the horseless carriage. The motor cycle race that was, to come off at

Chicago recently is referred to as evi

dencing the all-absorbing interest that is being taken in the new machine

The Chicago race was postponed from Nov. 3 to 28, so as to allow some of

those who proposed to compete to get their machines in better shape. It is

expected that 60 carriages of the

horseless type will compete when the race actually comes off, as it will on

Thanksgiving Day. A tremendous

amount of mechanical energy is now

being directed towards the perfection

tion, in the same way as it has been flooded with bicycles. The Enginee proposes that an exhibition of horseles

carriages be held in Toronto next sum-

mer. We notice in The Spectator of

last night that the proposition is made to have a motor cycle race come

off next year at Hamilton under the

auspices of the Hamilton Jockey Club.

There is no reason why both cities

should not enjoy the novelty and reap

one that should be seriously entertain

THE WORLD AND THE GAS COMPANY. The World desires to lay before its readers the reason for its vigorous attitude towards the Consumers' Gas

We are thoroughly in accord with the rinciple which has been realized in England and which is beginning to be developed in America in a very remarkable degree—the principle that the municipality should own all the franchises of a public character within its limits, and if it is not able to own them or if public opinion is not educated up to the point, then that it ought to have a voice in their control. This new municipal spirit is dominant in England; and the result has been that it has been the cause of English and Scotch tweed, 3 pieces, knee pants, single and double-breasted, all sizes, from 28-in. to 32-in. 5.00

been that it has been the cause of marvellous progress in the great cities of the Mother Country. It has been carried to such an extent that it is best described by the term "municinal socialism". Wheever wishes to pany is finally decided by the Suprementations of the Suprementation of the Suprementation of the Consumers' Gas Communications.

North American Review:

-Bargains in Carpets
-Bargains in Furniture

-Bargains in Furniture

The municipality of Glasgow took over the tramways simply because the private company refused to agree to improve the lof of its employes. Fortunately like Liverpool and Manchester, Glasgow had wisely constructed its own tramways. They nomical. It's a pleasure to momical. It's a pleasure to momical such a collection of Housefurnishings in styles that are new and qualities that are unquestionable.

Couraged to seek homes out of town by a proportional as the distance increases.

The municipality of Glasgow took over the tramways simply because the private company refused to agree to improve the lorging its own tramways. They had been leased to the private company for twenty-five years, and the lease expired last year. In renewing this lease the disagreement occurred which ended in the determination of the city to carry on the business itself. The old company refused to sell its rolling stock, whereupon the municipal corporation, not to be bluffed, purchased a new and handsome outfit, lighted the cars by electricity, and is togation of the city to carry on the business itself. The old company refused to sell its rolling stock, whereupon the municipal corporation, not to be bluffed, purchased a new and handsome outfit, lighted the cars by electricity, and is togation of the city to carry on the business, I hope, successfully.

When the company begin the distribution of cylinders and light through-

The new light, in fact, ous in the hands of the central governis actual sunlight, for the two show

The English cities all along the line are going in, as we said before, for this "municipal socialism," and so are the cities of America. Toronto so far has only begun, but as far as she has gone she has done well, as, instance her street railways and telephones. This city does not own the street railway franchise outright, but it controls it very largely, regulates the price of fares, the hours of labor for the men and receives a percentage of the gross earnings of the company. We company we have referred to is conbelieve that this system could be extended to all forms of gas and electric lighting; perhaps, still more, to the Falls. The carbide will be brought to telephone service; to a power service and in similar other directions.

We certainly believe that the time has come when it ought to be applied to the regulation of the Consumers' Gas Company, which has enjoyed a profitable monopoly in this city for many years, and which, so far as we Pair can gather from the judgment of Mr.

Justice Ferguson, has been used to the detriment of the consumers and for the sole benefit of the shareholders. We believe Toronto will be substantially benfited by securing a share in the government of this company. In the first place, the city will be enabled, if it gets a voice in the control of the company. of the company, to give the present inhabitants of the city light and fuel at one-half of its present cost and in that way will be enabled to attract people to the city as a place of residence and of manufacture. Toronto today is greatly hampered by her debt, by her taxation and by the cost of of the motor cycle, which is the tech-living; and if in any way we can re-nical name of the horseless carriage. duce this by compelling monopolies to pay a portion of their earnings to the city; by compelling them to share a portion of their profits with consumers; and by holding out inducements to outsiders that if they come here they will be in a position to get these

they will be in a position to get these advantages at a less price than they

can get them in other places, we will

be doing a great deal towards improv-

ing the city's position and making it

a still more desirable place of loca-

Taking, then, this view of the case, we believe it is the duty of the Coun-cil to exact the utmost limit of any benefit that has accrued to the city and to the consumers by the judgment of Judge Ferguson. We believe it is the duty of the Mayor and Council to take such steps as will compel the Consumers' Gas Company to forego their arrogant pretensions and to give some consideration to the public. We believe the Mayor and Council have only to continue Mr. Christopher Robinson in their service for a while longer and to take his advice as to what may be the best means of bringing the company to time to have the mpany get on their marrow bones. Already the company begin to feel that they are in the wrong, that they are contravening the new municipal spirit and that they must make some compromise. But compromise is not They must admit the city, through the Council or otherwise, to a full share in the management of their monopoly, and if they fail to do this, then it is the duty of the Council, under the best legal advice they can get, to go to the Legislature and to the Attorney-General and demand and repeal all the Acts of incorporation of the company on the good and substantial ground that they have completely violated them and have disregarded the law of the land. We happen to have in the present Legislature of Ontario a large body of men who believe in the state regulation of monopolies and, that being the case, we have no hesitation in advising the city to maintain a strong position and to let the Consumers' Gas Company

of Toronto understand that such ar-
