PUBLICITY

Mr. A. R. Timothy the photographer engaged by Messrs Sells of London, Eng., which firm is preparing for the publication of a book on Canada is in Campbellton this week, and is engaged in taking photographs for this work. Views have been taken of scenery up the river, the harbor, the principal industries and other local features from which will be selected the photographs which will be used for illustrations on the page of the book, this page being contracted for at a recent meeting of the Board of Trade.

Mr. John T. Reid, secretary of the Board and chairman of the committee to prepare the material for the manuscript of the Campbellton section of the book has gone to considerable pains to set forth all the facts relating to the town in an attractive manner. The desirability of having all the benefits of our town set forth in a convincing manner cannot be over estimated, as this great work when completed will be used as a guide for investment in the old country, and no doubt the matter so supplied should attract the attention of capitalists on the other side. There is no doubt if our great natural resources were earnestly and consistently placed before the investing public our town and district would progress and prosper in no uncertain manner. This book as we have said will be used as an authentic guide for the investor in the whole of Canada, and besides the Board of Trade several local firms have subscribed for a copy of the work which will cost \$51.00 per copy.

PROSPECTS

Many New York parties are casting longing eyes towards Northern New Brunswick for mineral products, and it is most probable that the visit of the various engineers will mean great developments in Gloucester County. Besides the property near Petit Roucher, mentioned in another column in this issue, an American who is much interested recently visited the Mangrove deposits on the Teta-gouche and took back with him a grip full of very rich samples of this ore. In conversation with a representative of the Graphic he stated that he represented a wealthy syndicate and that it was very probable his report which would be very favorable would lead to large

developments of these large deposits. The samples exhibited were of a high rich grade and these is no doubt if properly managed and carefully developed the properties would become most valuable.

What with iron, lead, manganese and other minerals Gloucester bids fair to become a noted mining centre.

BRIDGES

Has all the enthusiasm regarding bridge matters died out, or are we resting on our oars expecting a beneficent and fatherly government to come along and present us with a combined railway and highway bridge across the Restigouche with their parental blessing? No not by a long way. As a matter of fact were we sincere in our request for this bridge, was it of the most vital importance to our trade and commerce as we made it out to be? If so, then let us get a little bit busy. We will never get anything by sitting down with our hands folded. A large strenuous road is before us, ere the goal of our ambition is reached and the bridge matter should be kept ever before the ruling powers that be, and hampered for all its worth.

THE REVISORS

As noted in another column the revisors of the voters lists will soon commence their labors, and it is the duty of every one who is qualified to vote to see that his name appears on this list. We desire to give this fact publicity for by the act the revisors are only asked to post their notice in a conspicuous place, when for one dollar they could have the notice published in the newspapers of the town, where it would be read by every one. We don't blame the revisors, mark you, the act is at fault. The trouble is with most of our acts they were framed for a small country town and are now entirely out of date and ought to be amended.

OUR CLOCK

We are greatly rejoiced in spirit that we have at last a very fine looking clock on our post office tower. It has a nice open face, and can be seen from a long distance, but alas it doesn't seem to go. What is the matter, does it need winding up?

DENIES REPORT

London, Sept. 13.—Sir Boverton Redwood, admiralty advisor on petroleum matters, denies the announcement emanating from Montreal that a member of his staff is investigating the shale fields of Newfoundland and Nova Scotia.

Regarding the truth of statement that Newfoundland alone contains three billion tons of oil shale, or sufficient to supply England and Canada for 500 years, Sir Boverton said it was altogether too premature to say anything on the matter.

THE DUBLIN LABOR CRISIS IS ACUTE

Farmers Lock Out All Who Are Transport Workers

Dublin, Sept. 18.—The labor crisis became suddenly acute to-day on account of the decision of the farmers throughout Dublin county to lock out all the laborers who are members of the Transport Workers' Union. They have given the men a week's notice, but it is expected that the farm hands will not wait to be locked, but will go on strike at once.

This addition to 2,000 men who already idle means the stoppage of the handling of farm produce, and the result will be famine prices in foodstuff, which is already the case in other commodities. The difficulty probably cannot be solved by the importation of commodities, as the members of the Transport Workers' Union would probably refuse to handle imported goods.

A paralysis of business is steadily creeping on the city. Five hundred carmen were locked out today, and many sailors and firemen were paid off, because shipping is idle and freights are lying on the quays. Twenty-four of the largest employers in the city held a conference last night, and decided to lock out all members of the Transport Workers, and it is expected that in a few days every trade will be involved. All hope of a settlement has now faded.

CANADA HAS CASE RESEMBLING THAW'S

"Insane" Murderer Set Free After Four Years

Charlottetown, P.E.I., Sept. 15.—The release from Falconwood Insane Hospital, Charlottetown, last week of Alonzo Doherty, who four years ago, shot dead another young man, Joseph McMillan, has aroused quite a storm of indignation.

The tragedy occurred at the village of Miscouche, near Summerside, on a Sunday afternoon in midsummer. The girl to whom Doherty was engaged was that afternoon seen by him in McMillan's company. Going into his house, according to the evidence at the trial, Doherty secured a revolver and putting it into his pocket, he started to walk along the railway tracks toward the spot where he had seen the two in conversation. As he proceeded he came face to face with McMillan and the girl, who were walking along the track toward him. Doherty immediately drew the revolver and shot McMillan dead on the spot.

The trial ended by the jury declaring Doherty to be insane and since that time he has been an inmate of the asylum.

The circumstances of this case throughout are considered by many to be far worse than those of the Thaw tragedy, with which it has been compared.

"BIG TIM" SULLIVAN LEFT LARGE ESTATE

Will Contains No Provisions for Bequests to Charity

New York, Sept. 15.—The late "Big Tim" Sullivan, the New York politician, whose mangled remains were identified on Saturday by his step-brother, Larry Mulligan, after it had lain for about thirteen days in a local morgue, after being picked up alongside the tracks of the New York, Hartford & New Haven Railway, left an estate valued at about \$3,000,000. Although noted for his many charities in life, "Big Tim" made no provision in his will to perpetuate them after death. Of his estate a fourth is left to Patrick H. Sullivan, a brother; a fourth to Lawrence Mulligan, a half-brother; a fourth to Mrs. Margaret Hickey, a half sister, and a fourth to the four children, two boys and two girls, of his dead sister, Mrs. Michael Summers. The will is learned to have been drawn up five years ago. There are no codicils. The claims against the estate, it is said, would amount to about \$100,000. The will is now in the custody of William B. Ellison, one of the committee of three, appointed by the court to look after the property and person of the Congressman when his mind became clouded several months ago.

The bread line that forms nightly in front of the Brewery Mission was broken last night and many derelicts gave up the chance of getting coffee and rolls to visit the rooms of the Timothy D. Sullivan Association and look upon the dead face of the man who had befriended thousands in a thousand different ways. In the crowd was the "down and out" who for years had come to the rooms on Christmas Day for a dinner and every February 6 for a pair of shoes, rubbing shoulders last night with prosperous looking men, young and old, whom Tim Sullivan had placed "on their feet". There were aldermen, assemblymen and former and present office holders, who owed their positions to "Big Tim". Tears in the eyes of almost every man—the prosperous and poverty stricken—denoted the extent of the feeling they could not help but show for their dead friend.

FALL EXCURSION TO MONTREAL

Montreal is always a city of interest and especially so in early autumn when the weather is enjoyable, the many stores crowded with seasonable novelties, and the places of amusement in full swing. A visit there at this time of year cannot be otherwise than enjoyable, and with the very low fares prevailing on the Intercolonial Railway in connection with the annual fall excursions. The round trip can be made more cheaply than at any other time. On September 11, 12 and 13th, the round trip fare from Campbellton will be \$12.50, tickets good for return September 29th. On September 25, 26 and 27th the same rates will prevail with the return limit October 13th. Travellers from the Maritime Provinces have the choice of two of the finest trains on the continent the "Ocean Limited" and the "Maritime Express" both renowned for the excellence of their sleeping and dining car service. Sept. 11-2th

MILLINERY OPENING
Miss Henderson wishes to announce her fall opening for Saturday and Monday, September 29th and 30th. All are invited. 2 w
