Quarterly Dividend Notice

Notice is hereby given that a Dividend at the rate of SIX PER CENT. Per Annum has been declared upon the Paid-up Capital Stock of The Home Bank of Canada for the three months ending 28th February, 1911, and the same will be payable at the Head Office or any Branches of The Home Bank of Canada on and after the 1st March next.

The Transfer Books will be closed from the 15th to the 28th February, 1911, both days inclusive.

By Order of the Board.

JAMES MASON,

Toronto, Jan. 18th, 1911.

General Manager.

WHAT YOU OUGHT TO DO IF HOUSE CATCHES FIRE

Simple Instructions as to Best Course of Conduct If Threatened by Smoke and Flame.

What would YOU do in case of fire in your house, day or night?

Do you know—if you have a telephone—that you should telephone
MAIN 215 to summon the fire department, telling the operator at headquarters very distirctly your street jump. and number?

Mrs. John Farrell, Rose Hill, P.E.I., writes:-"It is with the greatest of pleasure I write you stating the benefit have received by using Milburn's Heart

"About five years ago I suffered greatly from heart trouble, and my nerves were very weak. After seeing severa! doctors and using their medicine, I got no relief until a friend told me of your Heart and Nerve Pills. I took two boxes and they effected a complete cure. I can recom-mend them highly to all nervous and

"I have advised many others to try them and they have all been cured of the same trouble '

The proper action of the nerves, so important to the well-being of the heart, depends entirely upon the general condition of the nervous system. If there be nerve derangement of any kind, it is bound to produce heart derangement.

In Milburn's Heart and Nerve Pills is combined a treatment that will cure all forms of nerv us disorders, as well as act on the heart itself, and in this is the secret of their success in curing so many cases of heart and nerve trouble.

Milburn's Heart and Nerve Pills are soc per box, or 3 for \$1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

a towel or handkerchief, and breathe thru it, so as not to inhale smoke.

Open the window slightly at top and

Open the window slightly at top and bottom.

If the room has filled with smoke before you reach a window, keep close of the control of the co before you reach a window, keep close to the floor, and crawl along by the wall until you reach it.

Do not jump unless the fire behind is scorching you.

scorching you.

Never go to the roof unless as a last and resort, and unless you know there is a means of escape to another build-Do not jump thru flame in a building

without first covering the head with a blanket or heavy clothing, and gauging the distance. Don't get excited-try to recall the means of exit. If any firemen are in sight, don't

WETTLAUFER MEETING

Head Office to Be Changed to 42 Broadway.

The annual meeting of the Wettlaufer-Lorrain, Mines will be held on Jan. 30 in the Home Life Bullding, at ten o'clock. The main business is the changing of the head office from Toronto to New York. The future meeting place of the Wettlaufer-Lorrain is to be at 42 Broadway. The same building on Broadway is also the headquarters of the Lewisohns, indicating to the superficial observer that the big mining house have now control. The vice-president and treasurer of the company now belong to the New York house. COBALT ORE SHIPMENTS

FREE GOLD SHOWINGS IN

But Mining Men Are Very Guarded as to What They Have Seen.

PORCUPINE CITY, Jan. 19 .- (From Our Man Up North.)-Robert W. Jowsey of South Lorrain fame, is one of the biggest holders in the new Cripple Creek district, where he has men employed solely on assessment work.

Yesterday Mr. Jowsey returned from the camp, a distance of 30 miles west and south from here, where the work was looked over.

Mr. Jowsey, wnile optimistic on allthings, is conservative and guarded in his statements on the district. Specks of free soid were found in a small quartz

quartz stringers opened up.
In fact it should be noted that, altho the district here is wide, a well-defined mineralized belt cutting two ways, from east to west thru Whitney and Tisdale, and northeast to southwest thru Shaw and Deloro, there is no hurrah on the part of mine men to put the district above the showings made in work.
This feature of the camp is most comabove the showings made in work.

This feature of the camp is most commendable and is one reason why Porcupine stands above the average new camp, although the control of the control of the camp.

THE REASON OF PORCUPINE.

As Our Own Man up North narrates. he Porcupine goldfields promise to be, are now realty, a unique centre of activity developing a mining industry itherto considered discouraging in Ontario, What Cobalt was and is, larger scale and with more glittering deal with the result of the diamond drill-fascination.

In the Porcupine goldfields we see from 5000 to 5000 men building a new a good showing of argentite.

The McKinley-Darragh-Savage, the Niptown, several new towns to be exact, issing and the Provincial mines, which ali closely allied, all planning for a adjoin the Gould, are working in excellent great gold mining camp in an area vider, and deeper than Cobalt ever

Timmins and their associates, who early acquired several properties in the Porcupine goldfields, find that they have gold ore milling as high as \$50 hore reached the found. This is disproved by the mines which lie immediately adjacent to the Gould. The Savage claim is yielding rich silver-bearing ore at the 146-foot level, and from the Provincial at a depth of 200 feet high-grade shipping ore is being secured.

The World last week, these facts are stated and authorized by Me. Timmins.

Further, the Hollinger people are putting in a power plant which will be in running order within six months, and will set the wheels of a complete and comprehensive mining industry in motion. Other power propositions are under way.

Besides the Hollinger there are three

line into the Porcupine goldfield. From sent market price and rate of divithese will be increased to 2000 so soon on the money invested. We ad-

EXPERT REPORT MADE ON GOULD CONS. CLAIM

Engineer Seymour of Cobalt Lake Predicts Good Future For Peterson Lake Lease.

Mr. A. P. Seymour, chief engineer of the Copait Lake Mining Company, has made an interim report on the Gould Consomeated, which is fully in line with the optimistic statements regarding the claim which have been made recently. MI. Seymour is known as one of the most capacie and conservative thining men in the whole Conait camp, and ma-tatements regarding the Gound Conson-

that account.

The Peport says in part: "I would reconnected you to sink the No. I shaft to a
further deput of start ordering at the log-look
level. Judging by the present appearance of the veins, it is reasonable to suppos that with depth they will contain payable silver values. In conclusion I would strongly recommend you to undertake the development of this most promising property, upon which there are several well-defined stringers and calcite veins equa in suaface appearance to any of the veins in the district. I teel confident that if in the district. I feel confident that if a modern and progressive system of mining is introduced and carried out on the lines suggested in my report, you will in all propability prove the property to be as valuable as the adjoining mines."

"Within the last twelve months the Savage mine has been developed to a depth of 140 feet, and the Provincial to a depth of 200 feet. In both these mines they have proved the permanency and continuity of the vens upon which they

continuity of the veius upon winc have been working. The above mines are now regular producers of high-grade snipping ore, and have erected on each property a plant for treatment of their milling ores." Mr. Seymour's supplementary report will

conglomerate to a depth of 200 ore, and it is probable that the same body which has been encountered these properties will be found on

What's the reason? There are several reasons, but one is that McMartin, good promise until the 300-foot level has

The Gould shaft is already down 121 to produce millions of dollars on their first development. This is not hearsay evidence. In the first announcement of the Hollinger people, published in the World last week, these facts are

Gould Shaft Down 121 Feet

A. P. Seymour, late engineer of Cobalt Lake Mining Co., says that the Gould shaft, now down 121 feet, need only be deepened another 50 feet to cross-cut for the valu-able veins of Savage, Provincial or Nipissing, one or all of which no doubt extend across the Gould property. These big shippers located their veins at this depth. Three mining engineers have assured us that Gould is the best speculative purchase in the Cobalt camp

Don't be stampeded into selling. In their opinion, it is better than most of the non-dividend paying Cobalt stocks selling at many times the price of Gould

A. J. BARR @ CO. 43 SCOTT ST., TORONTO

PORCUPINE MAPS FREE

We have had prepared at considerable expense a thoroughly reliable map of PORCUPINE, 36 inches by 40 inches, showing the location of the claims in this rich gold district. We are distributing the maps FREE, and will mail them to applicants in any part of the world. Write at once, as the supply is not unlimited.
