, all of which are patented at Ottawa, they feel that the interest of the stockholders will be protected, they request the public also to beware of imitations, and they warn persons attempting to infringe the company's rights, that they will be prosecuted with the utmost rigor of the law. Being desirous that everything should be satisfactory to our customers, the company will be obliged to any one who will take the trouble to furnish information immediately to the officers of the company of any well grounded grievance, so that steps may be taken promptly to remedy the complaint.  
JAMES BEATTY, JR., President.
