BOYS' UNDERWEAR
BOYS' SWIMMING TRUNKS
BOYS' BATHING SUITS
BOYS' FINE WOOL JERSEYS (with V neck)

Also many other articles that the average boy requires.

FERGUSON & WALLACE

STREET WORK PROGRESSING

Work on Aaron and Water Streets Begun—About 80 Men Employed.

The street work is now well under way. The laying of a permanent sidewalk on the north side of Water Street has started. The proximity of this street to the river bank necessitates the erection of a concrete substructure for the walk. Naturally this makes the job a longer one, but the work is progressing at a satisfactory pace. The sewer work on Aaron Street has also been started.

The disreputable old plank sidewalks on Rossberry and other streets have been removed and a new concrete preparation is being made for the laying of the permanent walks. This work is now giving employment to about eighty men.

We were the first of the party to arrive, and although we were experiencing our first real summer day, gave the town a casual look-over.

At six o'clock everyone, including the band was at the C. N. E. depot to welcome those who were coming up from St. John, and who had gathered there from various points of the Maritime provinces.

That botany is an interesting subject is borne out by the accompanying list of wild flowers recently gathered by school children here. Although few of the flowers may be altogether new to readers, yet the list contains several which we did not know were indigenous to this part of the country.

Below is a list of flowers gathered during the month of May by some of the pupils of Miss MacPherson's room at the Grammar School:—
Dandelion, Purple Violet, Wild Currant, Elderberry, White Violet, Dog's Tooth Violet, Yellow Violet, Blood Root, Strawberry Blossom, Churchyard Ivy, Smilax, Bifida, Marsh Tails, Purple Trillium, Gold Throat, Clintonia, Staminate Catkins of Carolina Yew, White Trillium, Dutchman's Breeches, Staminate Catkins of Balm of Gilead, Staminate Catkins of White and Yellow Birch, Fragrant Catkins of Fagopyr, Marsh Marigold, Bramble, Wild Pear, Twisted Stalk, Alkali Clover, Wild Cherry, Spring Squaw, Many Cleft, Yellow Bell, Vetch, Chives, Wild Primrose, Fly Honey-suckle, Daisy, Bunch Berry, Spewewort, Jack-in-the-pulpit, Buttercup, Wild Mustard and Star Flower.

JAPS UNRULY IN HAWAII

Japanese Clergyman Accuses Them of Rapidly Re-paganizing the Country.

That the Japanese in Hawaii are rattling good bootleggers, promote Sunday resting bouts, conduct gambling dens and are otherwise "not too far from the mark," are statements contained in a lengthy report just received by the Federal Council of Churches from the Rev. Tada Okumura, a Japanese clergyman in Hawaii.

The Rev. Mr. Okumura, in one section of his report says, "America is a country of religious freedom. But can the American people sit quietly by and gaze at the rapidity with which their country is being re-paganized? Hawaii, a Christian country, is being thoroughly re-paganized. Idols are being imported. Temples are being erected in every nook and corner of the territory and pagan rites are being held. Traditional Sunday observances are giving way to noisy festivals and wrestling tournaments at the temples and shrines.

"Japanese children who should be taught and trained into good American citizens are being taught Japanese ideas and ideals. Some schools have changed their policy, but many cling to the old, out-of-date system. Since the prohibition law went into effect and offenders engaged in the illicit liquor traffic are Japanese. A majority of the offenders in gambling cases are also Japanese."

The chief cause of all difficulties in Hawaii, between the Japanese and Americans, says Okumura, is the difference in ideas. "Many Japanese," he says, "think that every movement of the Japanese, even if it is a bad one, should be backed by the Japanese; and any Japanese opposing a movement is a traitor. Once a Japanese is always a Japanese. Hawaii is a mere stepping stone to fortune. There are some of their mind."

The remedy—according to Okumura, lies in the educational campaign now being waged. "Our objective is first of all to encourage the Japanese to discard their mistaken ideas; secondly, to urge them to adapt themselves to American customs and manners; thirdly, to make them realize that the education or training of children born in these islands into a good and loyal element of Hawaii and America is not an act of dilatoriness to their country or their forefathers, and, fourthly, to encourage the Japanese in taking the initiative in bringing about a peaceful and harmonious relationship between the two peoples."

The season's first salmon catch of any consequence was made yesterday, when a fisherman landed here with ninety, some of which were quite large.

HOW EDMUNDSTON IS GROWING

Tourist Association and Members of Can. Weekly Newspaper Ass. Entertained.

Edmundston, N. B. Edmundston is certainly on the rise. A few years ago a sleepy country village, today a bustling town, with a population of about 4,000 and still growing.

When the writer left Campbellton, accompanied by Mrs. Aspin, to meet the rest of the Press party en route to Ottawa at the above town, and also to take in the first, morning of the N. B. Tourist and Recreation Association, we looked forward to a very quiet little trip.

Upon our arrival we were driven to the Madawaska Inn, a hotel which for reputation and appearance has anything Campbellton has known a mile. We were the first of the party to arrive, and although we were experiencing our first real summer day, gave the town a casual look-over.

At six o'clock everyone, including the band was at the C. N. E. depot to welcome those who were coming up from St. John, and who had gathered there from various points of the Maritime provinces.

That botany is an interesting subject is borne out by the accompanying list of wild flowers recently gathered by school children here. Although few of the flowers may be altogether new to readers, yet the list contains several which we did not know were indigenous to this part of the country.

HOTEL DIEU UP TO STANDARD

Western Physician Expresses His Entire Satisfaction With System in Force Here.

The American College of Surgeons, Chicago, prescribes the following rules and regulations for hospital standardization:—
1. That physicians and surgeons privileged to practice in the hospital be organized as a definite group or staff. Such organization has nothing to do with the question as to whether the hospital is "open" or "closed," nor need it affect the various existing types of staff organization. The word staff is here defined as the group of doctors who practice in the hospital of all groups such as the "regular staff," the "visiting staff," and the "associate staff."

2. That membership upon the staff be restricted to physicians and surgeons who are (a) competent in their respective fields and (b) worthy in character and in matter of professional ethics; that in this latter connection the practice of the division of fees under any guise whatever, be prohibited.

3. That the staff initiate and, with the approval of the governing board of the hospital, adopt rules, regulations, and policies governing the professional work of the hospital; that these rules, regulations, and policies specifically provide:—
(a) That staff meetings be held at least once each month. (In large hospitals the departments may choose to meet separately.)
(b) That the staff review and analyze at regular intervals the clinical experience of the staff in the various departments of the hospital, such as medicine, surgery, and obstetrics; the clinical records of patients; free and pay, to be the basis for such review and analysis.

4. That accurate and complete case records be written for all patients in the hospital, a complete case record being one except in an emergency which includes personal history; the physical examination, with clinical, pathological, and X-ray findings when indicated; the working diagnosis; the treatment, medical and surgical; the medical progress; the condition on discharge with final diagnosis; and, in case of death, the autopsy findings when available.

5. That clinical laboratory facilities be available for the study, diagnosis, and treatment of patients, these facilities to include at least chemical, bacteriological, serological, histological, radiographic and microscopic service in charge of trained technicians.

6. That the staff initiate and, with the approval of the governing board of the hospital, adopt rules, regulations, and policies governing the professional work of the hospital; that these rules, regulations, and policies specifically provide:—
(a) That staff meetings be held at least once each month. (In large hospitals the departments may choose to meet separately.)
(b) That the staff review and analyze at regular intervals the clinical experience of the staff in the various departments of the hospital, such as medicine, surgery, and obstetrics; the clinical records of patients; free and pay, to be the basis for such review and analysis.

DALHOUSIE BOY FATALLY SHOT

Seven-Year-Old Son of Mr. and Mrs. John Harquail Dies From Bullet Wounds.

Dalhousie, N. B. June 8.—Arthur the seven-year-old son of Mr. and Mrs. John Harquail, was shot in both legs while he and a brother were playing with a loaded 32 rifle on Saturday at their home. Both parents were away at the time and a considerable period had elapsed before the grandmother, who lived in the next house, was alerted. When the doctor arrived, it was seen that the only chance of saving the child's life was to take him to the hospital in Campbellton, but the little fellow died shortly after his arrival. Much sympathy is expressed for the bereaved parents.

NOTICE.
Mrs. Devereaux Doucet, of Jacques River wishes to announce to the public that every Saturday in June and July will be a "Cheap Sale" day of ladies and children's hats.

PORT NEWS.
Three more vessels arrived here during the week-end. Among them a large steamer the "Eldo Clausen" from New York, which is being loaded by the Chaleur Bay Mills at Champoux Wharf. The other two are large schooners from Nova Scotia, the "Hillcrest" and the "Richard B. Silver" and are being loaded here by the Silvers Lumber Co. They will be ready to weigh anchor on Saturday morning and will be back here on Sunday.

WOMAN UPON DRINK CHARGE

Pretty, Well-Dressed But in Rather Unnerved Condition After Bout.

It is not often that cases of drunkenness are heard in camera, but that questionable distinction was conferred upon one by Recorder Res Riviere today when he elected to hear in private a charge of drunkenness levelled against a fashionably dressed woman, said to be married and living to a highly respectable family. The accused was a very comely person but obviously suffering from extreme nervousness attributable either to the shame of her situation or the natural issue of her recent bout with King Alcohol.

She was charged with being drunk and also with behaving in a disorderly manner in a house on O'Connell street, where she is said to rent a couple of rooms. On the occasion in question she got so drunk that the proprietor of the house had to put her out, and as this process was not consummated without considerable trouble, a crowd was attracted, with the result that the police arrived on the scene and took the woman into custody. She pleaded not guilty to the charge, but her plea proved vain before the avalanche of evidence against her. It was brought out in evidence that she was in the habit of entertaining a number of friends. It was also pointed out that this was not the first appearance of the accused in court. In these instances the Recorder passed sentence of \$25 and costs with the alternative of one month's imprisonment.
