

	PAGE.		PAGE.
Commerce, Japanese.....	78	Courses, elective.....	120
Compensation for inspectors.....	949	Courses, time required for.....	135
Compensation for services.....	516	Cover plates, length of.....	381
Compensation for young engineer's services.....	509	Cover plates, number of.....	289
Concentration, live load at floor beams.....	266	Credit for construction of flow-line bridge.....	928
Concrete, cement in.....	777	Credit for designing Halsted Street Lift-Bridge.....	559
Concrete for pedestals.....	651	Criticism of technical instruction..	176
Concrete for piers and abutments..	895	Cross girder flanges projecting above stringers.....	659, 666
Concrete, specifications for.....	597, 683, 685	Cross girders, bending in caused by thrust by brake trains.....	737
Concrete, volume of constituents of	677	Cross girders, connection to columns of elevated railroads.....	662, 732, 693, 694
Connection of longitudinal girders to cross girders.....	633	Cross girders, horizontal bending in	633
Connection of web angles.....	631	Cross girders, resting on columns of elevated railroads.....	633, 737, 746
Connections of stringers to floor-beams.....	290	Cross girders subject to bending owing to thrust by brake trains..	743
Construction of railways, present..	20, 40	Cross girders, top flanges of, in respect to stringers.....	760
Construction of roads.....	68, 69	Cross girders, top of, in respect to stringers.....	711
Consultation system of instruction..	100	Cross-sectioning, methods of.....	42
Consulting engineer, qualifications for.....	783	Cross ties, use of, on elevated railroads.....	708
Consulting engineers, young engineers' experience with.....	823	Crossings, important, field work for	58
Consulting practice, inauguration of	791	Culverts, too small.....	23
Consulting practice, responsibilities of.....	792	Curriculum, students' influence upon	861
Consulting work, Dr. Waddell's beginning in.....	5	Curves, clearing timber for.....	38, 39
Contract for Halsted Street Lift-Bridge.....	577, 581	Curves, running of railway.....	38, 39
Contracting, Dr. Waddell's work in	5	Cuts, drainage of.....	21
Contracting, value of experience in, to engineer.....	784	Cuts, level grade through.....	21
Contractors' relations to engineers..	518	Cuttings, dips in.....	21
Contracts, fairness of.....	870	Cuttings, excavation in.....	44
Contracts for railroad construction	49		
Contracts, laws of.....	115		
Contracts, the division of.....	875		
Contracts, the engineers' control of..	912		
Contracts, the scope of.....	888		
Contracts, the study of.....	790		
Controversy over Japanese bridges..	4		
Co-operation, need of, among engineers.....	837		
Corruption in bridge lettings, causes of.....	246		
Cost of double track elevated railroad structure.....	614		
Cost of Halsted Street Lift-Bridge..	558, 665		
Cost of various designs for elevated railroads.....	630, 648, 703		
Costs, methods of obtaining.....	177		
Costs, the study of.....	788, 938		
Costs, to secure knowledge of.....	796		
Counter weights for lift-bridge, description of.....	531, 546		
Counters, proportioning of.....	431		
Counters, stresses in.....	431		
Course in civil engineering, ideal..	104		
	105, 106		
Course of study, extent of.....	122		

## D

Damages liquidated.....	897
Damages to property when embankment is used.....	754
Damages, responsibility for.....	884
Damming highwater in valleys.....	24
'De Pontibus'.....	8
Defective work, specifications for..	883
Deflections of bridges, observations upon.....	496, 497
Degrees.....	122, 125, 175, 952
Degrees, Dr. Waddell's.....	9
Depth of trusses, economical.....	452
Descriptive geometry.....	161
Descriptive geometry, methods of studying.....	849
Descriptive geometry, the importance of.....	849
Design, economy of.....	102, 831
Design for elevated railroads, time spent upon.....	580
Design of elevated railroads, character of.....	661, 685, 698, 708
