Springfield at Rochester.
Providence at Syracuse.

The Crescent Athletic Club will hold an important meeting to-night at Lem. Felcher's, when the team for their tour will be chosen, All members are requested to be on hand.

Yesterday morning a club styled Alerts were credited with defeating the Diamonds last Saturday afternoon by 21 to 3. This was not so, as the Diamonds never played such a club. If there is another Diamonds in the city, the Diamonds scheduled in the Eastern Junior League would like to hear from them.

A meeting of the Intermediate League of Amateur Baseball Clubs will be held Wednesday evening, May 15, at the Dauntless club rooms, 647 Queen-street east; three delegates only from each club will allowed to be present.

man of the committee, he had received many requests for such action. Shirt Waist and Deuteronomy. One of the most significant signs of spring is the appearance of the shirt waist. It is worn by all classes and conditions of women.

Age or size is no bar to it. Comeliness or homeliness are equally suscepti-ble to its attractions. It has come with

that which pertaineth unto a man, neither shall a man put on a woman's garment; for all that do so are an abomination."

As the women are putting on not only the shirt waist but the collar button, the stude and the four-in-hand ties, which pertain unto a man, it is very evident they do not take scriptural injunctions very much to heart.-Denver

WOMEN AS INVENTORS.

PATENTS FOR ODD THINGS HELD BY THE GENTLE SEX.

Ploughs, Bee-Hives, Axles, Rafts-Sleer Inducers. Nose-Improvers, Skirt-Sup porters, and Many Other Articles

for straw weaving with silk or thread. The name of the inventor was Mary Kies. The next invention by a woman was in July, 1845. This was a corset perfected by Mary Brush. Then came sional invention.

Lavinia H. Foy, of Worcester, Mass.

was one of the early woman patentees, and she has applied for patents on a great many improvements. Her first patent was issued on July 22, 1862, for an improvement in corset-skirt supporters, and nearly all the patents granted her have been for articles connected with the wearing apparel of women. In fact, nearly all of the early patents by woman were for improvepatents by woman were for improve-ments on articles connected with her surroundings or apparel, such as cook-

These Are Chinese Maxima

Significant of the times is the fact that woman is rapidly coming to the front as an inventor. Women are not only filling thousands of applications for patents on improvements in articles especially adapted and intended for their sex, but they are exercising their ingenuity in the direction of improving many of the implements with which men only as a rule are supposed to deal. The first invention in this country by a woman was in 1809 and perfected on May 5 of that year. It was a device for the transfer with the silk or thread

number of years with only an occa-

about the house.

A Philadelphia woman, however, started the ball rolling in the other direction by patenting an improvement in bee-hives, and about the same time

When the sword is rusty, the plough bright, the prisons empty, the granaries full, the steps of the temples worn down and those of the law courts grass grown, when doctors go afoot, the bakers on horseback, and the men of letters drive in their own carriages, then the empire is well governed.—L'Arlequin.

THE SUPERB TONE - OF -THE Is not equalled by any other plano of Canadian production. 15 King-st. E., TORONTO.

"Why don't you work? Don't like it, I suppose."
"Like it? Why, boss, work with me is a passion, a vice. That is just the trouble. The moment I commence to

do a little, I cannot leave it alone, and it grows upon me like drink, opium or lawn tennis. That is why I have to make an effort to leave it entirely alone."—Life. belt and is endowed with the privilege of separating from the garment that supplements it.

This prevalence of the shirt waist is a token of the religious laxity of the times. Its hold upon feminine favor shows that the Bible is not read or heeded as in the days of our grandmothers. In Deuteronomy xxii, 5, are these that which

the boy.

How Little We Can Live On.

Doctor Pavy, perhaps the most eminent authority upon diet, says that the average man in a state of absolute rest, and ilve on sixteen ounces of food a day, a man doing ordinary light work can live on twenty-three ounces: and a man doing laborious work needs from twenty-six and three-quarter ounces to thirty ounces.

This is food absolutely free from water, and it must be remembered that reverything we eat contains more or less water, so that from forty-eight to sixty ounces of ordinary food are neces-
