flush feed, and says he must sell for less

Those who have had experience know, Feeding is likely to remain an art, and that, other things being equal, there is less thick than when it contains a large Farmers who succeed in growing and amount of milk and is, consequently, harvesting good crops often sell at a thin. Knowing this one would naturally best to take as little milk as possible in skimming off the cream, and this is cattle, 1136 horses, 1755 sheep and 1347 fact, farmers have much difficulty in show that in raising cream by the gravity system the milk immediately under the When prices are high almost any yield cream is very rich in fat. We have crease cost, and it can be done better the cream line frequently tests as high as many instances higher. The next inch Fruit should be looked upon more as a of milk is not so rich, testing from two farmer would raise fruit sufficient for It will always pay to take the first inch of milk with the cream and will usually A high grade of goods cannot be made pay to take the first two inches. While the from a mixed mass of good and poor butter may not be of quite as good quality cream. The good never makes the poor when this is done and the loss of fat in better but the poor always brings down the buttermilk may be a little greater, yet these will not balance the loss that would result from taking the cream alone.

Omaha it is said that about 80,005 pounds Do not build a creamery where there is no dairying, hoping that farmers will go into cow keeping. It costs about as much to make the butter from 200,000 last year. to make the butter from 200 cows as from but because there is a profit to the retailer of ten or fifteen cents per pound. It is true that the national law attempts to regulate the sale of oleomargarine, but To make a calf feeder take a box 18x24x since the passage of the law it has been two-thirds in. It is to be used in feed-the politic attendant if he has any good ing calves, as it prevents their tripping butter to-day, to which he immediately the bucket, and one person can do the replies 'yes,' and says 'how do you like feeding, or they can be left to themselves this?" at the same time showing her a roll The Practical Dairyman suggests to of oleomargarine. She could smell noththose butter makers who are blessed with ing rank or rancid about it, and takes it ice apartment cream vats that if they home. The law requires that the wrapwish to keep their cream at a low uniform ping paper be stamped, or have printed temperature, they should draw the water on it what the p chage contains. This out and use ice alone. We find it does is evaded by using a rubber stamp and a better work than to cool the water down, pale shade of ink printed on brown wrapping paper, and is wrapped up in the in-If the extror or seperator is not used, and the creaming of the milk is done at to the kitchen by the delivery boy, the the farm, all the patrons should use one hired girl takes off the wrapper and kind of creaming apparatus; and practice sticks it in the stove or waste basket, and as near as can be one plan of setting the | the real purchasers never know that they and keeping should be as nearly as pos- not the fragrant aroma or delightful taste it had when they were younger."
