

**DON'T STOP** to ask your neighbors. Lift the load yourself with **THE BURR SELF-LOCKING TACKLE BLOCK.**

Can be used in any position and lock securely. The heavier the load, the tighter it locks. Never destroys the rope in locking. For butchering, stretching wire fences, lifting wagon-boxes, sick or injured animals, etc., it is indispensable to farmers. Saves labor of two or three men. 600 to 5000 pounds capacity. Ask dealers or write **LEWIS BROS., Ltd., Montreal, Can.**

**INTERNAL GEAR**

**THIS GEAR GIVES INSTANT ACTION TO KNIVES**

It starts them going at the same instant the big power-wheel moves; can't help it because the small pinion drives the pitman crank with no lost motion. A mower's value lies in its power to cut grass—and lots of it—quickly and continuously without a break-down. That's where our No. 8 Mower proves its worth. This internal gear works smoothly, transmits firm and steady power to the pitman. It produces almost no friction, and that unpleasant vibration and pounding prominent in some mowers is absent. The

**Frost & Wood No. 8 Mower**

is provided with ball and roller bearings wherever any wear occurs. So carefully is the No. 8 put together and so rigorously tested at the factory that it will handle the heaviest hay, and though subjected to the severest strains, still it will be remarkable how few the repairs needed. We can point to Frost & Wood Mowers made twenty years ago that are cutting grass now. Our cutter-bars are formed out of the toughest steel procurable. Pitman-head and jaws are forged steel. Pitman is made of tough, seasoned hickory. The convenient foot-lift raises the whole cutter-bar from end to end when passing stones or other obstructions.

Mr. Farmer, this is the mower for you to own—it's economy, wisdom and foresight—an insurance against worry. Send now for our "Farmers' Ready Reckoner" and catalog "F"—both free. Our agent in your vicinity will gladly explain our mower and other farm implements. Be free to ask him any questions.

**You Might as Well be Deaf and Dumb**

These days, as to be without a telephone service. A telephone in your house is just as much needed as a stove for cooking purposes. Think what it means to have a telephone in your home—think of being able to speak with your friends at any time during the day or night—of being able to summon a doctor in case of sickness—or, in an emergency, being able, in a few seconds, to communicate with your neighbors, besides the many other uses to which it can be put. A telephone service can be installed at a small cost anywhere—in a town, village or farming district and once the telephone is paid for, it belongs to you. Write to-day for some of our literature about the convenience of telephones, the ease with which they can be installed, the cost of building them, and other important information.

**END YOUR ROOF TROUBLES WITH**

**Amatite ROOFING**

**A Roof that Really Protects**

The more carefully you study the subject of Ready Roofings the more you will be convinced of the great superiority of AMATITE.

The average buyer sends to a few advertisers for samples, picks out one that looks tough, and sends in his order to the nearest dealer.

If the dealer doesn't keep the kind selected some other kind which he has is generally bought instead.

*That is a good way to get a leaky roof.*

The careful buyer is more particular. He knows that any roofing will last for a little while without attention, but he wants to postpone the time and cost of renewal as long as possible.

He is figuring next year's cost as well as this year's cost. He thinks of the money he will have to spend after a few years for a new roof if this one won't last any longer. If he can get a better roofing at equal cost that will last longer, he is so much the gainer.

That kind of calculation is called thrift. The thrifty buyer sees important differences between AMATITE and the other roofings.

The other roofings either require a coating with a special liquid every year or two, or periodical painting. Right there is a future expense to be counted by the thrifty buyer.

His judgment swings toward AMATITE, because it needs no painting either at the time it is laid or afterward. Once it is on you have no further bother or expense.

Then again, AMATITE has wonderful durability:—

First, because it has a mineral surface. Doesn't it seem reasonable to believe that a top covering of crushed stone will resist the wear of storms better than a roofing with a smooth or unprotected surface?

Second, it contains solid layers of Coal Tar Pitch—the material which is used by the best engineers for waterproofing deep cellars, tunnels, etc. Doesn't it seem reasonable to suppose that this offers better protection against water than materials which are never used for such severe service?

One more argument. Weight for weight, AMATITE is the lowest in price of any mineral surfaced Ready Roofing.

These, then, are some of the reasons why thrifty people buy AMATITE—It costs nothing to maintain; it has remarkable durability, and its first cost is very low.

**Sample Free**

There are more arguments for AMATITE than these. Our Booklet tells them. Sent with Free Sample for a postal to nearest office.
