SPRAGUE

I T has churned milk from a farrow cow, on test, in one minute. I test, in one minute.

I will make i etter butter, and butter that will stand more working than that made in a common churn, the grain being coarser.

I will make the hardest kind of butter in the hottest days in August.

ring Jeiedding T works the buttermilk out in one minute,
or Gold
or Organ
and cleanses itself in one minute.

BY the motion of the paddles the air is pumped in at the ends, passes through the cream and is carried off through a tube in the top of the cover. This process cleanses the organ of all unpleasant flavor, and brings the oxygen of the air in contact with the oil in the cream which hardens and turns to butter

TI is driven with cogwheels that set the L paddles in rapid motion, and makes the la-bor so light that a child twelve years old can churn with ease.

These Churns are manufactured at Berwick, N. S., and will be kept constantly on hand after the 30th October, 1875.

Orders strictly attended to. AGENTS WANTED To canvass the Counties of Annapolis, Kings, Hants, Colchester and Pictou. PROPRIETOR,

D. H. SHAW BERWICK, N. S. November 17th, 1875.

Customs Department. OTTAWA, March 5th, 1875. A UTHORIZED Discount on American Invoices, until further notice—9 per cent.

J. JOHNSON, Agricultural.

REFUSE ON THE FARM.

One of the most serious leaks in farming is to be found in the neglect to save and economize what might be called the refuse of a farm. Few farmers have any realizing sense of the value of substances like leaves, weeds, road-scrapings and other similar things when properly worked up into manure. We often see cartloads of rank growths along the sides of the road, that an hour's work would gather, neglected and allowed to stand and die where they grow. How glad the pigs would be to pick over such a mass of green vegetable matter.

The leaves that accumulate in such masses in the woods and along the walls are utterly neglected in many bedding and making a vast quantity of manure. Some farmers excuse them selves, or find an excuse for this neglect. Vp yaying that the leaves serve as mulch for the trees of the forest, and that it would be robbing Peter to pay Paul. That may be true to some extent, but the loss of a thick coating of leaves, now and then, would scarcely make any appreciable difference in the growth of trees, and that is not really the reason that they should give, because it will be found, in nine cases out of ten, that a farmer who neglects to get weads and other vegetable matter into his pig-pen, neglects to clean out ponds and streams that are full of mud and rich with organic deposits, neglects to compost and work over manures, and fails to thrive at farming. The real reason is that of laziness, or the unwillingness to employ a sufficient amount of labor, or to direct that labor with constant watchfulness and skill.—Marsachusetts Ploughman.

To Remove Iron Rust and Stains.—
Wet the spots of iron rust on muslin or white dress goods thoroughly with lemon juice, then lay in the hot sun to dry. Repeat the same if the color is not removed by one application. When dry, rinse in clear cold water. Lemon juice cannot be used on colored goods as it will take out printed colors as well as stains.

Fried Tomatoes is another excellent dish. Slice rather thickly; salt, pepper and roll in flour; then fry brown in butter kept to a boiling heat all the time.

Another good way to prepare tomatoes is to add a little flour and sweet cream to stewed tomatoes, just before dishing them. No crackers or bread are needed; pepper, salt and butter.

To Remove Mildew.—Make a solu.

Those old soakers never lack for agragument. Lately one raplied to a temperance lecturer by the following positions, what effect must it have on the coat of your stomach?"

Danbury has the champion patient boy. He went to a neighbor's house of raup of sour milk. "I haven't any thing but sweet milk;" said the woman pettishly. "I'll wait till it sours," asid the boliging youth sinking into a chair.

A bickering pair of Quakers were lack for agrance lecturer by the following positions, what effect must it have on the coat of your stomach?"
