

SUBDIVISION II. ANGIOSPERMÆ

CLASS I. MONOCOTYLEDONEÆ

ORDER V. PANDANALES

VIII. TYPHACEÆ. CAT-TAIL FAMILY

Aquatic or marsh herbs with creeping rootstocks; leaves nerved, linear, sessile; flowers monocious, numerous on a spadix destitute of proper floral envelope; fruit nut-like, usually splitting on one side.

I. *TYPHA*. (Tourn.) L.

1. *T. latifolia*. L. *Broad-leaved Cat-tail*.

IX. SPARGANIACEÆ. BUR-REED FAMILY

Marsh or aquatic herbs with erect or floating stems; leaves alternate, linear, sessile, two-ranked; flowers monocious with inglobular, sessile or pedunculate heads; fruit nut-like, obovoid or spindle-shaped.

I. *SPARGANIUM*. (Tourn.) L.

1. *S. simplex*. Huds. *Simple-stemmed Bur-reed*.

ORDER VI. NAJADALES

X. NAJADACEÆ. PONDWEED FAMILY

Marsh or immersed aquatic herbs with slender, jointed, leafy stems; leaves flat or filiform, sheathing at the base; flowers perfect or unisexual with a perianth of four or six distinct valvate or tubular segments; fruit an indehiscent berry.

I. *POTAMOGETON*. (Tourn.) L.

1. *P. Richardsonii*. (Benn.) Rydb. *Richardson's Pondweed*.
2. *P. filiformis*. Pers. *Filiform Pondweed*.
