Mrs. Pearson's Abdominal Supporter.

PATENTED OCTOBER, 1870.

THE attention of the Medical profession is called to the great benefit that has been derived by those who have found it necessary to use the Abdominal Supporter. Its great use has been to those who are suffering from partial Prolapsus Uteri, Ante, or Retroversion of the Uterus, and in Leucorrhœa, depending on those defects: by removing the cause, it quickly cures the discharges. It is also of marked service to persons suffering from a lax, or pendulous state of the abdominal walls, and during pregnancy, it furnishes the much needed support to the Abdomen. A perineal pad can also be attached to the Supporter when required.

The following gentlemen, having tested its value in their practice, kindly allow reference to them as to its excellence and efficiency:—
