

NOVA-SCOTIA (11) ALMANACK.

He who first flung the globe thro' fields of space,
Now bids it recommence its annual race;
Sends it in orbit vast, with sister spheres,
Round glowing Sol, who rules the varying years;
Singing His praise, to well-taught ears, it flies,
With all its hills, and dales, its seas, and "skies."

PHASES OF THE MOON FOR JANUARY, 1837.

- New Moon, - - - 6th d. 7 h. 32' aft.
