Chicago Futures After Opening Strong Grain-Declined Sharply.

iverpool Market Advanced Yesterday-The Sugar Tariff-Prime's Forceast-Beerbohm's Report-How War Would Affect Prices - Market Quotations-

Wednesday Evening, April 6.

The Chicago wheat market was affected by the unsettled political situation to-day. It is thought that war would strengthen wheat and that peace will tend to weaken prices. A bullish factor was a report of further Lelter sales abroad, but, on the other hand, Duluth was reported to be offering cargoes under the May price. All lines opened strong this morning and advanced, but before the close made a marked decline. May and December wheat closed at Monday's last figures, while the July and September futures scored a loss of %c and %c respectively. In Liverpool wheat was very strong, May closing ¼d, September and July each ¾d and December %d above yesterday's last quotations. Corn was strong in Liverpool.

The Liverpool grain markets will remain closed from to-morrow (Thursday) until Tuesday. The Chicago Board of Trade may be open for business on Good Friday. Receipts of wheat at Minneapolis and Duluth to-day were 253 cars.

Live stock receipts at Chicago to-day Wednesday Evening, April 6.

One weak feature of to-day's wheat market was that Duluth was offering cargoes le under May, guaranteeing inspection.

Counselman & Day bought wheat to-day.

Early in the day Leiter reported 150,000 more bushels of cash wheat sold by him abroad.

Prime's weekly crop report states that in the growing world farmers have been simply waiting for the ground to get into condition to commence seeding. In the winter wheat belt there has been such an excessive moisture that it has simply been impossible to get upon the ground. The coming week will have to bring very radical changes or we shall be forced to meet a late season. No spring wheat has been yet sown worth reporting, and no radical increase in the acreage is looked for. Very little progress has been made with seeding the oat crop, none having been sown in Illinois, Indiana.or Ohlo. In Nebruska and south of the Ohlo River frosts have cut down the early oats and necessithed reseeding. Winter wheat crop jogs along slowly. It was cut down in Indiana territory, Oklahoma, Texas and portions of Kansas by the recent hard freeze. Country mills report light stocks of wheat, and Kansas stocks are very low. Nothing has been done in corn planting. Prime's Crop Report.

According to Beerbohm's review of March crop conditions the area sown in the United Kingdem is larger than last year, and farmers' deliverles have been large, evidencing their intention to hold over no old supplies. The amount left in farmers' hands was estimated at 16,000,000 bushels, against 21,400,000 bushels last year, and 16,000,000 bushels two years ago. Reports from France stated that the weather was mild and the outlook for the crop continued satisfactory by all accounts. The demand for wheat from France will be continuous and active for the next four or five months if the official estimate of the crop was correct. These estimates indicated a total crop of 248,000,000 bushels, with 28,000,000 bushels old wheat left over. Taking the ordinary rate for food and seed the requirements are about 340,000,000 bushels, and they indicated a deficit of about 64,000,000 bushels. The rate of imports so far has been about two-thirds of this amount, Reports from Belgium, Holland and Germany are fairly good and no complaints are received. In the Danublan provinces crop conditions are fairly good. According to Beerbohm's review of March

It is considered that the new sugar tariff, by imposing a disability upon the bountied European beet root product, will help
the Canadian refiners as well as the West
Indian grower. Sugars did not advance in

Chicago Gossip.

Henry A. King & Co. received the following despatch to-day from Chicago:

The condition of the wheat market has been somewhat affected by the political news, which has been war and peace all day, the latter predominating at the present writing, Undonbredly the United Kingdom and Continent have bought very freely the last week or so, knowing that a reputure between this country and Spain would cause a shurp advance in freights, Should it become definitely settled that there was to be war, it would most likely cause weaker markets abroad. The high barometer in the Northwest and cold and high winds throughout the entire country is known to be unfavorable to wheat, and has been one of the potent factors in causing shorts to protect their July contracts. As soom as they were out of the market this morning there was apparently no other support, and a decline of 2c per bushel from the high point was quickly noted, only part of which was recovered at the close.

While there was a good cash demand for corn at from ½c to ½c premium over May, the speculative trade was confined principally to changes from May to July and other distant futures.

Provisions—The large receipts of hogs, and also the liberal movement in the West, caused lower prices at the stock yards and rather liberal selling of hog products.

Melnityre & Wardwell's Chicago despatch to-day says:

The approaching crists in the Cuban situation apparently had a depressing influence.
