LANDS FOR SALE

At an unusually large dinner-party, where the guest of honor was an English Bishop, the butler, an elderly man, was obliged to bring in from a friend's house an inexperienced lad to help him in the dining-room. The awkward helper annoyed the butler beyond endurance with questions as to his duties. He continued interminably until the butler, worn out and nervous, said ironically:

"All you will need to do is to stand behind the Bishop's chair, and whenever His Lordship puts down his glass you must reach over and wipe his mouth with a napkin."

That silenced his assistant. But the young man actually took the order seriously, and as soon as dinner began he stationed himself behind the Bishop, waited till His Lordship had drunk and put down his glass, and then, as deliberately as his nervousness would permit, he opened out a large napkin and wiped the dignified old gentleman's mouth!

How to Get Rid of Catarrh

A Simple, Safe, Reliable Way and it Costs Nothing to Try.

Those who suffer from catarrh know its miseries. There is no need of this suffering. You can get rid of it by a simple, safe, inexpensive, home treatment discovered by Dr. Blosser, who, for over thirty-five years, has been treating catarrh successfully.

His treatment is unlike any other. It is not a spray, douche, salve, cream, or inhaler, but is a more direct and thorough treatment than any of these. It cleans out the head, nose, throat and lungs so that you can again breathe freely and sleep without that stopped-up feeling that all catarrh sufferers have. It heals the diseased membranes and makes a radical cure, so that you will not be constantly blowing your nose and spitting, and at the same time it does not poison the system and ruin the stomach, as internal medicines do.

If you want to test this treatment without cost, send your address to Dr. J. W. Blosser, 716 Walton St., Atlanta, Ga., U. S. A., and he will send you by return mail, from his Canadian Distributing Depot, enough of the medicine to satisfy you that it is all he claims for it as a remedy for catarrh, catarrhal headaches, catarrhal deafness, asthma, bronchitis, colds, and all catarrhal conditions. He will also send you free an illustrated booklet. Write him immediately.

the question of a market for our own products abroad.

"Since the percentage of those at work on the soil declined by about one-fourth in the last thirty years, we have to consider not only the increase of food demand over its domestic supply, but also that disturbance of the balance between one form of industry and another upon which prosperity and stability depend. Up to this time other industries than agricultural would have flourished and grown amazingly in the United States without any artificial stimulus, because the large percentage of the total population engaged in agriculture furnished an adequate market. This condition is changing rapidly.

"The situation, then, sums itself up thus: We have almost reached a point where, owing to increased population without increased production per acre, our home food supply will be insufficient for our own needs; within ten years, possibly less, we are likely to become a wheat importing nation; the percentage of the population engaged in agriculture and the wheat products per acre are both falling; at the same time the cost of living is raised everywhere by this relative scarcity of bread, by artificial increase in the price of all manufactured articles, and by a habit of extravagance which has enlarged the view of both rich and poor of what are to be considered the necessities of life. These plain facts should disturb and arouse not only the economic student but the men who are most intimately related to the wealth of the nation and most concerned that it shall not suffer loss or decrease.

"What we must come to—and the signs of the times indicate that we cannot make head in that direction too rapidly—is the smaller farm, with a more intensive agriculture. We support, in round numbers, 90,000,000 of people on 3,000,000 square miles of land. We should be able to support 150 per square mile as easily as thirty; and then we should have but a fraction of the destiny of population of Denmark, with 167 inhabitants per square mile, Holland with 448, or our own state of Rhode Island with 407 in 1900.

"But every nation will still learn and progress by bearing manfully the consequences of its own mistakes. They will stand or fall hereafter as heretofore according to their care of the one great resource, the soil; the one indispensable occupation, agriculture; and the maintenance of a proper economic relation and balance between it and all others."

OLDS AGRICULTURAL FAIR

This fair was held in perfect weather and before a record crowd. There was a splendid array of live stock and produce, for which this district is so well known. Heavy draft horses were fairly well filled; but the event of the day was the judging of the heavy draft suckling colts in which class there were twelve entries. Mr. Roberts certainly achieved a great triumph in winning first prize and also the Merchants Bank challenge cup for the best foal of any draft breed. One peculiar thing was that in this remarkable class of suckers nine of the twelve entries were sired by the Shire stallion Mark Harold, including the first prize winner. Agricultural horses were an excellent class on the whole. Cattle were numerous, and included some which had brought honors to this district before, namely, Mr. Nelson, with Angus; Messrs. Watkins, Hutchinson and Sullivan, with Shorthorns. Dairy breeds were well represented by Messrs. Cumming and Jack. Sheep and swine were small in number but high in quality, and all other departments were certainly well represented. There were some sporting events at the close of the fair. T. R.

ABUNDANCE OATS IN SASK. FIELD COMPETITION

In our issue of October 13, a list of the prizewinners in Saskatchewan Field Grain Competitions was given. Space did not permit publishing a detailed statement of the scores made, or variety grown by prizewinner. Examination of the results in oats shows that out of 19 first prizes awarded, 11 were won on oats bred
