The report was read and adopted sub-committees. Sir Joseph Outer-bridge rose and proposed Hon. R. Watson as President, pointing out that he was not a total abstainer, and was not a believer in minority rule. As a citizen he was willing to sacrifice any enjoyment by giving his support for the abolition of the sale of intoxicating liquors which had such an injurious ffect on the community. He thought more prosperous if there was prohibition. Sir Joseph's motion was seconded by Mr. W. J. Ellis and carried by acclamation. Hon. R. Watson thanked the committee for electing him to the chair, but thought he had no right to it and that they should

Thought **Baseball Brutal**

It remained for an Australian min ister of health to discover that baseball is brutal, dangerous, and also silly. During a recent game in Sydney, teams representing America and Australia were playing at a patriotic carnival. According to the report of Sydney daily:

"In America's second inning a player deflected a fast ball straight for the densest portion of the crowd, and a scream was heard. The ambulance men rushed to the spot, and found that a woman had been struck on the head by the ball, but was not seriously injured. Without waiting to see if any damage had been done, the players procured another ball and continued the game as if nothing had nappened. A few moments later this ball was also deflected to the upper story of the pavilion, striking a man on the shoulder. Mr. Flowers, the minister of health, who was present, Tweed, with other big selections rushed out on the grounds and called to arrive. SPURRELL BROS ers promptly obeyed his orders and Man's Tailor."—sep11,eod,tf

Mr. Bryan's Appeal Americans urged not to Travel in

While a large number of clergymen from the pulpits recently urged drastic action by the United States against Germany in consequence of the sinking of the White Star liner Arabic, Mr. Bryan seized the opportunity to issue a characteristic peace appeal exhorting the newspapers to concentrate on a campaign to persuade Americans not to travel British ships.

The appeal attracts comparatively little attention. It states that Dr. Page's report on the manner of the attack on the Arabic will decide the action to be taken by the President. In a notable leading article in the

Louisville Courrier, Mr. Henry Watterson, the veteran Democratic journalist, says. "There is such a thing as excess of deliberation. There is also such a thing as an appearance of vacillation almost as hurtful as vacillation outright. If the President breaks his promise by further parley and goes back upon his word given both to Germany and his own country he will bring us, all Government administration, and himself into derision and contempt.

"Explanations are idle and useless. They simply mock the facts. Look out, Mr. President. People want to trust you; they want to follow your lead. They have been very wholehearted and patient. But they will not have the dignity and honour of the nation put in commission, still less flouted, while God himself, as all of us know, hates a coward."

Mr. Watterson is undoubtedly wrong in assuming that the country wants war. It does not. But it wants action, and nothing less than the cessation of diplomatic relations with Germany will satisfy it in its present
