Just as mutch as 't kums handy to me to rite *versus* and

**The Spirometer.**

THE INTERNATIONAL THROAT AND LUNG INSTITUTE,  
75 Yonge street, corner King and Toronto. A body of  
French and English physicians are in charge. Great re-  
formation in medical science. The Spirometer, the won-  
derful invention of Dr. M. Souvielle, of Montreal, an  
ex-aide surgeon of the French army, which conveys medi-  
cinal properties direct to the seat of the disease, has  
proved in the leading hospitals of Europe to be indispens-  
able for the cure of catarrh, catarrhal deafness, bronchitis,  
asthma, and lung disease. Dr. Souvielle and a body of  
English and French surgeons and physicians are in charge  
of this, the most scientific institution on this continent.  
We wish country practitioners who have not sufficient  
practice to distinguish the different forms of lung disease  
to bring their patients to our institute, and we will give  
them free advice. This institute has been organized by  
this body of scientific men to place Canada in a position  
to compete on scientific views with any part of Europe,  
and to protect the people from the hands of insignificant  
men. Dr. Souvielle's Spirometer and its preparations  
were invented after long and careful experiments in chem-  
ical analysis and use in hundreds of cases to prove its  
effects. He has the sole right in France, England, the  
United States and Canada. Last year over 2,000 letters  
of thanks were received from all parts of Europe, Canada  
and America for the wonderful cures performed by the  
Spirometer. Hundreds of the leading people of this  
country given as references. Write or call at the Inter-  
national Throat and Lung Institute, 75 Yonge street,  
corner of King, Toronto, and you will be received by  
either of the surgeons. Consultations free to physicians  
and sufferers. Call or write, inclosing stamp for pamphlet  
giving full particulars free.
