Beautiful Spot Full of Interesting Memories to Torontonians.

There are many thousands of the citizens of Toronto to whom the Humber Valley is full of pleasant recollections. To the lover of sport whose locks are becoming silvered with the winter of advanced age, the name "Humber Valley" recalls memories of the years gone by, when, with dog and gun, he roamed along the banks of the river in search of the feathered game, which ounded there, and a sigh will be breathed for the recurrence of the good old times as the vision of many a toothsome bird, the product of the day's hunting, rises before him. To the lover of nature in all its richness of autumn tints and springtime freshess, the valley has been indeed a

constant source of pleasure and enjoyment. The youths and maidens have found it a source of never-falling enjoyment and recreation to roam at will along its shady banks, to explore its secluded nooks and whisper sweet confidences. The charm of its ever-changing vista of woodland scenery, the gurgling and babbling of the waters, as they tumbled over the rocky bed and dashed against the huge boulders which obstructed its passage, the rich coloring of the foliage, which covered the towering banks on each side of the gorge, has made the Humber Valley a favorite picnic ground for several generations. As The World reporter wandered through the ravine from Bloor-street to Lambton Mills yesterday afternoon, the memories of the pleasant picnics of boyhood days were vividly recalled. There was the same level stretch of meadow land upon which exciting games of "ball" had been contested, with all the keenness and vigor of youth. Here were the same trees which had furnished the luscious apples with which we surreptitiously regaled ourselves. But the fruit did not seem to have the same flavor that memory had bestowed upon it. The banks of the ravine wore the same garb of varied colors that had haunted the memory.

Messrs. Hankin,

Messrs. It was afterwards learned from the officers of the company hat it is the intention to push the work of construction as rapidly as possible. As soon as the dam has been constructed to a height of 30 feet a turbine wheel will be put in, and by an early date next summer the company expects to be in a position to furrish sufficient power to light Toronto Junction, The dam when completed will have a width at the base of about 150 feet, narrowing as it rises. This company is formed for the purpose of acquiring and dealing in mining properties and options, and buying, selling, operating, leasing, prospecting and developing mining properties; also smelting, refining, assaying, etc., and all and any other business pertaining to the mining industry, and to lease, buy or otherwise acquire land and properties for town site purposes, and all other rights in connection therewith, and to construct rallways, tramways and roadways to mines.

To do business throughout Canada and London, Eng., as mining brokers, company promoters and general mining operators. To carry on this branch in the most conservative manner, refusing to list or handle stocks of a doubtful character, or which the Board of Directors, on the advice of its officials, consider capitalized beyond the value of the property.

THE ONLY MINING ENTERPRISE THAT HAS PAID ITS WORKING EXPENSES out of profits during the first week of incorporation.

Our western manager lent Toronto Saturcay to commence active and vigorous development work on several properties, which he will push all winter. We hope to receive very favorable reports from these properties within a few weeks. Every dollar subscribed now strengthens our company and makes success certain.

The company believes that such a corporation is more to take advantage or every opportunity that presents itself to secure good properties, and having the means to develop them is vastify superior in its capa billity to earn dividends to any six, mining companies only having one claim and having to depend day by day upon the public buying their development stock. Nor do they rely upon having to develop a property until it is a dividend payer before any returns are received by the shareholders. They believe that by disposing of properties they have partially developed they will be paying dividends long before that time arrives, and work will still be going on in the most important of the company's mines.

The Company's Head Offices here are now recognized as a

BUREAU OF INFORMATION on all mines and mining companies and are receiving a great deal of
