

SPECIALIZED BELTING

After the exit of the flail came the thresher. Then Dunlop specialized on Thresher Belting to meet unusual needs in an unusual way.

Thus, with the introduction of the power-driven saw, churn, fanning mill, silo filler, cream separator, pump, hay baler, grain crusher, and other modern farm conveniences and labor savers, it was only to be expected that "Dunlop" again would have ready time-tested, specially-designed Beltings highly suitable for all these general purposes.

Such proved to be the case, and what is more, Dunlop General Purpose Agricultural Belting, like Dunlop Thresher Belts, is now the popular choice of discriminating users throughout every agricultural community—of men accustomed to making their purchase on the basis of true merit alone.

FOR THRESHERS: "Gibraltar Red Special," Frictioned Surface

You'll find this belt the master creation of Dunlop manufacturing efficiency. It's undoubtedly in a class by itself for thresher use. Having a frictioned surface of the toughest red rubber, it is noted for its ready pulley grip and powerful resistance to the elements and atmospherical changes. The seam is sealed as with iron. The plies are of the highest grade of long-fibred, unbreakable duck. The friction is the long-fingered, tough, yet resilient kind. Thus no slipping and its consequent burning; no stretching and the necessity for constant adjustment; no opening of the seam; no breaking of the fabric; no separation of the plies.

"Gibraltar Red Special" stands ready to meet the most exacting demands which thresher use may impose upon it. Throughout all it will give that unvarying service which means larger output and lower upkeep cost to the thresherman; and increased satisfaction to his customers. This, then, is the belt you need if the initial cost is not the deciding factor.

"Prairie" and "Reliance" Rubber Covered and Stitched

If your preference is for an absolutely dependable rubber-covered belt, then either "Prairie" or "Reliance" will meet your needs. Both are high-grade, stitched and endless thresher belts. They lack nothing of the same infinite care exercised in the making of "Gibraltar Red Special." For this reason, and because the duck is strong, the friction high-grade, the face durable, adhesive and immune to cold, heat and wet, and the stitching positive, you will find they will render satisfying service throughout many seasons. Their recommendation lies in the fact that their representation is large and rapidly increasing throughout the prairie provinces.

FOR GENERAL PURPOSES

For general purpose belting you can depend upon "Reliance," either stitched or unstitched. Or, if you desire a less expensive grade, "Banner" will satisfy you, at least on the smaller machines.

Just here we don't want you to overlook the highly desirable qualities of Dunlop Canvas Belts, which strongly recommend them for thresher and general use.

HOSE FOR YOUR EVERY NEED

Agricultural Hose is a very important consideration. Whether it is Suction, Injector or Discharge Hose you will find the Dunlop kind has special features which appeal to the good buying judgment of men who know what's what.

DON'T FORGET, THEN!

When overhauling your threshing outfit or farm machinery, and making notes of your requirements for the coming season, that we have one of the finest equipped factories devoted to the manufacture of Belting and Hose in Canada. These factories are capable of turning out large or small orders at great speed, and this, combined with the fact that our branches are situated at convenient points, is an assurance of prompt and efficient service.

You simply cannot afford to buy a dollar's worth of rubber-made goods until you know the splendid qualities of Dunlop Products. You will find Dunlop prices right, too.
